*Natural Products for the Management of Arthritic Disorders* Rupesh K. Gautam, Lokesh Deb, Kamal Dua, 2022-08-20 Rheumatoid arthritis (RA) is the most common inflammatory complication and affects approximately 1 % of the global population. It affects three times more women than men. RA is an autoimmune disorder elicited by exposure of genetic factors from the host to unknown antigens causing arthritogenic complaints. It also includes the activation of lymphocytes as well as CD4 helper T cells along with local release of chronic inflammatory mediators and cytokines like tumor necrosis factor (TNF) and various cytokines like interleukins (IL) that enormously affect the joints. The available allopathic therapies for RA are not a cure for the complications and antibody therapy and surgical procedures are expensive. However, in the present era, researchers and healthcare professionals have moved toward natural medicines obtained from plants and other natural sources. Research based on developments in phytomedicine has progressed steadily. Evidence has been collected to show the massive therapeutic potential of medicinal plants used in various traditional systems against many pathological complications. Researchers have focused on the therapeutic potential of natural products used for treatment and counteracting various disorders along with their complications having negligible adverse effects. *Natural Products for the Management of Arthritic Disorders* compiles current knowledge about the bioactive compounds and herbal formulations useful in the treatment of rheumatoid arthritis. 11 chapters explain the role of natural products in the management of rheumatoid arthritis. Topics have been contributed by experts in medicinal chemistry and rheumatology. The book first introduces the reader to rheumatoid arthritis before delving into conventional and alternative therapies for the disease. The editors have also included special topics such as the biomarkers for RA, cytokines and anti-inflammatory mediators, preclinical and clinical studies. The range of topics should provide a comprehensive overview of natural remedies for arthritis and the role of natural products in anti-arthritic drug development. The information will be useful for many readers including medical and pharmacology students, multidisciplinary research scholars, scientists, pharma, herbal food industrialists and policy makers.

*Integrative Pharmacology-based Research on Traditional Medicine: Methodologies, Medical and Pharmacological Applications* Hai Yu Xu, Chang-xiao Liu, Yanqiong Zhang, Yan Xu, Takashi Sato, 2023-09-19 Integrative Pharmacology can be used to determine the multi-pharmacological effects of traditional medicines such as traditional Chinese medicine, TCM, Kampo, Sa-sang, Ayurveda, etc. Through qualitative and quantitative pharmacokinetic, pharmacodynamic, PK/PD correlations among multi-constituents and multi-targets, integrating chemical profiling, ADME/PK processes, molecular network calculation, and resulting experimental validation, the use of Integrative Pharmacology has become widespread. The data has provided a novel paradigm to evaluate the druggability of bioactive ingredients of herbs or formulae to decipher the pharmacological mechanisms of drug action and to screen potentially new indications for approved drugs and previously unidentified adverse events. On this basis, Integrative Pharmacology may offer an effective way to test the potential scientific basis for traditional medicines and to assess what

roles of traditional medicine can and cannot play in pharmaceuticals
