Altruism In Later Life:

Altruism in Later Life Elizabeth Midlarsky, Eva Kahana, 1994-08-17 Why are the elderly so often perceived as burdensome and unproductive members of our society Altruism in Later Life explores and refutes this view with cogent empirical data Authors Elizabeth Midlarsky and Eva Kahana introduce the results of a series of investigations on assistance offered by rather than to the elderly in the context of historical philosophical and theoretical trends in gerontology and altruism research Following a brief but inclusive historical survey of aging treatments they present their own theoretical model of successful aging Based on a carefully applied methodological review of research focusing on altruism and the elderly the results reveal the relative frequency nature correlates and ramifications of the contributions they make Dispelling many of the misapprehensions held about the elderly this work will prove to be a vital timely resource for professionals and students in fields including gerontology psychology social work sociology counseling and the health sciences **Altruism in**

Humans Charles Daniel Batson, 2011 We send money to help famine victims halfway around the world We campaign to save whales and oceans We stay up all night to comfort a friend with a broken relationship People will at times risk even lose their lives for others including strangers Why do we do these things What motivates such behavior Altruism in Humans takes a hard science look at the possibility that we humans have the capacity to care for others for their sakes rather than simply for our own Based on an extensive series of theory testing laboratory experiments conducted over the past 35 years this book details a theory of altruistic motivation offers a comprehensive summary of the research designed to test the empathy altruism hypothesis and considers the theoretical and practical implications of this conclusion Authored by the world's preeminent scholar on altruism this landmark work is an authoritative scholarly resource on the theory surrounding altruism and its potential contribution to better interpersonal relations and a better society Civic Engagement in Later Life

Rodrigo Serrat, 2025-05-29 Available open access digitally under CC BY NC ND licence Older adults civic engagement has become a key concern in academic and policy debates in recent years However existing studies on this topic remain fragmented across various conceptual and methodological approaches This book provides a comprehensive interdisciplinary and multidimensional perspective on older adults civic engagement It proposes a conceptual framework which understands civic engagement as a multidimensional concept encompassing a diversity of activities through which older adults contribute to their communities and wider society Contributors explore the factors shaping older adults participation in various civic activities across the life course considering their diversity in terms of social locations such as gender health status migrant background socioeconomic background and residential arrangements By analysing past and current research policy and practice the book offers recommendations for future efforts to advance the field **The Oxford Handbook of Prosocial Behavior**

David A. Schroeder, William G. Graziano, 2015 The Oxford Handbook of Prosocial Behavior provides a comprehensive review of the current literature on when and why people act to benefit others It provides a comprehensive

overview of the field to give both the casual reader and the neophyte to the field some perspective about fundamental questions what why when and who relative to prosocial behavior Taking a multi level approach the chapters represent the broad spectrum of this multi faceted domain Topics range from micro level analyses involving evolutionary and comparative psychological factors to macro level applications such as reducing intergroup conflicts and ethnic genocide Between these extremes the contributors all internationally recognized in their field offer their perspectives on developmental processes that may predispose individuals to empathize with and respond to the needs of others individual differences that seem to interact with situational demands to promote helping and the underlying motivations of those helping others They explain volunteerism intragroup cooperation and intergroup cooperation to move the analysis from the individual to group level phenomena They extend the consideration of this topic to include support of pro environmental actions means to encourage participation in medical clinical trials and the promotion of world peace The ways that gender interpersonal relationships race and religion might affect decisions to give aid and support to others are also addressed The final chapter offers a unique view of prosocial behavior that encourages researchers and readers to take an even broader consideration of the field to search for a prosocial consilience

Miller, 2024 This updated edition of The Oxford Handbook of Psychology and Spirituality codifies the leading empirical evidence in the support and application of postmaterial psychological science Lisa J Miller has gathered together a group of ground breaking scholars to showcase their work of many decades that has come further to fruition in the past ten years with the collective momentum of a Spiritual Renaissance in Psychological Science With new and updated chapters from leading scholars in psychology medicine physics and biology the Handbook is an interdisciplinary reference for a rapidly emerging approach to contemporary science Highlighting fresh ideas and supporting science this overarching work provides both a foundation and a roadmap for what is truly a new ideological age **The Essential Guide to Aging in the Twenty-first Century** Donald

