Aluminium Jakub M. Godzimirski, 2017-07-18 This book addresses how the progress of the Russian aluminium industry which has developed into an important global actor has been influenced by the interaction of global market forces and the evolution of the Russian political system After the collapse of the Soviet Union Russian aluminium producers needed to adapt to changing framework conditions both with regards to the global aluminium market and in Russia Examining the most important changes in the organization of the global aluminium trade the reorganization and consolidation of Russian aluminium industry and its oligarchization Godzimirski charts the evolution of the relationship between political and economic power in Russia and the impact that this development has had on survival and adaptation strategies of key aluminium players in the country **The International Aluminium Cartel** Marco Bertilorenzi, 2015-09-16 Aluminium was one of most cartelised industries in the international economic panorama of the 20th century Born following the discovery of electrolytic smelting process in 1886 this industry even in its infancy established a cartel which characterised its history until nearly 1980 Managers of the aluminium industry from various historical eras and countries shared the same vision about the development of their industry to keep prices as stable as possible in order to encourage expansions and to provide return on investments Price instability which characterised the trade of other commodities was unknown to the aluminium industry This book neither argues that cartels are fundamentally evil nor attempts to demonstrate that cartels are optimal business organisations It instead provides an in depth and frank analysis of the internal working of industrial organisations and of the interplay between cartels and political powers and institutions The International Aluminium Cartel offers explanations for the construction and collapse of cartels descriptions of their operations and an historical interpretation of their experiences Incorporating information gleaned from a unique collection of private and public archives from several countries this unique study will appeal to a wide variety of readers including academics interested in industrial and business history

Democratic Transition and Consolidation in Southern Europe, Latin America and Southeast Asia Diane Ethier, 2016-07-27 The breakdown of authoritarian regimes in Greece Spain and Portugal in the mid 70s was the beginning of a new cycle of democratization at the world scale The 1980s have seen the emergence of formal constitutional democracies in many countries especially in Latin America and Southeast Asia This book analyses in a comparative perspective the causes the modalities and the prospects of these political changes in three regions Southern Europe Latin America and Southeast Asia **Aluminum Ore** Robin S. Gendron, Mats Ingulstad, Espen Storli, 2013-09-28 As the key component in aluminum production bauxite became one of the most important minerals of the last one hundred years But its effects on people and economies varied broadly for some it meant jobs progress or a political advantage over rival nations but for many others it

meant exploitation pollution or the destruction of a way of life Aluminum Ore explores the often overlooked history of bauxite in the twentieth century and in doing so examines the forces that shaped the time from the mineral s strategic development in the First World War and throughout the Cold War to its role in the globalization of markets as companies from the northern hemisphere vied for the resources of the south In this wide ranging collection scholars from around the world consider multiple international perspectives on this history from Guinea to Nazi Germany to Jamaica all while examining the central place of one commodity in a time of change

The Politics of International Economic Relations Jeffrey A. Hart,Joan Edelman Spero,2013-06-17 The first and definitive book of its kind Joan Spero s The Politics of International Economic Relations has been fully updated to reflect the sweeping changes in the international arena With the expertise of co author Jeffrey Hart the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War economic polarization in developing nations and the roots of economic decline in centrally planned economies A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy Ideal as a supplement to the International Relations course or as the core text in International Political Economy Spero and Hart s The Politics of International Economic Relations continues to give students the breadth and depth of scholarship needed to understand the politics of world economy

