## **Asian Development Outlook 1997 And 1998:**

*Asian Development Outlook 2014* Asian Development Bank, 2014-04-01 The Asian Development Outlook 2014 projects that developing Asia's growth will increase from 6.1% in 2013 to 6.2% in 2014 and 6.4% in 2015. Moderating growth in the People's Republic of China as its economy adjusts to more balanced growth will offset to some extent the stronger demand expected from the industrial countries as their economies recover. Risks to the outlook have eased and are manageable. The monetary policy shift in the United States may invite some volatility ahead in financial markets albeit mitigated by accommodative monetary policy in Japan and the euro area. The regional growth outlook depends on continued recovery in the major industrial economies and on the People's Republic of China managing to contain internal credit growth smoothly. Widening income gaps in developing Asia strengthens the case for greater use of fiscal policy to foster equality of opportunity. While the region has benefited from fiscal prudence in the past, demographic and environmental challenges are expected to compete for public resources in the coming years. To boost public spending on equity enhancing programs such as education and health without undermining fiscal sustainability, the authorities will need to explore a wide range of options for mobilizing revenue and to build equity objectives into their fiscal plans. Asian Development Outlook 1997 and 1998 Asian Development Bank, 1997 This is the current edition of the Asian Development Bank's annual survey of the progress made by its developing country members in Asia and the Pacific. First published in 1989, the Outlook provides a thorough yet succinct summary of recent economic developments and current issues. Economic trends and medium term prospects for the region are viewed against a background of development in the world economy. Asian Development Outlook, 2018 Asian Development Outlook 2012 Asian Development Bank, 2012-04-01 Despite weak global demand, the Asian Development Outlook 2012 expects that developing Asia will largely maintain its growth momentum in the next couple of years in an environment of easing inflation for most regional economies, although policy makers must be alert to further oil price spikes arising from threats of oil supply disruptions. The report sees that the greatest risk to the outlook is the uncertainty surrounding the resolution of sovereign debt problems in the eurozone. Still, in the absence of any sudden shocks, developing Asia can manage the effects on its trade flows and financial markets. *South Asian Economic Development* Moazzem Hossain, Iyanatul Islam, Reza Kibria, 1999 The notion that South Asian economies have tended to be less successful than those of East Asia is critically examined and the reasons why discussed. Countries covered include Pakistan, India, Bangladesh, and Sri Lanka. Key issues examined: agriculture and rural development, labour market and human resource development, trade and industry policies, foreign investment and technological capabilities, foreign aid and economic development, financial development and economic performance, poverty, inequality and economic development, regional economic co-operation, green development. **Liberalization, Growth, and the Asian Financial Crisis** Mohamed Ariff, Ahmed M. Khalid, 2000-01-01 This work examines the effects of financial liberalization of the more advanced economies in Southeast Asia and analyses the

degree to which emerging and transitional economies in East and South Asia can benefit from this example [Asian Development Outlook 2012 Update](#) Asian Development Bank,2012-10-01 According to the findings in the Asian Development Outlook 2012 Update dimming global growth prospects and soft domestic demand in the region's two largest economies are slowing the pace of developing Asia's expansion Growth is now expected to slide from 7.2% in 2011 to 6.1% in 2012 with a bounce back to 6.7% in 2013 The possibility of a shock emanating from the unresolved euro area sovereign debt crisis or a sharp fiscal contraction in the United States pose the biggest downside risks to the economy Fortunately most developing Asian economies have room to counteract such shocks with fiscal and monetary policy However there is currently no regionwide need for countercyclical policy intervention [Asian Development Outlook 2013 Update](#) Asian Development Bank,2013-10-01 The Asian Development Outlook 2013 Update looks at governance in developing Asia Even as the region energetically closes its income gap with advanced economies a wide gap in governance remains Yet governance is key to sustaining development momentum and improving public service delivery can be an entry point for better governance

