**British Naturalists in Qing China** Fa-ti FAN, Fa-ti Fan, 2009-06-30 In the eighteenth and nineteenth centuries Western scientific interest in China focused primarily on natural history Prominent scholars in Europe as well as Westerners in China including missionaries merchants consular officers and visiting plant hunters eagerly investigated the flora and fauna of China Yet despite the importance and extent of this scientific activity it has been entirely neglected by historians of science This book is the first comprehensive study on this topic In a series of vivid chapters Fa ti Fan examines the research of British naturalists in China in relation to the history of natural history of empire and of Sino Western relations The author gives a panoramic view of how the British naturalists and the Chinese explored studied and represented China's natural world in the social and cultural environment of Qing China Using the example of British naturalists in China the author argues for reinterpreting the history of natural history by including neglected historical actors intellectual traditions and cultural practices His approach moves beyond viewing the history of science and empire within European history and considers the exchange of ideas aesthetic tastes material culture and plants and animals in local and global contexts This

compelling book provides an innovative framework for understanding the formation of scientific practice and knowledge in cultural encounters Table of Contents Acknowledgments Introduction I The Port 1 Natural History in a Chinese Entrep t 2 Art Commerce and Natural History II The Land 3 Science and Informal Empire 4 Sinology and Natural History 5 Travel and Fieldwork in the Interior Epilogue Appendix Selected Biographical Notes Abbreviations Notes Index Fa ti Fan s study of the encounter between the British culture of the naturalist and the Chinese culture of the Qing is both a delight and a revelation The topic has scarcely been addressed by historians of science and this work fills important gaps in our knowledge of British scientific practice in a noncolonial context and of Chinese reactions to Western science in the eighteenth and nineteenth centuries In addition to the culture of Victorian naturalists and Sinology Fan shows an admirable grasp of visual representation in science Chinese taxonomic schemes Chinese export art British imperial scholarship and journeys of exploration His treatment of the China trade and descriptions of Chinese markets and nurseries are especially welcome I learned a great deal and I strongly recommend this book Philip Rehbock author of *Philosophical Naturalists Themes in Early Nineteenth Century British Biology* By focusing on the experiences of British naturalists in China during a time when it was gradually being opened up to foreign influences Fan makes at least two important contributions to history of science He gives us an authoritative study of British naturalists in China as far as I know the only one of its kind and he forces us to rethink some of our categories for doing history of science including how we conceive of the relationship between science and imperialism and between Western naturalist and native Fan s scholarship is meticulous with careful attention to detail and his prose is clear controlled and succinct Bernard Lightman editor of *Victorian Science in Context Catalogue of the Asiatic Library of Dr. G.
