World Congress of the International Association for Philosophy of Law and Social Philosophy (IVR)* Internationale Vereinigung für Rechts- und Sozialphilosophie, 2004 The Truth about Crime Jean Comaroff, John L. Comaroff, 2016-12-05 This new book by the well known anthropologists Jean and John L Comaroff explores the global preoccupation with criminality in the early twenty first century a preoccupation strikingly disproportionate in most places and for most people to the risks posed by lawlessness to the conduct of everyday life Ours in an epoch in which law making law breaking and law enforcement are ever more critical registers in which societies construct contest and confront truths about themselves an epoch in which criminology broadly defined has displaced sociology as the privileged means by which the social world knows itself They also argue that as the result of a tectonic shift in the triangulation of capital the state and governance the meanings attached to crime and with it the nature of policing have undergone significant change also that there has been a palpable muddying of the lines between legality and illegality between corruption and conventional

business even between crime and policing which exist nowadays in ever greater hyphenated complicity Thinking through Crime and Policing is therefore an excursion into the contemporary Order of Things or rather into the metaphysic of disorder that saturates the late modern world indeed has become its leitmotif It is also a meditation on sovereignty and citizenship on civility class and race on the law and its transgression on the political economy of representation **Denumerable Markov**

Undeniable Truth Dwayne Martin, 2017-03-09 Jack Hudson a History teacher and his wife Melissa an English teacher can't resist a mystery Less than a year ago he found his grandfather's remains in a root cellar buried in the rubble of a barn that had been bombed on D Day Now his challenge is to find an aunt that may or may not even exist The adventure takes him across the Atlantic again and into the waiting snare of unforeseen danger Giving up is not in his vocabulary so he must see this through to the end In order to keep everyone safe he must pull off the biggest bluff of his life *The Truth about Nature*

Bram Büscher, 2020-12-15 How should we share the truth about the environmental crisis At a moment when even the most basic facts about ecology and the climate face contestation and contempt environmental advocates are at an impasse Many have turned to social media and digital technologies to shift the tide But what if their strategy is not only flawed but dangerous The Truth about Nature follows environmental actors as they turn to the internet to save nature It documents how conservation efforts are transformed through the political economy of platforms and the algorithmic feeds that have been instrumental to the rise of post truth politics Developing a novel account of post truth as an expression of power under platform capitalism Bram Büscher shows how environmental actors attempt to mediate between structural forms of platform power and the contingent histories and contexts of particular environmental issues Bringing efforts at wildlife protection in Southern Africa into dialogue with a sweeping analysis of truth and power in the twenty first century Büscher makes the case for a new environmental politics that radically reignites the art of speaking truth to power Minimal Weak Truth Table

Post-Truth Steve Fuller, 2018-05-25 Post truth was Oxford Dictionaries 2016 word of the year While the term was coined by its disparagers in the light of the Brexit and US presidential campaigns the roots of post truth lie deep in the history of Western social and political theory Post Truth reaches back to Plato ranging across theology and philosophy to focus on the Machiavellian tradition in classical sociology as exemplified by Vilfredo Pareto who offered the original modern account of post truth in terms of the circulation of elites The defining feature of post truth is a strong distinction between appearance and reality which is never quite resolved and so the strongest appearance ends up passing for reality The only question is whether more is gained by rapid changes in appearance or by stabilizing one such appearance Post Truth plays out what this means for both politics and science

Nomic Truth Approximation Revisited Theo A. F. Kuipers, 2019-03-05 This monograph presents new ideas in nomic truth approximation It features original and revised papers from a formal philosopher of science who has studied the concept for more than 35 years Over the course of time the author's initial ideas evolved He discovered a way to generalize his first theory of nomic truth approximation viz by dropping an unnecessarily strong assumption In particular he first believed to have to assume that theories were maximally specific in the sense that they did not only exclude certain conceptual possibilities but also that all non excluded possibilities were in fact claimed to be nomically possible Now he argues that the exclusion claim alone or for that matter the inclusion claim alone is sufficient to motivate the formal definition of being closer to the nomic truth The papers collected here detail this generalized view of nomic truthlikeness or verisimilitude Besides this the book presents in adapted form the relation with several other topics such as domain revision aesthetic progress abduction inference to the best explanation pragmatic aspects probabilistic methods belief revision and epistemological positions notably constructive realism Overall the volume presents profound insight into nomic truth approximation This idea seeks to determine how one theory can be closer to or more similar to the truth about what is nomically e.g. physically chemically biologically possible than another theory As a result it represents the ultimate goal of theory oriented empirical science Theo Kuipers is the author of *Studies in Inductive Probability and Rational Expectation* 1978 *From Instrumentalism to Constructive Realism* 2000 and *Structures in Science* 2001 He is the volume editor of the *Handbook on General Philosophy of Science* 2007 In 2005 there appeared two volumes of *Essays in Debate* with Theo Kuipers entitled *Confirmation Empirical Progress and Truth Approximation* and *Cognitive Structures in Scientific Inquiry*
