Kripal, 2011-09-07 Jeffrey Kripal here recounts the spectacular history of Esalen the institute that has long been a world leader in alternative and experiential education and stands today at the center of the human potential movement Forged in the literary and mythical leanings of the Beat Generation inspired in the lecture halls of Stanford by radical scholars of comparative religion the institute was the remarkable brainchild of Michael Murphy and Richard Price Set against the heady backdrop of California during the revolutionary 1960s Esalen recounts in fascinating detail how these two maverick thinkers sought to fuse the spiritual revelations of the East with the scientific revolutions of the West or to combine the very best elements of Zen Buddhism Western psychology and Indian yoga into a decidedly utopian vision that rejected the dogmas of conventional religion In their religion of no religion the natural world was just as crucial as the spiritual one science and faith not only commingled but became staunch allies and the enlightenment of the body could lead to the full realization of our development as human beings An impressive new book Kripal has written the definitive intellectual history of the ideas behind the institute San Francisco Chronicle Kripal examines Esalen's extraordinary history and evocatively describes the breech birth of Murphy and Price's brainchild His real achievement though is effortlessly synthesizing a dizzying array of dissonant phenomena Cold War espionage ecstatic religiosity incongruous pairings Darwinism Tantric sex and otherwise schizy ephemera psychedelic drugs spaceflight into a cogent satisfyingly complete narrative Atlantic Monthly Kripal has produced the first all encompassing history of Esalen its intellectual social personal literary and spiritual passages Kripal brings us up to date and takes us deep beneath historical surfaces in this definitive elegantly written book Playboy *Understanding Contemporary American Science Fiction* Darren Harris-Fain, 2005 Understanding Contemporary American Science Fiction The Age of Maturity 1970-2000 explores the major trends and developments during three decades that witnessed science fiction's most dramatic progression from subliterate escapist entertainment to a more sophisticated literature of ideas Darren Harris Fain suggests that to understand American science fiction fully it is essential to realize that the current field with all its variety results from the proceeding decades of writings In addition he contends that although much science fiction of merit was written in America prior to 1970 the latter

decades of the twentieth century witnessed a dramatic improvement in quality even as the field fragmented into a variety of subgenres and as writers sought to transcend earlier critical dismissals Harris Fain discusses significant and representative works most of which mainstream literary scholars and critics ignore as he charts the historical and literary development of contemporary American science fiction the internal divisions along both literary and political lines experienced during the Vietnam era the influence of the feminist movement and other contemporary concerns the increasing contributions of female African American and gay and lesbian writers and the emergence of such significant trends as hard science fiction cyberpunk alternate history and shared world stories Harris Fain also considers literary science fiction's relationship to the mass media the effects the popularity of fantasy has on the field and academia's continued mispricing of the genre **Mindscales, the Geographies of Imagined Worlds** George Edgar Slusser, 1989 Eighteen essays plus four examples from the ninth annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature at the University of California Riverside The concept of mindscale Slusser and Rabkin explain allows critics to focus on a single fundamental problem The constant need for a relation between mind and some being external to mind The essayists are Poul Anderson Wendy Doniger O Flaherty Ronald J Heckelman David Brin Frank McConnell George E Slusser James Romm Jack G Voller Peter Fitting Michael R Collings Pascal J Thomas Reinhart Lutz Joseph D Miller Gary Westfahl Bill Lee Max P Belin William Lomax and Donald M Hassler The book concludes with four authors discussing examples of mindscale The participants are Jean Pierre Barricelli Gregory Benford Gary Kern and David N Samuelson *Dystopia(n) Matters* Fátima Vieira, 2013-07-16 The volume is divided into two parts separated by an Intermezzo The first part *Dystopia Matters* benefits from the contribution of reputed scholars of the field of Utopian Studies who were asked to make a statement explaining why dystopia is important The Intermezzo completes this part and offers the reader an informed discussion of the concepts of utopia dystopia and anti utopia whilst providing ground for the case studies presented in the second part in the sections devoted to literature film and theatre In one way or another despite the variety of approaches all contributors argue for the idea that if dystopia has invaded most forms of contemporary discourse its sibling utopia has not been eradicated from the scene Furthermore the studies show that the tension between the two concepts is instrumental to our cautious conscious and tentative construction of the future **Mythprint**, 1987

Feminism, Utopia, and Narrative Libby Falk Jones, Sarah McKim Webster Goodwin, 1990 *Navigating Stylistic Boundaries in the Music History Classroom* Esther M. Morgan-Ellis, 2024-04-30 At a time of transformation in the music history classroom and amid increasing calls to teach a global music history *Navigating Stylistic Boundaries in the Music History Classroom* adds nuance to the teaching of varied musical traditions by examining the places where they intersect and the issues of musical exchange and appropriation that these intersections raise Troubling traditional boundaries of genre and style this collection of essays helps instructors to denaturalize the framework of Western art music and invite students to engage with other traditions vernacular popular and non Western on their own terms The book draws together contributions

by a wide range of active scholars and educators to investigate the teaching of music history around cases of stylistic borders exploring the places where different practices of music and values intersect Each chapter in this collection considers a specific case in which an artist or community engages in what might be termed musical crossover exchange or appropriation and delves deeper into these concepts to explore questions of how musical meaning changes in moving across worlds of practice Addressing works that are already widely taught but presenting new ways to understand and interpret them this volume enables instructors to enrich the perspectives on music history that they present and to take on the challenge of teaching a more global music history without flattening the differences between traditions