Reimagining Mobilities across the Humanities Lucio Biasiori,Federico Mazzini,Chiara Rabbiosi,2023-01-31 Volume 1 Theories Methods and Ideas explores the mobility of ideas through time and space and how interdisciplinary theories and methodological approaches used in mobilities studies can be profitably utilised within the humanities and social sciences Through a series of short chapters mobility is employed as an elastic inclusive and multifaceted concept across various disciplines to shed light on a geographically and chronologically broad range of issues and case studies In doing so the concept of mobility is positioned as a powerful catalyst for historical change and as a fruitful approach to research in the humanities and social sciences Like its sister volume this volume is edited and written by members of the Centre for Advanced Studies in Mobility and the Humanities MoHu at the Department of Historical and Geographical Sciences and The Ancient World DiSSGeA of the University of Padua Italy The structure of the book mirrors the Theories and Methods and Ideas thematic research clusters of the Centre Afterwords from leading scholars from other institutions synthesise and reflect upon the findings of each section This volume together with Volume 2 Objects People and Texts makes a compelling case for the use of mobility studies as a research framework in the humanities and social sciences As such it will be of interest to students and researchers in various disciplines

Small Farmers, Big Business David Glover,Ken Kusterer,2016-07-27 This book deals with an agricultural production and marketing system known as contract farming CF In this system a public or private agency purchases the crops of independent farmers through contracts often providing inputs technical assistance and marketing CF has a long history in developed countries and has spread to the Third World The book uses case studies from North America Latin America and Africa to assess the experience

to date and provide guidelines for the use of CF in the future

Contextualizing Jamaica's Relationship with the IMF Christine Clarke, Carol Nelson, 2020-10-05 This ambitious book provides a comprehensive quantitative and qualitative assessment of Jamaica's ties to the International Monetary Fund focusing on Jamaica's historical relationship with the IMF and reflecting on the domestic and international discourse surrounding the evolution of this relationship. Notably, this volume presents a critical analysis of Jamaica's first engagement with and departure from the IMF and interrogates the political economy of the period. Jamaica's economic experiences are assessed in the context of major global events including the food price crises of 2007 and the global economic crises of 2008 and 2009. This book also looks at policy implications and its well-researched analysis will be of great value to practitioners and policymakers as well as academics.

Liquid Empire Corey Ross, 2024-07-09 A bold new account of European imperialism told through the history of water. In the nineteenth and twentieth centuries, a handful of powerful European states controlled more than a third of the land surface of the planet. These sprawling empires encompassed not only rainforests, deserts, and savannas but also some of the world's most magnificent rivers, lakes, marshes, and seas. *Liquid Empire* tells the story of how the waters of the colonial world shaped the history of imperialism and how this imperial past still haunts us today. Spanning the major European empires of the period, Corey Ross describes how new ideas, technologies, and institutions transformed human engagements with water and how the natural world was reshaped in the process. Water was a realm of imperial power whose control and distribution were closely bound up with colonial hierarchies and inequalities, but this vital natural resource could never be fully tamed. Ross vividly portrays the efforts of officials, engineers, fisherfolk, and farmers to exploit water and highlights its crucial role in the making and unmaking of the colonial order. Revealing how the legacies of empire have persisted long after colonialism ebbed away, *Liquid Empire* provides needed historical perspective on the crises engulfing the world's waters, particularly in the Global South where billions of people are faced with mounting water shortages, rising flood risks, and the relentless depletion of sea life.

Private Authority and International Affairs A. Claire Cutler, Virginia Haufler, Tony Porter, 1999-04-01 Governments today are too often unwilling to intervene in global commerce, and international organizations are too often unable to govern effectively. In their place, firms increasingly cooperate internationally to establish the rules and standards of behavior for themselves and for others, taking on the mantle of authority to govern specific issue areas. Are they stepping into the breach to supply needed collective goods? Or are they organizing themselves in order to prevent governments from interfering in their business? This book explores the meaning of this private international authority, both for theory and policy, through case studies of specific industries, associations, and issue areas in both contemporary and historical perspective. Contributors include Pamela Burke, Lynn Mytelka, and Michel Delapierre. Liora Salter, Susan Sell, Timothy Sinclair, Deborah Spar, and Michael Webb.