*Asian Development Outlook 2015* Asian Development Bank,2015-03-01 The Asian Development Outlook 2015 projects that developing Asia will grow at a steady 6.3% in 2015 and 2016 supported by a strengthening recovery in the major industrial economies and soft global commodity prices The drop in international oil prices is taking pressure off of consumer prices Inflation will slow from 3.1% in 2014 to 2.6% in 2015 As low oil prices are supporting growth in developing Asia a sudden sharp reversal could undermine the outlook and require policy response Similarly while capital inflows to the region have been beneficial for growth policy makers must carefully manage credit expansion to ensure that it does not lead to excessive leverage and asset price bubbles Developing Asia needs a deep robust financial sector to sustain growth Policy makers will be challenged to ensure that financial sector development is inclusive providing broad access to households and firms Financial stability must also be maintained to enhance growth and equity [Asian Development Outlook 2011 Update](#) Asian Development Bank,2011-09-01 The Asian Development Outlook 2011 Update expects developing Asia to sustain its robust growth over the next 2 years despite the tepid outlook for the United States the eurozone and Japan The region will be buttressed by healthy domestic demand and buoyant intraregional trade Managing inflation has to be a key focus for policy makers to allow for inclusive growth Such growth includes the elderly who are all too often left behind as Asia's traditional family networks weaken As the elderly will form an ever larger share of the region's population over the next few decades states will have to ensure their economic security and meet the wider economic implications for society *The End of the Asian Model?* Holger Henke,Ian Boxill,2000-03-15 With the economic crisis in Asia which unfolded in recent years the development model on which the phenomenal earlier success of several countries in the region was built requires increasing scrutiny This anthology questions the validity of the notion promoted by some observers and international financial organizations that there is a universally applicable model of industrialization common to Asian countries A number of senior

and highly regarded Asia specialists are taking a critical look at the various development experiences of several and some often neglected Asian countries and evaluate their experiences in a comparative perspective Comparing the analyses of countries such as Mongolia the Pacific Islands or Sri Lanka with Singapore South Korea and other countries of the region leads the editors of this volume to the conclusion that the fashionable talk about a model is not justified and that the picture is much more complex

**East Asian Labor Markets and the Economic Crisis** Gordon Betcherman, Rizwanul Islam, 2001 This book looks at the impacts of the Asian economic crisis on the labor market examining how various countries responded It identifies the labour policy reforms needed in areas of unemployment benefit active labour market programs support for vulnerable groups and social dialogue

Handbook on the Northeast and Southeast Asian Economies Anis Chowdhury, 2007-01-01 Provides a broad overview of economic and social developments in the countries covered Brunei Darussalam Cambodia China Hong Kong Indonesia Japan Lao Malaysia Myanmar North Korea The Philippines Singapore South Korea Taiwan Thailand Viet Nam

**U.S. Direct Investment in China** Kwok Chiu Fung, Lawrence J. Lau, Cheng Li, 2004 This book sheds light on the trends characteristics motives and policy implications of U S direct investment in China

Capital Flows Without Crisis? Dipak Dasgupta, Marc Uzan, Dominic Wilson, 2013-01-11 The last decade has seen a massive increase in international capital flows to emerging markets This development has offered opportunities to those countries that have opened themselves up to overseas capital but it has also created risks In this volume a team of policymakers and academics from 14 different countries as well as representatives of the international financial institutions primarily responsible for responding to the crises examine the challenges and options facing policymakers today The book includes both detailed analysis of individual economies from around the world and in depth analysis of the broad systemic issues of why crises occur and how we can prevent them By looking at economies from many different parts of the world the book provides a broad and comprehensive look at the similarities and differences in recent financial crises

Development Centre Seminars Achieving Financial Stability in Asia OECD, Asian Development Bank, 2000-06-28 Achieving Financial Stability in Asia sets out to identify the elements which could restore confidence to the countries of the region and stabilise financial flows on a global basis Thus measures must be taken which include improving public and

Asian Development Outlook 2010 Update Asian Development Bank, 2010-09-01 The Asian Development Outlook 2010 Update provides recent economic forecasts for countries in the region Since the release of the ADO2010 in April this year developing Asia s performance has strengthened further This Update raises the 2010 growth forecast to 8.2% on the back of strong results in the first half of the year

Revolution, Reform and Regionalism in Southeast Asia Ronald Bruce St John, 2006-01-16 Based on research carried out over the three decades this book compares the post war political economies of Cambodia Laos and Vietnam in the context of their individual and collective impact on contemporary efforts at regional integration The author highlights the different paths to reform taken by the three neighbours and the effect this has had on regional plans for

economic development through the ASEAN and the Greater Mekong Subregion Through its comparative analysis of the reforms implemented by Cambodia Laos and Vietnam over the last thirty years the book draws attention to parallel themes of continuity and change The author discusses how the three states have demonstrated related characteristics whilst at the same time making different modifications in order to exploit the unique strengths of their individual cultures Contributing to the contemporary debate over the role of democratic reform in promoting economic development the book provides a detailed account of the political economies of three states at the heart of Southeast Asia Lessons from the Asian Financial Crisis Richard Carney,2009-01-13 The contributors provide an overview of developments in the affected countries during the 1997 Asian financial crisis lessons learned and corrective measures taken lessons learned by regional and international actors how domestic regional and international politics have affected the outcomes the identification of potential future problems and levels of preparedness **Economic Developments In India : Monthly Update, Volume -28 Analysis, Reports, Policy Documents** Editors : Raj Kapila & Uma Kapila,2000
