**Altered Loves** T. E. Apter, 1990-01-01 Examines the mother daughter relationship during adolescence discusses how mothers influence their daughters behavior and looks at the role of adolescence in the development of personality Altered Loves Terri Apter, 1996-06-06 Are mothers jealous of their developing daughters Is an early mother child bond severed during adolescence and never formed again What does adolescence feel like to a girl Drawing on detailed interviews with mothers and daughters from Terri Apter s research in Great Britain and America and from recent psychological studies of family interaction *Altered Loves* is a frank moving and insightful examination of this crucial time in a woman s life Apter shows that contrary to the classical view of adolescence as a stage in which daughters reject their mothers adolescent daughters often remain strongly attached to them The strife that characterizes this period is actually the result of trying to renegotiate a valued relationship Beautifully written *Altered Loves* explodes conventional myths and theories about mother daughter relationships and offers new and valuable insights that will help mothers remember and daughters understand the delicate painful and complex process of becoming a woman **Altered Loves** Terri Eve Apter, 1990 *Altered Loves* Terri

**Mothering** KMG Schreurs, L. Woerton, J. van Mens-Verhulst, 2003-09-02 First published in 1993 Routledge is an imprint of Taylor Francis an informa company *The Annual of Psychoanalysis, V. 32* Jerome A. Winer, James W. Anderson, 2013-05-13

*Psychoanalysis and Women* Volume 32 of *The Annual of Psychoanalysis* is a stunning reprise on theoretical developmental and clinical issues that have engaged analysts from Freud on It begins with clinical contributions by Joyce McDougall and Lynne Layton two theorists at the forefront of clinical work with women Jessica Benjamin Julia Kristeva and Ethel Spector Person from their respective vantage points all engage the issue of passivity which Freud tended to equate with femininity

Employing a self psychological framework Christine Kieffer returns to the Oedipus complex and sheds new light on the typically Pyrrhic oedipal victory of little girls Section III broadens the historical context of contemporary theorizing about women by offering the personal reminiscences of Nancy Chodorow Carol Gilligan Brenda Solomon and Malkah Notman A final section dedicated to women who shared psychoanalysis features historical essays on Ida Bauer Freud's Dora Anna Freud Dorothy Burlingham Edith Jacobson and Therese Benedek along with Linda Hopkins's revealing interview of Marion Milner Of special note is Marian Tolpin's examination of three women Bauer Helene Deutsch and Anna Freud who helped shape Freud's notion of the female castration complex and Elisabeth Young Bruehl's exploration of how two women Anna Freud and Dorothy Burlingham developed parent infant observation Psychoanalysis and Women is an extraordinary chronicle of the distance traveled since Freud characterized women's sexual life as the dark continent The contributors vitalize a half century of theory with the lessons of biography and they broaden clinical sensibilities by drawing on recent developmental gender related and socio psychological research In doing so they attest to the ongoing reconfiguration of Freud's dark continent and show the psychoanalytic psychology of women to be very much a revolution in progress Adult Personality Development Lawrence S. Wrightsman, 1994-03-15 This stimulating book and its companion volume Adult Personality Development Theories and Concepts reflect an expansion of the coverage of Wrightsman's initial book Personality Development in Adulthood The luxury of greater length has permitted an exploration of new topics including the use of a wider variety of sources including scholarly articles and books biographies and case studies Increased attention is devoted to creativity in adulthood to learning and memory to marriage stability and other topics The book provides a focus for a Psychology of Adulthood course that encourages students to look at the evolving nature of their own lives Particular attention is given to developing an extensive set of references over 700 in this volume as an aid to scholars Publisher description

*Fat Talk* Mimi Nichter, 2000-05-26 Teen aged girls hate their bodies and diet obsessively or so we hear News stories and reports of survey research often claim that as many as three girls in five are on a diet at any given time and they grimly suggest that many are at risk for eating disorders But how much can we believe these frightening stories What do teenagers mean when they say they are dieting Anthropologist Mimi Nichter spent three years interviewing middle school and high school girls lower middle to middle class white black and Latina about their feelings concerning appearance their eating habits and dieting In *Fat Talk* she tells us what the girls told her and explores the influence of peers family and the media on girls' sense of self Letting girls speak for themselves she gives us the human side of survey statistics Most of the white girls in her study disliked something about their bodies and knew all too well that they did not look like the envied hated perfect girl But they did not diet so much as talk about dieting Nichter wryly argues in fact some of the girls as much as tell her that fat talk is a kind of social ritual among friends a way of being or creating solidarity It allows the girls to show that they are concerned about their weight but it lessens the urgency to do anything about it other than diet from breakfast to lunch

