Artificial Neural Networks — ICANN 2002 Jose R. Dorronsoro, 2002-08-14 The International Conferences on Artificial Neural Networks ICANN have been held annually since 1991 and over the years have become the major European meeting in neural networks This proceedings volume contains all the papers presented at ICANN 2002 the 12th ICANN conference held in August 28-30 2002 at the Escuela Técnica Superior de Informática of the Universidad Autónoma de Madrid and organized by its Neural Networks group ICANN 2002 received a very high number of contributions more than 450 Almost all papers were revised by three independent reviewers selected among the more than 240 serving at this year's ICANN and 221 papers were finally selected for publication in these proceedings due to space considerations quite a few good contributions had to be left out I would like to thank the Program Committee and all the reviewers for the great collective effort and for helping us to have a high quality conference

ICANN '94 Maria Marinaro, Pietro G. Morasso, 2012-12-06 From its early beginnings in the fifties and sixties the field of neural networks has been steadily growing The first wave was driven by a handful of pioneers who first discovered analogies between machines and biological systems in communication control and computing Technological constraints held back research considerably but gradually computers have become less expensive and more accessible and software tools increasingly more powerful Mathematical techniques developed by computer aware people have steadily accumulated and the second wave has begun Researchers from such diverse areas as psychology mathematics physics neuroscience and engineering now work together in the neural networking field

Artificial Neural Networks, 2 I. Aleksander, J. Taylor, 2014-06-28 This two volume proceedings compilation is a selection of research papers presented at the ICANN 92 The scope of the volumes is interdisciplinary ranging from the minutiae of VLSI hardware to new discoveries in neurobiology through to the workings of the human mind USA and European research is well represented including not only new thoughts from old masters but also a large number of first time authors who are ensuring the continued development of the field

ICANN '93 Stan Gielen, Bert Kappen, 2012-12-06 This book contains the proceedings of the International Conference on Artificial Neural Networks which was held between September 13 and 16 in Amsterdam It is the third in a series which started two years ago in Helsinki and which last year took place in Brighton Thanks to the European Neural Network Society ICANN has emerged as the leading conference on neural networks in Europe Neural networks is a field of research which has enjoyed a rapid expansion and great popularity in both the academic and industrial research communities The field is motivated by the commonly held belief that applications in the fields of artificial intelligence and robotics will benefit from a good understanding of the neural information processing properties that underlie human intelligence Essential aspects of neural information processing are highly parallel execution of computation integration of memory and process and robustness against fluctuations It is believed that intelligent skills such as perception motion and cognition can be easier realized in neuro computers than in a conventional computing paradigm This requires active research in neurobiology to extract computational principles from experimental neurobiological findings in physics and mathematics to study the relation between architecture and function in neural networks and in cognitive science to study higher brain functions such as language and reasoning Neural networks technology has already lead to practical methods that solve real problems in a wide area of industrial applications The clusters on robotics and applications contain sessions on various sub topics in these
