Allies Adversaries And International Trade:

Allies, Adversaries, and International Trade Joanne Gowa, 2020-11-10 During the Cold War international trade closely paralleled the division of the world into two rival political military blocs NATO and GATT were two sides of one coin the Warsaw Treaty Organization and the Council for Mutual Economic Assistance were two sides of another In this book Joanne Gowa examines the logic behind this linkage between alliances and trade and asks whether it applies not only after but also Allies, Adversaries, and International Trade Joanne S. Gowa, 1993 The Oxford Handbook of the Political Economy of International Trade Lisa L. Martin, 2015 The Oxford Handbook of the Political Economy of International Trade presents the most up to date review of scholarship in this field Building on an understanding of the economic interests that drive international trade political scientists integrate theories of domestic society domestic institutions and international organizations to further our understanding of this vital force of globalization This volume both surveys established theory and showcases cutting edge research Neoclassical Realist Theory of International Politics Norrin M. Ripsman, Jeffrey W. Taliaferro, Steven E. Lobell, 2016 Neoclassical realism is a major theoretical approach to the study of foreign policy In Neoclassical Realist Theory of International Relations Norrin M Ripsman Jeffrey W Taliaferro and Steven E Lobell argue that it can explain and predict a far broader range of political phenomena in international politics Neoclassical realism challenges other approaches including structural realism liberalism and constructivism Power and the Governance of Global Trade Soo Yeon Kim, 2011-02-23 In Power and the Governance of Global Trade Soo Yeon Kim analyzes the design evolution and economic impact of the global trade regime focusing on the power politics that prevailed in the regime and shaped its distributive impact on global trade Using documents now available from the archives of the General Agreement on Tariffs and Trade GATT Kim examines the institutional origins and critical turning points in the evolution of the GATT as well as preferences of the lesser powers of the developing world that were the subject of heated debate over the International Trade Organization ITO which failed to materialize Using quantitative analysis Kim assesses the impact of the global trade regime on international trade and finds that the rules of trade forged by the great powers resulted in a developmental divide in which industrialized countries benefited from trade expansion but developing countries reaped far fewer gains The findings indicate that a successful conclusion to the Doha Round of the World Trade Organization WTO is urgently needed to mitigate the developmental divide by increasing trade between the industrialized and developing worlds Kim offers a timely reading of the GATT WTO system as a way to think about how trade and globalization more broadly may be governed in this post Cold War century as the global economy contends with a new geopolitical configuration featuring rising powers from the developing world Important trading nations such as China India and other emergent actors in the G 20 countries Kim argues reflect the new power politics that will shape the course of global trade governance in the years to come Discriminatory Clubs Christina L. Davis, 2023-07-18 The discriminatory logic at the heart of multilateralism

Member selection is one of the defining elements of social organization imposing categories on who we are and what we do Discriminatory Clubs shows how international organizations are like social clubs ones in which institutional rules and informal practices enable states to favor friends while excluding rivals Where race or socioeconomic status may be a basis for discrimination by social clubs geopolitical alignment determines who gets into the room to make the rules of global governance Christina Davis brings together a wealth of data on membership provisions for more than three hundred organizations to reveal the prevalence of club style selection on the world stage States join organizations to deepen their association with a particular group of states most often their allies and for the gains from policy coordination Even organizations that claim to be universal to target narrow issues or to cover geographic regions use club style admission criteria Davis demonstrates that when it comes to the most important decision of cooperation who belongs to the club and who doesn't geopolitical alignment can matter more than the merits or policies of potential members With illuminating case studies ranging from nineteenth century Japan to contemporary Palestine and Taiwan Discriminatory Clubs sheds light on how for global and regional organizations such as the WTO and the EU alliance ties and shared foreign policy positions form the basis of cooperation EU and US Foreign Economic Policy Responses to China Joachim Schild, Dirk Schmidt, 2023-12-19 This book examines EU and US bilateral trade and investment relations with China their attempts to level the economic playing field and to narrow the reciprocity gap in market openness It explores the extent of EU and US policy change the underlying factors accounting for this change and compares EU and US foreign economic policy answers to an adversary increasingly perceived as an unfair economic competitor and as a systemic rival The book covers a broad range of policy areas from trade wars trade defense instruments their reform and use investment screening and export control to industrial policies It makes eclectic use of different strands of International Relations International Political Economy and Policy Analysis theorizing to account for the extent of and differences in the EU and US responses The People's Republic of China's stellar economic and political rise combined with the resilience of its unfair trade practices its reinforced authoritarian repression at home and its ever more assertive foreign economic policy has triggered a shift in perceptions of China followed by equally profound policy change in the European Union and the US This book expertly charts and explains this significant shift in stance This book will be of key interest to scholars students and practitioners in the fields of EU trade policymaking US foreign foreign economic policy EU China US economic relations European political economy and more broadly to European studies Asian studies International Relations International Political Economy and transatlantic relations