H. Kausler, Barry C. Kausler, Jill A. Krupsaw, 2007 This third edition of *The Graying of America* has been retitled revised and expanded In concise nontechnical language it offers middle aged and senior readers useful information on the effects of aging on health the mind and behavior Provided by publisher Altruism Scott, Niall, Seglow, Jonathan, 2007-11-01 This title explores how we have come to be altruistic and considers why it is important to remain altruistic not just for the sake of others but in order to maintain the fragile fabric of human society **The Invention of Altruism** Thomas Dixon, 2008-05-08 This volume explores how Victorian philosophers scientists clergymen and novelists debated the meaning of the new term altruism Including a reappraisal of Charles Darwin s ideas and insights into the rise of popular socialism this study is highly relevant to contemporary debates about altruism evolution religion and ethics Altruism and Altruistic Love Stephen G. Post, Lynn G. Underwood, Jeffrey P. Schloss, William B. Hurlbut, 2002-03-28 The concept of altruism or disinterested concern for another s welfare has been discussed by everyone from theologians to psychologists to biologists In this cutting edge book evolutionary neurological developmental psychological social cultural and religious aspects of altruistic behavior are examined by renowned researchers The result is a collaborative and provocative look at one of humanity s essential and defining characteristics Altruism and Health Stephen Garrard Post, 2007 The book provides heuristic models from evolution and neuroscience to explain the association between altruism and health and examine potential public health and practical implications of the existing data **Pathological Altruism** Barbara Oakley, 2012-01-05 Pathological Altruism is a groundbreaking new book the first to explore the negative aspects of altruism and empathy seemingly uniformly positive traits In fact pathological altruism in the form of an unhealthy focus on others to the detriment of one s own needs may underpin some personality disorders Hyperempathy an excess of concern for what others think and how they feel helps explain popular but poorly defined concepts such as codependency The contributing authors of this book provide a scientific social and cultural foundation for the subject of pathological altruism creating a new field of inquiry Each author s approach points to one disturbing truth what we value so much the altruistic good side of human nature can also have a dark side that we ignore at our peril *Family Caregiving Across the Lifespan* Center for Practice Innovations, Mandel School of Applied Social Sciences (Case Western Reserve University), 1994-03-16 Examining caregiving issues from a multigenerational family life cycle perspective this volume deals with the broad spectrum of chronic illnesses that necessitate family caregiving throughout the lifespan and discusses responses to these challenges by both caregiving families and caregiving systems Part One addresses the caregiving paradigm and the relationship of family caregiving research to family life studies Part Two examines conceptual aspects of caregiving ranging from the expansion of the caregiving paradigm caregiving processes and tasks to the positive aspects of caregiving Part Three emphasizes how family caregivers are affected by the connection or lack of it to macro level systems **Faith and Mental Health** Harold G Koenig, 2005-09-01 Koenig opens a window on mental health providing an unprecedented source of practical information about the relationship between religion and

mental health Dr Koenig examines how Christianity and other world religions deliver mental health services today and he makes recommendations based on research expertise and experience for new programs to meet local needs Encyclopedia of the Sciences of Learning Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation, cognition, metacognition etc. and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can be grouped into some basic categories such as behaviorist learning theories, connectionist learning theories, cognitive learning theories, constructivist learning theories and social learning theories. Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology, education, information science, biology and as a result of the emergence of computer technologies, especially also in the field of computer sciences and artificial intelligence. As a consequence, machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex, the various fields of interest were widely spread and separated from each other as a consequence. Even presently, there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. The Encyclopedia of the Sciences of Learning provides an up-to-date, broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields, including relevant areas of instruction, pedagogy, cognitive sciences and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists, educators, engineers and technical staff active in all fields of learning. More specifically, the Encyclopedia provides fast access to the most relevant theoretical terms, provides up-to-date, broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies, supplies clear and precise explanations of the theoretical terms, cross-references to related entries and up-to-date references to important research and publications. The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning; the entries are written by a distinguished panel of researchers in the various fields of the learning sciences. *The Principles of Ethics* Herbert Spencer, 1893
