Aluminium Structural Design Frederico M. Mazzolani, 2014-05-04 The subject of the book is the design of aluminium alloys structures The subject is treated from different points of view like technology theory codification and applications Aluminium alloys are successfully employed in the transportation industry A parallel trend has been observed in the last decades in civil engineering structures where aluminium alloys compete with steel long span roofing bridges hydraulic structures offshore superstructures This volume collects the lectures of outstanding international experts who are all involved in the codification activity of Eurocode 9 on Aluminium Structural Design It illustrates with particular reference to the fields of transportation and civil engineering the basic design principles from the material properties and the technological aspects of their application to the evaluation of the resistance of the structural elements member and plates under static dynamic and fatigue loading conditions      **Aluminium Structural Design** Frederico M. Mazzolani, 2014-09-01

*Introduction to Structural Aluminium Design* Ulrich Müller, 2011      **Aluminum Structural Design** Reynolds Metals Company, 2013-10      Aluminium Structural Elements Design John W. Bull, 2010-09 Eurocodes have now largely replaced national codes such as British Standards as the structural design standard for public and private works Eurocode 9 deals with the structural specification of aluminium design taking into account factors such as fire design fatigue sheeting and shell structures Aluminium Structural Elements Design A Practical Guide to Eurocode 9 provides a simplified guide to designing aluminium structural elements It covers all 5 parts of Eurocode 9 Design of Aluminium Structures using examples to illustrate what each part means Written by a member of the BSI sub committee involved in the development of Eurocode 9 and the UK National Annex this book is an essential guide for all civil and structural engineers undertaking the switch from British Standards to Eurocodes      **Introduction to Structural Aluminium Design** Ulrich Müller, 2010 Annotation This book deals with the use of aluminium for structural and non structural applications and provides an introduction to designing structures made from aluminium or aluminium alloy elements It comprises a ready reference to the material properties and behaviour of aluminium and its use in structural design In the context of information about the material itself fabrication structural design and corrosion structural analysis serviceability element design and fatigue the author considers the strengths of designing with aluminium alloy members and how any weaknesses can be overcome Reference is made throughout to EN 1999 Eurocode 9 and its design methods are discussed and illustrated With most of its structural strength properties close to steel and with consideration for the special properties of aluminium alloys there is considerable scope to make better use of this material in construction Many years of working with aluminium have provided the author with the knowledge to avoid pitfalls and problems in design fabrication and protection of structures thus avoiding costly remedial work      **Aluminium Structures** R.
