Virtual and Augmented Reality Applications in

Manufacturing S.K. Ong,A.Y.C. Nee,2013-04-17 Augmented AR and Virtual Reality VR technologies are increasingly being used in manufacturing processes These use real and simulated objects to create a simulated environment that can be used to enhance the design and manufacturing processes Virtual Reality and Augmented Reality Applications in Manufacturing is written by experts from the world s leading institutions working in virtual manufacturing and gives the state of the art of the field Features Chapters covering the state of the art in VR and AR technology and how these technologies can be applied to manufacturing The latest findings in key areas of AR and VR application to manufacturing The results of recent cross disciplinary research projects in the US and Europe showing application solutions of AR and VR technology in real industrial settings Virtual Reality and Augmented Reality Applications in Manufacturing will be of interest to all engineers wishing to keep up to date with technologies that have the potential to revolutionize manufacturing processes over the next few years

Network Security Empowered by Artificial Intelligence Yingying Chen,Jie Wu,Paul Yu,Xiaogang Wang,2024-06-25 This book introduces cutting edge methods on security in spectrum management mobile networks and next generation wireless networks in the era of artificial intelligence AI and machine learning ML This book includes four parts a Architecture Innovations and Security in 5G Networks b Security in Artificial Intelligence enabled Intrusion Detection Systems c Attack and Defense in Artificial Intelligence enabled Wireless Systems d Security in Network enabled Applications The first part discusses the architectural innovations and security challenges of 5G networks highlighting novel network structures and strategies to counter vulnerabilities The second part provides a comprehensive analysis of intrusion detection systems and the pivotal role of AI and machine learning in defense and vulnerability assessment The third part focuses on wireless systems where deep learning is explored to enhance wireless communication security The final part broadens the scope examining the applications of these emerging technologies in network enabled fields The advancement of AI ML has led to new opportunities for efficient tactical communication and network systems but also new vulnerabilities Along this direction innovative AI driven solutions such as game theoretic frameworks and zero trust architectures are developed to strengthen defenses against sophisticated cyber threats Adversarial training methods are adopted to augment this security further Simultaneously deep learning techniques are emerging as effective tools for securing wireless communications and improving intrusion detection systems Additionally distributed machine learning exemplified by federated learning is revolutionizing security model training Moreover the integration of AI into network security especially in cyber physical systems demands careful consideration to ensure it aligns with the dynamics of these systems This book is valuable for academics researchers and students in AI ML network security and related fields It serves as a resource for those in computer networks AI ML and data science and can be used as a reference or secondary textbook Virtual Reality: Visual Computation, Augmented and Mixed, I/O Interface Dr.J.Shobana,Dr.S.Nithya,Mrs.G.S.Gayathri,Mrs.H.Deepika,Dr.N.Jayashri
