Artifacts & Ideas Bruce G. Trigger, 2003 a fine narrative of the development of Trigger s metaphysics in his archaeological and historical research It is accessible clearly written and worth close reading *Journal of Field Archaeology* Prehistoric archaeologists cannot observe their human subjects nor can they directly access their subjects ideas Both must be inferred from the remnants of the material objects they made and used In recent decades this incontrovertible fact has encouraged partisan approaches to the history and method of archaeology An empirical discipline emphasizing data classification and chronology has given way to a behaviorist approach that interprets finds as products of ecologically adaptive strategies and to a postmodern alternative that relies on an idealist cultural

relativist epistemology based on belief and cultural traditions In *Artifacts and Ideas* Bruce G Trigger challenges all partisan versions of recent developments in archaeology while remaining committed to understanding the past from a social science perspective Over 30 years Trigger has addressed fundamental epistemological issues and opposed the influence of narrow theoretical and ideological commitments on archaeological interpretation since the 1960s Trigger encourages a relativistic understanding of archaeological interpretation Yet as post processual archaeology influenced by postmodernism became increasingly influential Trigger countered nihilistic subjectivism by laying greater emphasis on how in the long run the constraints of evidence could be expected to produce a more comprehensive and objective understanding of the past In recent years Trigger has argued that while all human behavior is culturally mediated the capacity for such mediation has evolved as a flexible and highly efficient means by which humans adapt to a world that exists independently of their will Trigger agrees that a complete understanding of what has shaped the archaeological record requires knowledge both of past beliefs and of human behavior He knows also that one must understand humans as organisms with biologically grounded drives emotions and means of understanding Likewise even in the absence of data supplied in a linguistic format by texts and oral traditions at least some of the more ecologically adaptive forms of human behavior and some general patterns of belief that display cross cultural uniformity will be susceptible to archaeological analysis Advocating a realist epistemology and a materialist ontology *Artifacts and Ideas* offers an illuminating guide to the present state of the discipline as well as to how archaeology can best achieve its goals Bruce G Trigger is James McGill Professor in the department of anthropology at McGill University His numerous books include *The Children of Aataentsic A History of the Huron People to 1660* *A History of Archaeological Thought and Sociocultural Evolution*

Artifacts and Ideas Bruce Trigger, 2017-09-08 Prehistoric archaeologists cannot observe their human subjects nor can they directly access their subjects ideas Both must be inferred from the remnants of the material objects they made and used In recent decades this incontrovertible fact has encouraged partisan approaches to the history and method of archaeology An empirical discipline emphasizing data classification and chronology has given way to a behaviorist approach that interprets finds as products of ecologically adaptive strategies and to a postmodern alternative that relies on an idealist cultural relativist epistemology based on belief and cultural traditions In *Artifacts and Ideas* Bruce G Trigger challenges all partisan versions of recent developments in archaeology while remaining committed to understanding the past from a social science perspective Over 30 years Trigger has addressed fundamental epistemological issues and opposed the influence of narrow theoretical and ideological commitments on archaeological interpretation since the 1960s Trigger encourages a relativistic understanding of archaeological interpretation Yet as post processual archaeology influenced by postmodernism became increasingly influential Trigger countered nihilistic subjectivism by laying greater emphasis on how in the long run the constraints of evidence could be expected to produce a more comprehensive and objective understanding of the past In recent years Trigger has argued that while all human

behavior is culturally mediated the capacity for such mediation has evolved as a flexible and highly efficient means by which humans adapt to a world that exists independently of their will Trigger agrees that a complete understanding of what has shaped the archaeological record requires knowledge both of past beliefs and of human behavior He knows also that one must understand humans as organisms with biologically grounded drives emotions and means of understanding Likewise even in the absence of data supplied in a linguistic format by texts and oral traditions at least some of the more ecologically adaptive forms of human behavior and some general patterns of belief that display cross cultural uniformity will be susceptible to archaeological analysis Advocating a realist epistemology and a materialist ontology Artifacts and Ideas offers an illuminating guide to the present state of the discipline as well as to how archaeology can best achieve its goals

Modes of Production and Archaeology Robert M. Rosenswig, Jeremy J. Cunningham, 2017-05-15 This volume challenges the historical materialistic non capitalist modes that are used by archaeologists as not all that useful and instead considers how social labor is organized to transform nature into culturally refined and useful resources and how this can either maintain or change a culture Rather than describe what a society is using the theoretical framework of Marx and materialism a mode of production approach explores what a society does in a more dynamic sense

Contradictions of Archaeological Theory Sandra Wallace, 2012-01-30 Is current archaeological theory stuck at an impasse Sandra Wallace argues that archaeological theory has become mired as a result of logical and ontological contradictions By showing that these contradictions are a result of common underlying philosophical assumptions and fallacies this book is able to show how a fresh approach to this discipline is necessary to resolve them even if this requires re examining some of the tenants of orthodox archaeology This fresh approach is achieved by using Critical Realism as an under labourer to philosophically evaluate archaeological theory Starting by assessing the historical impact of philosophy on the discipline and then looking at

the current relationship between archaeology and the ontology of the material this book facilitates the construction of discipline specific theory by archaeologists The result is an approach to archaeology that allows both students and practitioners to free themselves from endemic contradictions and re discover their approach to archaeological theory

cultural significance to the detritus of everyday life and the inadvertent transformation of landscapes over the long term Each contributor to *Material Evidence* identifies a particular type of evidence with which they grapple and considers with reference to concrete examples how archaeologists construct evidential claims critically assess them and bring them to bear on pivotal questions about the cultural past Historians cultural anthropologists philosophers and science studies scholars are increasingly interested in working with material things as objects of inquiry and as evidence and they acknowledge on all sides just how challenging this is One of the central messages of the book is that close analysis of archaeological best practice can yield constructive guidelines for practice that have much to offer archaeologists and those in related fields