Millennial Reflections on International Studies Michael Brecher, Frank P. Harvey, 2009-12-22 Collection of essays that debate the question of progress in the discipline **Realism and Institutionalism in International Studies** Michael Brecher, Frank P. Harvey, 2009-12-11 Realism and Institutionalism in International Studies represents a unique collection of original essays by foremost scholars in the field of International Studies Six essays advocate critique or revise Realism the

theoretical paradigm that explains international politics by emphasizing security competition and war among states The remaining four essays address Institutionalism the paradigm that offers explanations for the formation maintenance variation and significance of international institutions. The authors reflect on the strengths and weaknesses of these approaches and suggest research agendas for the future Together this volume provides an accessible and wide ranging survey of the issues concerning two major paradigms in International Studies This volume will be of interest to scholars and students alike and will undoubtedly determine the shape of future research Power Plays Allison Carnegie, 2015-09-09 Power Plays argues that international institutions prevent extortion in some areas but cause states to shift coercive behavior into less effective New Dimensions in Regional Integration Jaime De Melo, Arvind Panagariya, 1995 Interest in regional policy domains integration has recently revived in both developed and developing countries The US has responded to the lack of progress in the Uruguay Round of the GATT by pursuing bilateral trade negotiations while developing countries have been prompted to re evaluate the potential benefits of regional integration. The tendency for the world trading system to divide into three blocs the European Community the Americas and East Asia is providing their members with guaranteed access to large markets however poor non member countries will suffer from the loss of access and the risk of trade wars is increased In this book leading international experts assess the renewed attractiveness of regional integration to individual countries the types of integration that are suitable to various circumstances the conditions necessary to their success and the relationship of regionalism to multilateral free trade Making Financial Globalization Clara Park, 2024 In Making Financial Globalization Clara Park challenges the conventional wisdom that finance has always been global Drawing on original datasets of financial trade restrictions and domestic financial regulations in over 100 countries archival research of international negotiations and case studies of the US and China Park details how financial firms used multilateral lobbying strategies to create an international framework for financial service liberalization A novel political economic explanation for financial globalization this timely book challenges state centric views in international relations and emphasizes the interplay of firms and politics as a central factor shaping financial globalization *Power Ties* Paul A. Papayoanou, 1999 Discusses the impact of economic integration on the likelihood of war or peace The Political Economy of International Trade Edward D Mansfield, 2015-07-03 This volume includes many of Edward D Mansfield's contributions to research on the political economy of trade Among the topics addressed are the effects of power relations and international economic institutions on trade flows the influence of domestic politics on trade policy the factors that shape the mass public s attitudes toward trade and the determinants of the formation and expansion of international trade agreements The Political Economy of International Trade is an essential reference for scholars and graduate students interested in the international political economy Contents Systemic Approaches to the International Trading System The Concentration of Capabilities and International TradePower Politics and International TradeAlliances Preferential Trading Arrangements and International

Weingast, Donald A. Wittman, 2006 Over its lifetime political economy has had different meanings. This handbook views political economy as a synthesis of the various strands of social science treating it as the methodology of economics applied to the analysis of political behaviour and institutions Handbook of Defense Economics Keith Hartley, Todd Sandler, 1995 This handbook examines the state of defence economics covering theoretical analysis econometric techniques and policy issues The chapters fall into two categories surveys and conceptual studies The Middle East in Global Change Laura Guazzone, 2016-07-27 What are the prospects of the Middle East region moving from a warfare to a welfare A group of leading scholars of the MIddle East and North Africa political scientists economists sociologists strategic analysts and historians adopt a common political economy approach to answer this much debated question *Of Empires and Citizens* Amaney A. Jamal, 2012-09-09 In the post Cold War era why has democratization been slow to arrive in the Arab world This book argues that to understand support for the authoritarian status quo in parts of this region and the willingness of its citizens to compromise on core democratic principles one must factor in how a strong U S presence and popular anti Americanism weakens democratic voices Examining such countries as Jordan Kuwait Morocco Palestine and Saudi Arabia Amaney Jamal explores how Arab citizens decide whether to back existing regimes regime transitions and democratization projects and how the global position of Arab states shapes people s attitudes toward their governments While the Cold War s end reduced superpower hegemony in much of the developing world the Arab region witnessed an increased security and economic dependence on the United States As a result the preferences of the United States matter greatly to middle class Arab citizens not just the elite and citizens will restrain their pursuit of democratization rationalizing their backing for the

status quo because of U S geostrategic priorities Demonstrating how the preferences of an international patron serve as a constraint or an opportunity to push for democracy Jamal questions bottom up approaches to democratization which assume that states are autonomous units in the world order Jamal contends that even now with the overthrow of some autocratic Arab regimes the future course of Arab democratization will be influenced by the perception of American reactions Concurrently the United States must address the troubling sources of the region s rising anti Americanism Globalization and Free Trade Natalie Goldstein, 2010-06-23 Outlines the history of the expansion and globalization of national economies and explains how globalization evolved to its present state **Deutsche Mark Diplomacy** Randall E. Newnham, 2009-03-02 Whether economic sanctions work at all and how they work if they do are questions that have long been debated by scholars of international relations Using a new analytic approach which distinguishes between positive and negative sanctions and between specific and general sanctions this book aims both to demonstrate the importance of economic linkage and to explain the variety of forms it can take Deutsche Mark Diplomacy draws support for its theoretical arguments from a careful study of Germany's efforts to gain political leverage over Russia via economic means from 1870 into the 1990s Focusing on two major powers over a long period during which regimes changed and issues varied Randall Newnham finds strong evidence to show that positive forms of linkage such as foreign aid and trade or credit incentives are more effective than negative types such as embargoes His book significantly expands our understanding of the role played by economic sanctions in international politics at the same time that it offers a more systematic way of explaining German foreign policy
