Human Artificial Insemination and Semen Preservation Georges David,2012-12-06 Even though artificial insemination is a simple technique that has been practiced for over a century it has long been carried out under poor conditions due to an inadequate understanding of reproductive physiology and antagonistic socio ethical attitudes Accordingly until fairly recently it was a medical act with a limited scientific basis which was practised more or less clandestinely The development of semen preservation has totally changed the conditions of artificial insemination especially in regard to flexibility and safeguards in its application Although the use of fresh semen continues it is now clear that the future of artificial insemination is closely linked to semen preservation During the past two decades semen banks have been developed in many countries This has most often been the result of the initiative of individual physicians in either the private or public sectors In France a national system of semen banks CECOS was begun in 1973 Although there has been cooperation within this system in the areas of both research and management a need to communicate and compare experiences with those from other countries was perceived Thus the first International Symposium on Artificial Insemination and Semen Preservation was planned and held in Paris France in April 1979 Thirty seven countries were represented by individuals from many concerned disciplines

Legal and Ethical Issues for Health Professionals George D. Pozgar,2005 Legal and Ethical Issues for Health Professionals is a guide to aid in the resolution of ethical dilemmas with legal implications This comprehensive reference provides both the student and practicing health care professional with an overview of the ethical and legal issues that face health care providers today The reader will better understand ethical dilemmas and learn how to evaluate and distinguish between the rightness and wrongness of alternative courses of action when faced with complicated problems to solve
