Articulate Energy:

The Energy Security Paradox Jonna Nyman, 2018 The decisions we make about energy shape our present and our future From geopolitical tension to environmental degradation and an increasingly unstable climate these choices infiltrate the very air we breathe Energy security politics has direct impact on the continued survival of human life as we know it and the earth cannot survive if we continue consuming fossil energy at current rates The low carbon transition is simply not happening fast enough and change is unlikely without a radical change in how we approach energy security But thinking on energy security has failed to keep up with these changing realities Energy security is primarily considered to be about the availability of reliable and affordable energy supplies having enough energy and it remains closely linked to national security The Energy Security Paradox looks at contemporary energy security politics in the United States and China the top two energy consumers and producers Based on in depth empirical analysis it demonstrates that current energy security practices actually lead to a security paradox they produce insecurity To illustrate this it develops the energy security paradox as a framework for understanding the interconnected insecurities produced by current practices However it also goes beyond this examining resistance to current practices to highlight that we not only can do energy security differently this is already happening In the process the volume demonstrates that the value of security depends on the context Based on this The Energy Security Paradox proposes a radical reconsideration of how we approach and practice energy security *At Home in Time* Patrick Deane, 1994 Patrick Deane argues that modern English poetry in some key aspects is deeply indebted to the classical tradition and more particularly to the attitudes and modes of the eighteenth century He illustrates how neo Augustan values are apparent in the works of T S Eliot W H Auden Louis MacNeice A D Hope Donald Davie Charles Tomlinson and others *Articulate Energy* Donald Davie, 1971 *Energy challenge Badge* Food and Agriculture Organization of the United Nations, 2019-12-12 The purpose of the United Nations Challenge Badges is to raise awareness educate and most of all motivate young people to change their behaviour and be active agents of change in their local communities Challenge Badges are appropriate for use with school classes and youth groups and are endorsed by WAGGGS and WOSM They include a wide range of activities and ideas that can easily be adapted by teachers or leaders Additional badges are available or are being developed on a number of other topics including Agriculture Biodiversity Climate Change Forests Gender Governance Hunger Nutrition the Ocean Soils and Water The ENERGY CHALLENGE BADGE is designed to show the crucial role energy plays for life on our planet as well as for our daily lives The badge looks at the different sources of energy considers how people use energy and how our planet is affected by it and motivates young people to save energy and to engage in efforts to increase access to clean energy **Mackenzie Pipeline** Peter H. The Pushing-Hands of Translation and its Theory Douglas Robinson, 2016-05-12 This book presents an East West dialogue of leading translation scholars responding to and developing Martha Cheung's pushing hands method of translation studies Pushing hands was an idea Martha began exploring in the last four years of her life and only had time to publish at article length in 2012 The concept of pushing hands suggests a promising line of inquiry into the problem of conflict in translation Pushing hands opens a new vista for translation scholars to understand and explain how to develop an awareness of non confrontational alternative ways to handle translation problems or problems related to translation activities that are likely to give rise to tension and conflict The book is a timely contribution to celebrate Martha's work and also to move the conversation forward Despite being somewhat tentative and experimental it probes into how to enable and develop dynamic interaction between and reciprocal determinism of different hands involved in the process of translation

Handbook on Climate Change and Technology Frauke Urban, Johan Nordensvärd, 2023-12-11 This timely Handbook presents the latest knowledge on technological innovation for climate change mitigation and adaptation Looking beyond technical fixes it further draws on economics politics and sociology to explore how modern technology can contribute to effective and socially just sustainability transitions

Enhancement of Industrial Energy Efficiency and Sustainability Andrea Trianni, 2021-02-26 Industrial energy efficiency has been recognized as a major contributor in the broader set of industrial resources to improved sustainability and circular economy Nevertheless the uptake of energy efficiency measures and practices is still quite low due to the existence of several barriers Research has broadly discussed them together with their drivers More recently many researchers have highlighted the existence of several benefits beyond mere energy savings stemming from the adoption of such measures for several stakeholders involved in the value chain of energy efficiency solutions Nevertheless a deep understanding of the relationships between the use of the energy resource and other resources in industry together with the most important factors for the uptake of such measures also in light of the implications on the industrial operations is still lacking However such understanding could further stimulate the adoption of solutions for improved industrial energy efficiency and sustainability

Handbook of Sustainable Energy Ibon Galarraga, M. González-Eguino, Anil Markandya, 2011 was impressed by the scope of the contributions and their clarity All appear to have been written specifically for this Handbook and all are readily comprehensible without a large amount of assumed previous knowledge a very useful source document and many of the chapters represent a good starting point for student research projects Tony Owen Economics of Energy and

