Massive Resistance and Southern Womanhood Rebecca Brückmann, 2021-01-01 Massive Resistance and Southern Womanhood offers a comparative sociocultural and spatial history of white supremacist women who were active in segregationist grassroots activism in Little Rock New Orleans and Charleston from the late 1940s to the late 1960s Through her examination Rebecca Brückmann uncovers and evaluates the roles actions self understandings and media representations of segregationist women in massive resistance in urban and metropolitan settings Brückmann argues that white women were motivated by an everyday culture of white supremacy and they created performative spaces for their segregationist agitation in the public sphere to legitimize their actions While other studies of mass resistance have focused on maternalism Brückmann shows that women's invocation of motherhood was varied and primarily served as a tactical tool to continuously expand these women's spaces Through this examination she differentiates the circumstances tactics and representations used in the creation of performative spaces by working class middle class and elite women engaged in massive resistance Brückmann focuses on the transgressive street politics of working class female activists in Little Rock and New Orleans that contrasted with the more traditional political actions of segregationist middle class and elite women in Charleston who aligned white supremacist agitation with long standing experience in conservative women's clubs including the United Daughters of the Confederacy and the Daughters of the American Revolution Working class women's groups chose consciously transgressive strategies including violence to elicit shock value and create states of emergency to further legitimize their actions and push for white supremacy

Abiotic Stresses in Field Crops: Response, Impacts and Management under Climate Change Scenario Aliza Pradhan, Kamal Krishna Pal, Mahesh Kumar, Ashim Datta, Milan Kumar Lal, Md Khairul Alam, Basavaraj P. S., 2025-01-17 Agriculture is globally challenged by adverse environmental factors including drought heat waterlogging cold soil salinity and sodicity nutrient deficiency heavy metal contamination and other edaphic stresses These stresses impair plant functioning at multiple levels limiting plant development and crop productivity In the current climate change scenario the increase in frequency and intensity of these stresses is posing a serious threat to overall food and nutrition security Plants respond to these stresses through several tolerance mechanisms operating at molecular biochemical physiological or morpho anatomical levels depending on their developmental stage and type of species The cope up strategy also differs depending on abiotic stress type duration and intensity The extent to which these changes occur to counteract the impact of abiotic stresses as well as the pathways involved in plant acclimation is not fully understood An advance in understanding

agricultural crops adaptation and tolerance mechanisms underlying trans generational effects epigenetic changes and stress memory will significantly help in comprehending the implications as well as devising mitigation strategies for sustainable agriculture and thus food security Additionally it is crucial to understand the interactions and impacts of combined stresses to efficiently advance the development of combined stress tolerant crops as well as devising mitigation strategies for various climatic stressors

Worrell,Tammy L. Hughes,Dante D. Dixon,2020-09-17 Practice books are often simple how to lists or straightforward recipes and the practitioner still does not know why the activity is related to the outcome they seek In essence they lose how the specifics of the practice are related to the theory of change or the theory of how the problem developed in the first place This leads to practitioners potentially removing crucial elements of best practice procedures when making modifications to tackle new or different problems in an unfamiliar context By understanding the theoretical underpinnings practitioners can better plan for adjustments because they know how the outcomes they seek are informed by the theory Engagingly written and perfect for day to day use this book translates state of the art research and interdisciplinary theory into practical recommendations for those working with children and adolescents Intelligent and Fuzzy Techniques: Smart and Innovative Solutions Cengiz Kahraman,Sezi Cevik Onar,Basar Oztaysi,Irem Ucal Sari,Selcuk Cebi,A.
