Asian Bureaucratic Systems Emergent from the British Imperial Tradition Ralph J. D. Braibanti, 1966 Asian Bureaucratic Systems Ralph Braibanti, 1968 **The Emergence Of Modern Southeast Asia** Norman G. Owen, 2005-01-01

Malaysia R.S. Milne, K.J. Ratnam, 2014-01-14 First Published in 1974 Throughout this title two interweaving and interacting themes are apparent One is the changes resulting from the increasingly important role of politics and politicians in states which until 1963 had been colonies Politics is as it were superimposed on administration The other is the impact of the Federal Government From 1963 onwards Sarawak and Sabah were changing because they

were new states A short bibliography includes a section on Malaya Malaysia which is necessary because this book studies a rather unusual form of the problem of political development as Sarawak and Sabah are not independent countries

State Dominance in Myanmar Tin Maung Maung Than,2007 Focuses on the state s efforts to industrialize Myanmar first through direct intervention and planning under a socialist economic framework as interpreted by the state leaders 1948 88 and lately 1989 onwards through state managed outward orientation Managing Development in a Globalized World

Habib Zafarullah,Ahmed Shafiqul Huque,2017-09-25 Traditionally development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations However historically eclectic ideas and approaches often clash with existing long established notions of progress and modes of realizing social and economic change Managing Development in a Globalized World Concepts Processes Institutions explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries It underscores development as a continuous process that must be supported by sound policies and efficient management supplying a wider understanding of the field The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal external actors and a host of stakeholders An exploration of key sectors in development provides clear comprehension of problems and solutions A careful synthesis of theoretical conceptual and empirical literature the book assesses real world situations and provides insight into the operational dynamics of development policies programs and institutions It focuses on goals values and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter regional and inter institutional synergies It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society *The Politics of Bureaucracy* B.Guy Peters,2014-05-30 This exploration of the political and policy making roles of public bureaucracies offers comparative analysis of the effects of politics on bureaucracy including international case studies on North America Western and Eastern European and Asian countries discussion of how governments have been developing strategies to enhance co ordination and coherence across their programmes analysis of the use of performance management in public administration and revision and updating to take into account new literature that has emerged in recent years

including a discussion of E Governance and analysis of new public management Handbook of Administrative History Jos Raadschelders, 2017-07-05 Public administration is commonly assumed to be a young discipline rooted in law and political science with little history of its own Likewise teaching and scholarship in this field is often career oriented and geared either toward the search for immediately usable knowledge or guidelines and prescriptions for the future Although most administrative scientists would acknowledge that their field has a history their time horizon is limited to the recent past Raadschelders demonstrates that public administration has in fact a long standing tradition both in practice and in writing administration has been an issue ever since human beings recognized the need to organize themselves in order to organize the environment in which they lived This history in turn underlines the need for administrators to be aware of the importance and contemporary impact of past decisions and old traditions In seeking to go beyond the usual problem solving and future oriented studies of public administration this volume adds greatly to the cognitive richness of this field of research Indeed the search for theoretical generalizations will profit from an approach that unravels long term trends in the development of administration and government Raadschelders approaches public administration history from a dual perspective as trained historian and professor of public administration The volume is appropriately called a handbook in view of its methodical listing of the literature on administrative history together with summaries of numerous authors principal theories The second chapter is an essay on sources in the field including an extended bibliography These parts of the book alone make it useful to scholars in the field Raadschelders is helpful in other ways as well The third and fourth chapters offer a highly sophisticated discussion of methodological problems encountered in writing administrative history including the issue of perceiving stage
