*Alvar Aalto in the Finnish Context* Kirmo Mikkola,2025-05-30 This book first published in Finnish in 1985 under the title *Aalto is a critical introduction to Finnish architect Alvar Aalto 1898 1976* written by one of Aalto's Finnish architectural contemporaries Kirmo Mikkola 1934 1986 The book is divided into six sections dealing with different aspects of Aalto's architecture from his classical beginnings to urban planning as well as his various professional and intellectual associates

Mikkola debunks the common opinion of a reticent Aalto to determine the roots of his thinking seeing him as a mediator of influences from a wide variety of sources The book was originally targeted at a Finnish audience and so its translation requires interpreters two architect scholars who knew Mikkola well Juhani Pallasmaa and Aino Niskanen The book also sheds light on a young generation of Finnish architects that distanced itself from Aalto as a role model pinpointed here by the inclusion of the essay Snowballs 1948 by Aulis Blomstedt Often quoted by Finnish architectural scholars the publication finally of an English translation of Mikkola's book will appeal to those international scholars and students who have been aware of the lack of critical perspectives from Aalto's Finnish architect contemporaries Alvar Aalto Alvar Aalto,1965

Schmiedeknecht,2006-08-11 This lively text provides a candid inquiry into the contemporary means by which architects get work and for better or worse become famous In response to the reciprocal relationship between publicity and everyday architectural practice this book examines the mechanisms by which architects seek publicity and manage to establish themselves and their work ahead of their colleagues Through the essays of specialist contributors this book enables the reader to understand the complex relationship between what they see as the built environment and the unwritten stories behind how it came about *Makers of 20th-Century Modern Architecture* Donald Leslie Johnson,Donald

Grimley,2011-08-08 New perspectives on the greatest Finnish

composer of all time Perhaps no twentieth century composer has provoked a more varied reaction among the music loving public than Jean Sibelius 1865 1957 Originally hailed as a new Beethoven by much of the Anglo Saxon world he was also widely disparaged by critics more receptive to newer trends in music At the height of his popular appeal he was revered as the embodiment of Finnish nationalism and the apostle of a new musical naturalism Yet he seemingly chose that moment to stop composing altogether despite living for three more decades Providing wide cultural contexts contesting received ideas about modernism and interrogating notions of landscape and nature Jean Sibelius and His World sheds new light on the critical position occupied by Sibelius in the Western musical tradition The essays in the book explore such varied themes as the impact of Russian musical traditions on Sibelius his compositional process Sibelius and the theater his understanding of music as a fluid and improvised creation his critical reception in Great Britain and America his late style in the incidental music for The Tempest and the parallel contemporary careers of Sibelius and Richard Strauss Documents include the draft of Sibelius's 1896 lecture on folk music selections from a roman clef about his student circle in Berlin at the turn of the century Theodor Adorno's brief but controversial tirade against the composer and the newspaper debates about the Sibelius monument unveiled in Helsinki a decade after the composer's death The contributors are Byron Adams Leon Botstein Philip Ross Bullock Glenda Dawn Goss Daniel Grimley Jeffrey Kallberg Tomi M kel Sarah Menin Max Paddison and Timo Virtanen

The Architecture of Light Mary Ann Steane, 2012-11-12 Reviewing the use of natural light by architects in the era of electricity this book aims to show that natural light not only remains a potential source of order in architecture but that natural lighting strategies impose a usefully creative discipline on design Considering an approach to environmental context that sees light as a critical aspect of place this book explores current attitudes to natural light by offering a series of in depth studies of recent projects and the particular lighting issues they have addressed It gives a more nuanced appraisal of these lighting strategies by setting them within their broader topographic climatic and cultural contexts **Finnish Architecture**
