Altruistic Reveries Perspectives From The Humanities And Social Sciences:

Altruistic Reveries Basant K. Kapur, Kim-Chong Chong, 2012-12-06 *Altruistic Reveries* is a unique volume which arises out of an Interdisciplinary Conference on Perspectives on Altruism from the Humanities and Social Sciences organized by the Centre for Advanced Studies Faculty of Arts and Social Sciences National University of Singapore in October 1999. Altruism is a deep multi faceted phenomenon of great interest and relevance to scholars across the entire range of disciplines in the Humanities and Social Sciences. The Centre therefore brought together experts in diverse disciplines: Philosophy, Literature, Psychology, Sociology, Economics and Political science to examine and discuss the significance and role of altruism from their respective perspectives. A total of 10 papers in all were presented and the volume is completed by an Introduction by the editors and a final Concluding Chapter by one of the editors. Among the issues discussed are the efficacy of motivational altruism in the resolution of public issues, the genetic origins of altruism and its attendant risks, the metaphysical basis of altruism, empathy and altruism, altruism or social exchange, altruism in wartime and the welfare state. A notable feature of the volume is that the various authors have not talked past one another. Although each is a specialist in his field, the papers are accessible to those in other fields and to non specialists. Both individually and together they provide a rich set of insights and perspectives on altruism as a fundamental human and social phenomenon which will edify interest and stimulate all readers of the volume.

Economic Growth Theory Wei-Bin Zhang, 2018-01-18 This book develops a new theoretical framework to examine the issues of economic growth and development. Providing analysis of economic dynamics in a competitive economy under government intervention in infrastructure and income distribution, the book develops a unique analytical framework under the influence of traditional neoclassical growth theory. However, in a departure from neoclassical growth theory, it examines both the Solow-Swan and the Ramsey growth models, introducing a utility function which treats consumer choices in ways critically different to previous approaches. Using practical examples and models, the book demonstrates how this new direction can effectively analyze the key issues of economic growth in a compact and comprehensive manner.
