**Hypnosis and Experience (Psychology Revivals)** Peter W. Sheehan, Kevin M. McConkey, 2015-03-27 The subject of hypnosis has not lost any of its ability to fascinate and intrigue and this holds equally true for both the layperson and the student of hypnotic behavior Phenomena of hypnosis range from simple tasks involving ideomotor response to more complex tasks involving substantial distortions of perceived reality such as age regression hallucination and amnesia Obviously with a topic so diverse and so interesting there are plenty of books around Originally published in 1982 what makes this title stand out is the authors focus instead of trying to survey the whole field and evaluate the full spectrum of theories about hypnosis they hone in on specific points of view with the aim of illustrating the nature of hypnotic phenomena

Ecology, Cosmos and

Consciousness Mark A. Schroll, 2018-05-26 Ecology Cosmos and Consciousness is a pioneering work that attempts to shift current paradigms. Its editor and lead author Mark A. Schroll incisively identifies the problems humanity faces as a result of philosophies, sciences, and religious movements that ignore the importance of an earth-based focus of humanistic and transpersonal inquiry. The result is a transpersonal, post-modern, systems-oriented approach to cultural theory that is both provocative and well argued, both visionary and practical, both scholarly and whimsical. Stanley Krippner, Ph.D., Professor of Psychology, Saybrook University, Oakland, California.

**Counseling and Psychotherapy** David Capuzzi, Mark D. Stauffer, 2016-03-24. Featuring important theories and trends not covered in other foundational texts, this book is designed to equip the next generation of counselors with the tools they need for understanding the core dimensions of the helping relationship. Topical experts provide contemporary information and insight on the following theories: psychoanalytic, Jungian, Adlerian, existential, person-centered, Gestalt, cognitive-behavior, dialectical-behavior, rational-emotive-behavior, reality therapy, choice theory, family, feminist, transpersonal, and new to this edition, solution-focused and narrative therapies, as well as creative approaches to counseling. Each theory is discussed from the perspective of historical background, human nature, major constructs, applications, the change process, traditional and brief intervention strategies, cross-cultural considerations, and limitations. The use of a consistent case study across chapters reinforces the differences between theories. Requests for digital versions from the ACA can be found on [wiley.com](http://wiley.com).
