submunition or sublet with an infrared sensor is launched over the target and fires an explosively formed projectile down into the engine compartment. The Hornet/WAMs has an antihandling feature that causes the mine to detonate when disturbed. The Hornet/WAMs is designed to operate for 30 days after emplacement and to then self-destruct. The sublet is similar to the sublets in the Air Force Sensor-Fuzed Weapon. Original plans called for the Hornet/WAM to be dispensed from a Volcano launcher or a deep-attack asset, such as the Multiple-Launch Rocket System (MLRS) or the Tactical Missile System (TACMS), in addition to hand emplacement. However, subsequent evolutions of requirements

and the exigencies of the development program have precluded these options. Therefore, for the foreseeable future, Hornet/WAM will be hand emplaced, which sharply limits its utility.

Remotely Delivered (Scatterable) Mines

The Remote Antiarmor Mine System (RAAMS) (Figure C-8) consists of a 155-mm howitzer projectile containing nine AT mines. RAAMS is usually used with the ADAM, but can be used alone. Each mine in the projectile is a right-circular cylinder, 11.25 cm in diameter and 7.5 cm high, weighing 1.8 kg and containing about 0.78 kg of pressed explosive in the main charge. RAAMS have factory-set self-destruct times of either 4 or 48 hours. About 20 percent have an antihandling feature that causes them to explode when tilted at an angle of 17 degrees or more. RAAMS are designed to destroy mounted targets by perforating the underside of the vehicle. The mines have magnetic-influence fuzes designed to stop mounted vehicles when they are detonated, as intended, between the tracks; if they are detonated directly under a track, they may not stop the vehicle.

The Ground-Emplaced Mine-Scattering System (GEMSS/Flipper) was the first scatterable mine system fielded by the Army (RAAMS/ADAM was the second). Although GEMSS (Figure C-9) is now obsolete, the mines are still in the U.S. inventory. The GEMSS dispenser is a large trailer that can be towed by a variety of wheeled and tracked vehicles. A relatively large tactical minefield can be laid in areas controlled by friendly forces. The dispenser holds 800 mines and can lay mines in 26-, 34-, or 60-meter wide strips in five different densities. The mines come in sleeves of five mines each. The operator sets self-destruct times at either 5 or 15 days. Because the system is unwieldy to tow and operators were vulnerable to small arms fire, the utility of the system was limited. Flipper is a relatively small,

Landmine Monitor Report 2001 Human Rights Watch (Organization), 2001 **Anti-Personnel Mines under Humanitarian Law : A View from the Vanishing Point** Stuart Maslen, 2021-10-25 Anti Personnel Mines under Humanitarian Law A View From the Vanishing Point considers in depth the various customary and conventional legal regimes applicable to the use of anti personnel mines All involved with the global effort to control and eliminate anti personnel mines as well as the policy makers who are concerned about the devastation resulting from the widespread deployment of these arbitrary weapons need to familiarize themselves with the information presented in this timely volume Published under the Transnational Publishers imprint *Landmines and Human Security* Richard A. Matthew, Bryan McDonald, Kenneth R. Rutherford, 2012-02-01 An impressive array of activists scholars government officials journalists and landmine victims themselves are gathered here to tell the dramatic and inspiring story of the International Campaign to Ban Landmines ICBL Organized in the early 1990s the ICBL is a network of more than one thousand nongovernmental organizations worldwide working for a global ban on landmines It was an important force behind the treaty to ban antipersonnel landmines that was signed in Ottawa in 1997 and which led to its being awarded the 1997 Nobel Peace Prize along with its coordinator *Military Law Review* , *Norms Without the Great Powers* Adam Bower, 2017 This book explores the nature of power in world politics and the particular role that law plays in defining the meaning and deployment of power in the international system **Negotiating Minefields** Leon V. Sigal, 2013-05-13 Against all odds the International Campaign to Ban Landmines helped to enact a global treaty banning antipersonnel mines in 1997 For that achievement it was awarded the Nobel Peace Prize In this volume Leon Sigal shows how a handful of NGOs with almost no

mass base got more than 100 countries to outlaw a weapon that their armies had long used It is a story of intrigue and misperception of clashing norms and interests of contentious bureaucratic and domestic politics It is also a story of effective leadership of sustained commitment to a cause of alliances between campaigners and government officials of a US senator who championed the ban and of the skilful use of the news media Despite this monumental effort the campaign failed to get the United States to sign the treaty Drawing on extensive internal documents and interviews with US officials and ban campaigners Sigal tells the story of the in fighting inside the Clinton administration in the Pentagon and within the ban campaign itself that led to this major setback for an otherwise unprecedented successful global effort Negotiating Minefields will be of interest to students and scholars of military and strategic studies and politics and international relations

Norm Dynamics in Multilateral Arms Control Harald Müller, Carmen Wunderlich, 2013-04-01 This volume comprehensively covers a range of issues related to dynamic norm change in the current major international arms control regimes related to nuclear biological and chemical weapons small arms and light weapons cluster munitions and antipersonnel mines Arms control policies of all of the key established and rising state actors are considered as well as those of nonaligned countries nongovernmental organizations and international governing bodies Recent studies on multilateral arms control tend to focus mostly on structure by which opportunities and constraints for action are created This volume pays equal attention to agency through which opportunities and constraints to produce change or maintain the status quo are handled In addition and in greater depth than in recent studies the volume acknowledges the force of moral and ethical impulses alongside such factors as political legal and technological change in the evolution of arms control norms The volume begins with a look at the structure of regimes at the conflicts residing in these structures and at the dynamic processes in which these conflicts are worked out The impact of extrinsic factors on norm dynamics is considered next including technological change and shifts in attitudes and power structures Essays on the role of agency in driving norm change conclude the volume with a particular focus on norm entrepreneurship and the importance of acknowledging the competing justice claims surrounding norm change efforts Contributors Una Becker Jakob Alexis Below Marco Fey Giorgio Franceschini Andrea Hellmann Gregor Hofmann Friederike Klinke Daniel M ller Harald M ller Franziska Pl mmer Carsten Rauch Judith Reuter Elvira Rosert Annette Schaper Hans Joachim Schmidt Tabea Seidler Diekmann Simone Wisotzki Carmen Wunderlich