Nichter concludes that if anything girls are watching their weight and what they eat as well as trying to get some exercise and eat healthfully in a way that sounds much less disturbing than stories about the epidemic of eating disorders among American girls. Black girls Nichter learned escape the weight obsession and the fat talk that is so pervasive among white girls. The African American girls she talked with were much more satisfied with their bodies than were the white girls. For them beauty was a matter of projecting attitude and moving with confidence and style. *Fat Talk* takes the reader into the lives of girls as daughters providing insights into how parents talk to their teenagers about their changing bodies. The black girls admired their mothers' strength; the white girls described their mothers' own fat talk, their fathers' uncomfortable teasing, and the way they and their mothers sometimes dieted together to escape the family curse: flabby thighs, ample hips. Moving beyond negative stereotypes of mother-daughter relationships, Nichter sensitively examines the issues and struggles that mothers face in bringing up their daughters, particularly in relation to body image, and considers how they can help their daughters move beyond rigid and stereotyped images of ideal beauty.

**Material Discourses of Health and Illness** Lucy Yardley, 2013-01-11. *Material Discourses of Health and Illness* applies discursive approaches to the field of health psychology in stark contrast to the bio-medical model of health and illness. The discursive approach uses the person's experience and feelings as the central focus of interest, whereas the more traditional models regarded these as coincidental and relatively unimportant. The book provides an accessible and compelling introduction to social constructionist and discursive approaches to those with limited previous knowledge of socio-linguistic theory and research. It provides practical examples of how these approaches can be applied to the field of health psychology with a collection of sophisticated discursive analyses which demonstrate the distinctive contribution that can be made by psychologists to a field that has been largely dominated by sociologists and anthropologists.

**Handbook of Communication and Aging Research** Jon F. Nussbaum, Justine Coupland, 2004-04-12. This second edition of the *Handbook of Communication and Aging Research* captures the ever-changing and expanding domain of aging research. Since it was first recognized that there is more to social aging than demography, gerontology has needed a communication perspective. Like the first edition, this handbook sets out to demonstrate that aging is not only an individual process but an interactive one. The study of communication can lead to an understanding of what it means to grow old. We may age physiologically and chronologically, but our social aging—how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age—are phenomena achieved primarily through communication experiences. Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades, the book's contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter. Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new

opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging

*Gender Issues in Clinical Psychology* Paula Nicolson, Jane Ussher, 2006-05-19 Clinical psychology has traditionally ignored gender issues The result has been to the detriment of women both as service users and practitioners The contributors to this book show how this has happened and explore the effects both on clients and clinicians Focusing on different aspects of clinical psychology's organisation and practice including child sexual abuse family therapy forensic psychology and individual feminist therapy they demonstrate that it is essential that gender issues are incorporated into clinical research and practice and offer examples of theory and practice which does not marginalise the needs of women

*Adaptive Origins* Peter LaFrenière, 2011-01-07 In this text students are invited to rethink psychology by grounding it in the natural sciences with the understanding that evolutionary and developmental processes work together with culture to solve problems of human adaptation These processes are cast as interdependent Development cannot be understood except in the light of evolutionary theory and the best proof of evolution is the fact of development For students of evolutionary psychology all the central topics such as evolved mental modules for theory of mind or language require an understanding of the developmental processes that lead to their expression Genes as important as they are are never the whole story The role of biological factors is explored in chapters outlining evolution development genetics human origins hormones and the brain Then the integrative value of this evolutionary developmental vision in understanding key topics in psychology is illustrated by applying it to traditional area of inquiry including infancy and attachment emotions and their expression social relations with peers cognitive and language development sex differences courtship and mating violence and aggression and cooperation and competition

Cree, 2010-07-12 Fully revised and updated throughout this second edition examines sociology in relation to key areas of social work and probation practice and includes two new chapters It provides an introduction to sociological ideas and research and places them firmly into the context of actual social work practice

**Teaching About Adolescence** John McKinney, Lawrence Shelton, Lawrence Shiamberg, 2019-05-30 For this volume Professors McKinney Schiamberg and Shelton assembled contributors to write about something that is written about far too infrequently How to present scientific research on adolescent development in ways students find interesting believable relevant and worth remembering when the term is over Graduate education in adolescent development almost always guarantees adequate training in research and theory but training in creative pedagogy is more often than not left to chance Those of us who teach adolescence regularly know that colleagues all over the world use innovative approaches to take advantage of the real world relevance of the material but most of these approaches remain insiders tricks of the trade Teaching About Adolescence is to my knowledge the first volume that describes and explains how and more importantly why the best teachers of adolescence do what they do It is a much needed book But this book is much more than a collection of recipes for interesting class exercises or term projects First published in 1999 Routledge is an imprint of Taylor Francis an informa company
