Many people think of inertia as an object at rest will stay at rest unless a force is exerted on it like a boulder in a field. And people can think of their lives in the same way: static and unmoving. But we aren't stuck in one place as so many express when they are dissatisfied with their lives. Rather, our lives are moving swiftly and inexorably along a path driven by powerful forces, both past and present, that is highly resistant to a change in direction. As a result, small forces such as a modest insight or a brief aha moment aren't enough to catalyze significant change in how we think, what we feel, or how we act on or react to our world. In fact, meaningful change can only occur when forces are applied that are greater than the forces that are already propelling our lives. Seeing our lives from this dynamic perspective is the foundation for understanding what it takes to bring meaningful and long lasting positive change to our lives. Jim Taylor explores the four forces: values, self esteem, ownership, and emotions that propel our life inertia, which shows itself through the lens with which we view the world, the emotional reactions we have, the actions that we take, and the relationships that we create. He then explains how to harness those to our own benefit so that we may steer our lives in the direction of our own choosing rather than allowing our past inertia or outside forces to dictate the direction our lives take. By letting our values guide us, building our self esteem, taking ownership of our decisions and actions, and using our emotions as positive fuel, we can break free from our past inertia, take control of our lives, and chart a future of meaning, happiness, success, and connection with confidence, commitment, and courage.
