Artistic Integration In Gothic Churches:

Artistic Integration in Gothic Buildings Virginia Chieffo Raguin, Kathryn Brush, Peter Draper, 1995-01-01 In this collaborative work seventeen international scholars use contemporary methodologies to address the ways in which we understand Gothic church buildings today *Artistic Integration in Gothic Buildings* discusses major monuments that have traditionally stood at the core of medieval art historical studies the cathedrals of Durham Wells Chartres Reims Poitiers Strasbourg and Naumburg the abbey of Saint Denis and the Sainte Chapelle of Paris The contributors approach the subject from different specialties and methodologies within the field of art history as well as from the disciplines of history liturgical studies and theology Willibald Sauerl nder s overview acknowledges that since the early nineteenth century scholars have been confronted with monuments that no longer perform their original functions The moment of the creation of these great cages of stone filled with images in metal paint glass stone and textiles has passed as surely as Villon s snows of yesteryear Artistic intentions shifted continuously over the centuries as these great buildings were adapted to new situations historical cultural and religious Once the settings for complex and diversified rituals of religious social and political dimensions the buildings today stand in a completely different time frame and are experienced by a different audience This volume addresses the hermeneutics of the development of scholarship concerning the Gothic church reviewing the variable but largely exclusive agendas from the early nineteenth century to the present including those of Viollet le Duc Lef vre Pontalis M le Sedlmayr Von Simson Panofsky Grodecki and Bony The conclusion is that there is no way to return to the original Gothic cathedral or the original audience *Artistic Integration in Gothic Buildings* reassesses the traditional canon through a new pluralism of approaches and presents the Gothic church as an intricate and complex living monument that has been evolving over eight centuries and more

Gothic Architecture Paul Frankl, Paul Crossley, 2000-01-01 This magisterial study of Gothic architecture traces the meaning and development of the Gothic style through medieval churches across Europe Ranging geographically from Poland to Portugal and from Sicily to Scotland and chronologically from 1093 to 1530 the book analyzes changes from Romanesque to Gothic as well as the evolution within the Gothic style and places these changes in the context of the creative spirit of the Middle Ages In its breadth of outlook its command of detail and its theoretical enterprise Frankl s book has few equals in the ambitious Pelican History of Art series It is single minded in its pursuit of the general principles that informed all aspects of Gothic architecture and its culture In this edition Paul Crossley has revised the original text to take into account the proliferation of recent literature books reviews exhibition catalogues and periodicals that have emerged in a variety of languages New illustrations have also been included

Invisible Cathedrals Neil H. Donahue, 1995 *Invisible Cathedrals* places Wilhelm Worringer in the foreground of discussions of Expressionism and German Modernism for the first time These essays not only reveal the complexities of his individual works such as *Abstraction and Empathy* 1908 and *Form Problems of the Gothic* 1911 they also examine his lesser known books and essays of the post World War I years the 1920s

and beyond *Invisible Cathedrals* offers both a basic introduction to Worringer's writings and their broad influence and a profound and detailed revisionist analysis of his significance in German and European Modernism. It also provides the most comprehensive bibliography to date of his own work and of the scattered criticism devoted to Worringer in different disciplines. Worringer's works were provocative, widely read, and often reprinted, and were highly influential among artists and writers in Germany. As a result, they both raised suspicion in his own academic discipline of art history and excited discussion in other diverse fields such as literary and social theory, psychology, and film theory. Worringer emerges here not solely as a scholarly commentator on the history of art but also as an activist scholar who engaged his historical criticism of other periods directly in the production of culture in his own time. Contributors are Magdalena Bushart, Neil H. Donahue, Charles W. Haxthausen, Michael W. Jennings, Joseph Masheck, Geoffrey Waite, and Joanna E. Ziegler.

Medieval Architecture Nicola Coldstream, 2002. Medieval architecture comprises much more than the traditional image of Gothic cathedrals and the castles of chivalry. A great variety of buildings, synagogues, halls, and barns testify to the diverse communities and interests in western Europe in the centuries between 1150 and 1550. This book looks at their architecture from an entirely fresh perspective, shifting the emphasis away from such areas as France towards the creativity of other regions, including central Europe and Spain. Treating the subject thematically, Coldstream seeks out what all buildings, both religious and secular, have in common and how they reflect the material and spiritual concerns of the people who built and used them. Furthermore, the author considers how and why, after four centuries of shaping the landscapes and urban patterns of Europe, medieval styles were superseded by classicism.

New Approaches to Medieval Architecture Robert Bork, William W. Clark, Abby McGehee, 2016-12-05. This collection of essays presents the exciting and innovative work being done in the field of medieval architectural history by scholars affiliated with AVISTA, one of the most active sponsors of such research in the Anglo-American scholarly community. These studies constitute a snapshot of the range of new interpretive strategies being deployed by researchers in the reassessment of previous scholarship and identification of new modes of inquiry. In recent years, the study of medieval architecture has been transformed by the emergence of new critical perspectives and new technologies. The contributors to this book are among those at the forefront of these developments. Several of the essays present dramatic reinterpretations of canonical monuments, including the Abbey of Saint Denis, Beauvais Cathedral, and Notre Dame in Paris. Others consider broader methodological issues, such as the applications of geometry, workshop practice, and the shaping of historical narratives. Still others demonstrate how high-tech scanning and visualization methods can enhance our understanding of construction methods and the behavior of buildings. The publication of this collection of pioneering essays should foster further exploration by clarifying the state of research, by establishing specific historical arguments, and by providing models of inquiry to inspire emerging scholars.