Aluminum Upcycled Carl A. Zimring, 2017-03-15 Tracing the benefits and limitations of repurposing aluminum. Besides being the right thing to do for Mother Earth, recycling can also make money, particularly when it comes to

upcycling a zero waste practice where discarded materials are fashioned into goods of greater economic or cultural value In *Upcycling Aluminum* Carl A Zimring explores how the metal's abundance after World War II coupled with the significant economic and environmental costs of smelting it from bauxite ore led to the industrial production of valuable durable goods from salvaged aluminum Beginning in 1886 with the discovery of how to mass produce aluminum the book examines the essential part the metal played in early aviation and the world wars as well as the troubling expansion of aluminum as a material of mass disposal Recognizing that scrap aluminum was as good as virgin material and much more affordable than newly engineered metal designers in the postwar era used aluminum to manufacture highly prized artifacts Zimring takes us on a tour of post 1940s design examining the use of aluminum in cars trucks airplanes furniture and musical instruments from 1945 to 2015 By viewing upcycling through the lens of one material Zimring deepens our understanding of the history of recycling in industrial society He also provides a historical perspective on contemporary sustainable design practices Along the way he challenges common assumptions about upcycling's merits and adds a new dimension to recycling as a form of environmental absolution for the waste related sins of the modern world Raising fascinating questions of consumption environment and desire *Upcycling Aluminum* is for anyone interested in industrial and environmental history discard studies engineering product design music history or antiques

Journal of the Geological Society of Jamaica ,1980 **Foreign Commerce Weekly** ,1950 **The Aluminium Industry** James R. King,2001-02-23 Aluminium is the most abundant metal in the Earth's crust but because aluminium was isolated experimentally only in 1827 and produced in commercial quantities only after 1886 its production and use is many times less than that of iron However over twice as much aluminium is produced as copper and the annual percentage growth in its consumption between 1985 and 1998 at 2.8% is significantly greater than that of iron and steel The aluminium industry provides an in depth overview of the international aluminium trade at the turn of the millennium Its clearly presented information analysis and statistics bring the industry into sharp focus from extraction and refining to applications markets prices and future trends The aluminium industry is essential reading for Professionals whose businesses participate in supply or buy from any part of the aluminium industry The finance community with investment interests in the metals or raw materials industries Engineers needing an overview of the structure and commercial operation of the aluminium industry Government policy makers and all those needing an introduction to the industry or a training resource for new entrants Read this guide and find out about How the aluminium industry has developed from its earliest beginnings How the key raw materials bauxite and alumina are processed Why technical trends are changing the production of aluminium How primary aluminium is priced The role of recycled aluminium metal How demand is changing and the main applications for aluminium products today and in the future The organisation of international trade industry corporate structures and the key issues that will determine the industry's future

Transnational Corporations and Uneven Development (RLE International Business) Rhys Jenkins,2013-02-15 Is the

transnational corporation TNC an engine of growth capable of eliminating international economic inequalities or a major obstacle to development through a massive drain of surplus to advanced countries This book presents five different perspectives on the role of TNCs Neo Classical Global Reach Neo Imperialist Neo Fundamentalist Internationalization of capital The author looks at their effect on local labour and capital and considers the future prospects for TNC involvement in the Third World The book provides an excellent comparative analysis of TNCs and will appeal to students in development studies and international economics

The Politics of Global Debt Stephen P. Riley, 2016-07-27 The Politics of Global Debt is a detailed political analysis of the origins and consequences of the global debt crisis which emerged in the early 1980s It assesses both imperialist and New Right interpretations of the crisis and also presents a series of case studies of the effects of external debt upon Africa Latin America Eastern Europe and Asia The book focusses upon the sovereign debt of states and its management and examines the ways in which global economic structures inefficient policies weak institutions and corrupt political leaders contribute to a global debt crisis which has both international and domestic roots

Workers in Third-World Industrialization Inga Brandell, 2016-07-27 In third world countries an increasing number of people have been drawn into the process of industrialization as wage workers The analyses here presented cover the limits set by workers to exploitation in workshop production ethnicity as a workers strategy the role of workers absenteeism and turnover and labour strategies in a situation of recession and de industrialisation Using a historical approach labour migration union strategy for democratisation and the world scale pattern of labour unrest are studied as outcomes of social conflict
