Re-imagining Schooling for Education Glenda McGregor, Martin Mills, Kitty Te Riele, Aspa Baroutsis, Debra Hayes, 2017-03-08 This book provokes a conversation about what supportive schooling contexts for both students and teachers might look like and considers how schooling can contribute to a more socially just society It takes as its starting point the position of the most marginalised students many of whom have either been rejected by or have rejected mainstream schooling and argues that the experiences of these students suggest that it is time for schools to be reimagined for all young people Utilizing both theory and data the volume critiques many of the issues in conventional schools that work against education and presents evidence from the field in the form of data from unconventional schooling sites which demonstrates some of the structural relational curricular and pedagogical changes that appear to be enabling schooling for education for their students It will be essential reading for students and researchers in the fields of education sociology and social work and will also be of great interest to practising teachers

Fantini, 1976 No two children are alike They have different needs they learn differently and at different rates have unique interests and talents as well as special problems In the past decade this age old fact has become increasingly obvious in our educational system We have come to realize the unavoidable doom of institutional uniformity and the absolute necessity of alternatives and choices which allow all students and not only those who can afford it to learn in the best possible situation for them Mario D Fantini one of the nation s best known spokesmen for alternatives in education has brought together important material which shows how this task can be and is being done in the educational system today He has compiled a handbook for parents students teachers and administrators who want to know how to improve education in their community Mario D Fantini is professor and Dean of education at the State University of New York at New Paltz He is author of *What s Best For The Children* also published by Anchor Press Doubleday

Alternative Educational Programmes, Schools and Social Justice Glenda McGregor, Martin Mills, Pat Thomson, Jodie Pennacchia, 2019-10-18 Alternative education caters and cares for students whose regular schools have failed and excluded them Fifty years of international research reports that alternative settings are characterised by close and powerful staff student relationships a curriculum which is relevant engaging and meaningful and the strong sense of agency afforded young people by the opportunity to make decisions Together these three practices produce increased life chances for alternative education participants However despite these apparent successes alternative education seems to have had little impact on mainstream schools This collection of papers addresses the important question what might regular schools and teachers learn about socially just pedagogies from alternative education practices In providing answers to this question authors interrogate the taken for granted wisdom about alternative education while also taking account of ongoing policy shifts differing locations and populations and persistent and intersecting patterns of raced classed and gendered inequalities They draw on a range of theoretical and methodological approaches to interrogate the ways in which alternative schools and alternative education both challenge and legitimate the kinds of schooling most of us expect for our own and other people s children The chapters in this book were originally published as a special issue of *Critical Studies in Education*

School is Dead: Alternatives in Education Everett W. Reimer, 1971 In this startling indictment Everett Reimer strips away traditional idolatry and currently fashionable procedural criticism and gets down to the nub our school systems are over costly monopolistic institutions with more kinship to slavery than to education which set their own rules and definitions and permanently

penalize those who don't conform institutions that promise the world and are the very instruments of its denial The book evaluates the school system not by its own standards but in terms of what school is supposed to accomplish and finds it fatally lacking It must be replaced the author cogently argues by multiple radical alternatives suited to the multiple needs of the young and designed to bring about a truly free society **Philosophical Alternatives in Education** Gerald Lee Gutek,1974-01-01 Education without schools Helen E. Lees,2013-11-08 At a time when education and school choices are under increasing scrutiny this topical book considers education more broadly than ever before The author an experienced teacher and researcher highlights what happens when parents discover that an alternative to school education exists and is legal This under researched topic highlights the lack of governmental interest in alternative education and also considers the human rights issues conflation with safeguarding the relationship of the state to education and parental education choice Focusing on the discovery of elective home education EHE in England as a case study for new and necessary arguments the ideas discussed are also relevant internationally The book considers the global fact of education as not just mainstream schooling but how the dominance of schooling has affected our ability to conceive of education as diverse and different This thought provoking book will appeal to academic teaching and policy making audiences **Alternative Approaches to Education** Fiona Carnie,2017-05-12 Alternative Approaches to Education provides parents and teachers with information and guidance on different education options in the UK and further afield This new and expanded edition including additional chapters and up to date contact details explains the values philosophies and methods of a range of alternative approaches available outside and within the state system as well as if you're doing it yourself Illustrated throughout with the first hand experiences of children teachers and parents it provides lists of useful contacts sources of further information and answers to common questions Together with brand new chapters on recent research and contemporary debates and on Free Schools it covers Small alternative schools Steiner Waldorf education Democratic schools Alternatives in the state system Parents as change agents Setting up a Small School or Learning Centre Home based education Flexible schooling Exploring why alternative approaches to education are needed this accessible and informative book challenges the dominant educational orthodoxies by putting children first It will be of interest to teachers looking to build on their knowledge of different educational approaches in order to find new ways of working It is also an ideal introduction for parents deciding how best to educate their children Education Without Schools Helen Elizabeth Lees,2014 This topical book focuses on elective home education EHE in England and considers how the dominance of schooling has affected our ability to conceive of education as diverse and different It highlights the lack of government interest in alternative education and also considers the human rights issues the relationship of the state to education and parental education choice *Alternatives in Education* Allan A.
