Along The Path:

A Textbook in Electricity and Magnetism Harry C. Kelly, 1941 Mazes in Videogames Alison Gazzard, 2013-05-01 From the text adventures of Zork to the arcade game of Pac Man to the corridors of Doom and on to the city streets of Grand Theft Auto IV the maze has often been used as a space to trap and confuse players in their navigation of gameworlds However the maze as a construction on the landscape has a long history before the invention of the videogame By examining the change in the maze from the landscapes of open spaces and closed gardens through to the screen of the videogame both mazes and labyrinths are discussed in terms of historical reference alongside the author's personal experiences of walking and playing these structures This book shows how our cultural experiences of real world maze landscapes may have changed and how we negotiate videogame worlds along the various paths and meanings they so often create for us Sustaining Administrative Reform in China Through Path Dependence and Creation Yuqing Liang, 2024-02-29 This book looks into the processes sustaining the administrative reform in Chinese local government and the roles of different actors during different phases by tracing a vivid administrative reform process in Shunde district Guangdong province between 2009 and 2014 In 2008 Chinese central government initiated a new round of large scale top to bottom administrative reform mega ministry administrative reform to address the long lasting administrative problems Against this background the reforms in Shunde government county level operated well and sustained for several years which was enlarged to the administrative licensing field and hence influenced China's reforms in the following 10 years Shunde case could allow us a better peep at the factors that contribute to the sustenance of reform The analyses in this book find that sustenance of reform reflects ironically the logics of both path dependence and path creation The past reform trajectories have created a favorable background for further reform to evolve and a receptive ground in which exogenous forces interacted with the local reform minded actors to create the new reform innovations The combination of path dependence and path creation kept local reform afloat Space and Time in Languages and Cultures Luna Filipovi?, Kasia M. Jaszczolt, Katarzyna M. Jaszczolt, 2012 This is an interdisciplinary volume that focuses on the central topic of the representation of events namely cross cultural differences in representing time and space as well as various aspects of the conceptualisation of space and time It brings together research on space and time from a variety of angles both theoretical and methodological Crossing boundaries between and among disciplines such as linguistics psychology philosophy or anthropology forms a creative platform in a bold attempt to reveal the complex interaction of language culture and cognition in the context of human communication and interaction The authors address the nature of spatial and temporal constructs from a number of perspectives such as cultural specificity in determining time intervals in an Amazonian culture distinct temporalities in a specific Mongolian hunter community Russian specific conceptualisation of temporal relations Seri and Yucatec frames of spatial reference memory of events in space and time and metaphorical meaning stemming from perception and spatial artefacts to name but a few themes The topic of space

and time in language and culture is also represented from a different albeit related point of view in the sister volume Space and Time in Languages and Cultures Linguistic Diversity HCP 36 which focuses on the language specific vis vis universal aspects of linguistic representation of spatial and temporal reference **Circulation Weather types as a tool in atmospheric, climate and environmental research** Alexandre M.
