Artificial Intelligence in Education Ido Roll, Danielle McNamara, Sergey Sosnovsky, Rose Luckin, Vania Dimitrova, 2021-06-10 This two volume set LNAI 12748 and 12749 constitutes the refereed proceedings of the 22nd International Conference on Artificial Intelligence in Education AIED 2021 held in Utrecht The Netherlands in June 2021 The 40 full papers presented together with 76 short papers 2 panels papers 4 industry papers 4 doctoral consortium and 6 workshop papers were carefully reviewed and selected from 209 submissions The conference provides opportunities for the cross fertilization of approaches techniques and ideas from the many fields that comprise AIED including computer science cognitive and learning sciences education game design psychology sociology linguistics as well as many domain specific areas The conference was held virtually due to the COVID 19 pandemic Artificial Intelligence in Education Technologies: New Development and Innovative Practices Tim Schlippe, Eric C. K. Cheng, Tianchong Wang, 2023-11-08 This book is a collection of selected research papers presented at the 2023 4th International Conference on Artificial Intelligence in Education Technology AIET 2023 held in Berlin Germany on June 30 July 2 2023 AIET establishes a platform for AI in education researchers to present research exchange innovative ideas propose new models as well as demonstrate advanced methodologies and novel systems It is a timely and up to date publication responsive to the rapid development of AI technologies practices and their increasingly complex interplay with the education domain It promotes the cross fertilisation of knowledge and ideas from researchers in various fields to construct the interdisciplinary research area of AI in Education These subject areas include computer science cognitive science education learning sciences educational technology psychology philosophy sociology anthropology and linguistics The feature of this book will contribute from diverse perspectives to form a dynamic picture of AI in Education It also includes various domain specific areas for which AI and other education technology systems have been designed or used in an attempt to address challenges and transform educational practice This timely publication is in line with UNESCO s Beijing Consensus on Artificial Intelligence and Education It is committed to exploring how AI may play a role in bringing more innovative practices transforming education and triggering an exponential leap towards the achievement of the Education 2030 Agenda Providing broad coverage of recent technology driven advances and addressing a number of learning centric themes the book is an informative and useful resource for researchers practitioners education leaders and policy makers who are involved or interested in AI and education **Artificial Intelligence in Education: The Power and Dangers of ChatGPT in the Classroom** Amina Al-Marzouqi, Said A. Salloum, Mohammed Al-Saidat, Ahmed Aburayya, Babeet Gupta, 2024-03-29 This book aims to bring together a collection of innovative and cutting edge research that addresses the various challenges in the application and theoretical aspects of ChatGPT in education ChatGPT is a large language model developed by OpenAI that has the ability to generate human like text based on a prompt This has significant potential for use in the field of education as it allows for the

creation of personalized interactive learning experiences automating assessment and grading and more In e learning ChatGPT is used to provide instant feedback and support to students as well as generate interactive conversations in the target language for language learning It is also integrated with existing learning management systems and educational technology platforms to enhance their capabilities In research ChatGPT is used for natural language processing and sentiment analysis to gather insights on student learning experiences and educational outcomes However it is important to note that there are also ethical and privacy concerns that come with using language models like ChatGPT in education such as data protection and the potential for bias Overall the use of ChatGPT in education has the potential to revolutionize the way we learn teach and access information The book seeks to publish original manuscripts that cover a broad range of topics from the development of new chatbot technologies and their integration into the classroom to the examination of the ethical and pedagogical implications of these systems By compiling the latest developments in the field and highlighting new areas for exploration this book provides valuable insights and perspectives for researchers educators and practitioners working in the field of ChatGPT and education The ultimate goal is to advance the understanding of ChatGPT and its role in education and to promote its effective and responsible use in the classroom and beyond
