As I Was Saying, Volume 1 Colin Rowe, 1999-08-18 Colin Rowe has achieved legendary status as one of a handful of outstanding studio teachers of architecture and urban design to emerge within the last two generations. His writings reveal the powerful insight and dispassionate authoritative intelligence that mark him as one of the preeminent architectural thinkers of this perplexing half century. Divided into three volumes in more or less chronological order, *As I Was Saying* includes articles, essays, eulogies, lectures, reviews, and memoranda. Some appeared only in obscure journals and many are published here for the first time.

Radical Pedagogies Beatriz Colomina, Ignacio G. Galán, Evangelos Kotsioris, Anna-Maria Meister, 2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice. In the decades after World War II, new forms of learning transformed architectural education. These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms, decentered building, imagined new roles for the architect, and envisioned participatory forms of practice. Although many of the experimental programs were subsequently abandoned, terminated, or assimilated, they nevertheless helped shape and in some sense define architectural discourse and practice. This book explores and documents these radical pedagogies and efforts to defy architecture's status quo. The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa; a movement to design for every body, including the disabled; by architecture students and faculty at the University of California Berkeley; the founding of a support network for women interested in the built environment regardless of their academic backgrounds; and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design. Viewed through their dissolution and afterlife as well as through their founding stories, these projects from the last century raise provocative questions about architecture's role in the new century.

The Architecture of Ruins Jonathan Hill, 2019-03-25 The Architecture of Ruins: Designs on the Past, Present, and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty-first century.

in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change *Choice* ,1999 *T&L*, *the Times Literary Supplement* ,1996 *The Publishers' Trade List Annual* ,1995 *Journal of the Society of Architectural Historians* Society of Architectural Historians,1999 Includes special issues **The Architects' Journal** ,1996-07

Trajectories in Architecture Michael Jasper,2023-04-21 *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture s recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture s traditions and design principles and their future expression *Trajectories in Architecture*