Environmental Policy In today's modern world where energy resources are increasingly scarce climate change is a hot button issue and population growth continues to push the need to promote sustainable living Handbook of Sustainable Energy is highly recommended as an absolutely invaluable contribution to graduate school libraries and the pool of literature available to professionals in the field The Midwest Book Review Major contemporary issues and debates relating to the sustainable use of energy are addressed in this far reaching Handbook The contributing authors discuss the ongoing debates about sustainability and energy use energy economics renewable energy efficiency and climate policy New and original chapters from leading academics cover the full spectrum of relevant research including definitions of sustainability in energy use consumer behaviour and energy markets the impacts of innovation and new technologies energy economics and climate modelling low carbon economies and renewable energies The authors critically engage with perspectives from developed and developing countries from both global and regional standpoints This Handbook will make a timely and important contribution to the study of energy climate change and climate economics and will prove essential reading for international researchers in the fields of natural resources climate change and energy Students in environmental science faculties economics departments business schools and engineering schools will also find this important and enriching compendium insightful Similarly policy makers in energy and environment ministries and international organizations will find much topical debate to engage them

Ecological Dimensions for Sustainable Socio Economic Development A. Yáñez-Arancibia, R. Dávalos-Sotelo, J. W. Day, 2014-05-13 This book fills a gap in the literature on environmental sustainability by addressing the topic from the perspective of social and economic development Progress in understanding and achieving sustainability requires the integration of scientific social economic and legal issues Yet progress in understanding and achieving sustainability will only be achieved through integration of scientific social economic and legal aspects A treatise on environmental sustainability should raise the current state of knowledge by proposing and recommending decision making efforts and breaking new ground with agendas aimed for the younger generation These younger scientists will be confronted with future uncertainty related to the set of crises that characterise the 21st Century e.g. ecological social food energy environmental climatic financial etc Currently there are a number of indicators that demonstrate that ecological conditions are being compromised globally These include reduced primary productivity reduction in biological complexity spreading pollution such as eutrophication ecological degradation in any continental basin coastal sea ecosystem reduction in biodiversity lowered resilience and slow recovery of damaged ecosystems and reduced ecological integrity All of these problems are related to social and economic pressure The challenge for most ecological systems is not only to establish the baseline for current ecosystem conditions but also to explore options for recovery and sustainability The latter involves ecological restoration where ecosystem and environmental services are maintained and enhanced These services are essential to social integration and economic development This book not only introduces a theoretical and conceptual

framework for the topic but also analyses the uncertainty for sustainability because of dwindling natural resources It includes contributions providing a basis for public policies case studies integrating concepts and tools for solutions and a set of position papers addressing new agenda topics that will shape the 21st century The book will be useful for researchers professors and students alike as well as for all stakeholders from social economic and academic sectors *King Alfred the Great, his Hagiographers and his Cult* Tomás Mario Kalmar, 2025-10-01 This book situates Alfred the Great in his hagiographic context For 150 years the fables told in the ninth century about Alfred's childhood have posed interlocking disciplinary challenges to historians committed to evicting romance from history Blending current Hagiography Studies with historical literary and biblical hermeneutics can help us forgo the anti hagiographic commitments which motivated the scholars who purified the Victorian cult of Alfred by expunging his legends and salvaging his historicity The book focusses on the typological functions of three Alfredian fables from the Old English Chronicle the Old English Boethius and Asser's Vita Alfredi analyses the plot common to all three critiques the psychological conjecture that Alfred's childhood memory was their common source and shows that synoptically they can help us see how Alfred shaped the curve of his own life's destiny and how he engaged in the formation of his own cult to last a thousand years Robinson Jeffers and a Galaxy of Writers William B. Thesing, 1995 *Lydia Sigourney* Lydia Sigourney, 2008-08-28 Lydia Huntley Sigourney 1791-1865 was the most widely read and respected pre Civil War American woman poet in the English speaking world In a half century career Sigourney produced a wide range of poetry and prose envisaging the United States as a new kind of republic with a unique mission in history in which women like herself had a central role This edition contributes to the current recovery of Sigourney and her republican vision from the oblivion into which they were cast by the aftermath of the Civil War the construction of a male dominated American national literary canon and the aesthetics of Modernism In this Broadview edition a representative selection of poetry and prose from across her career illustrates Sigourney's national vision and the diversity of forms she used to promote it In the appendices letters and documents illustrate her challenges and working methods in what she called her kitchen in Parnassus **Poetry & Money** Peter Robinson, 2020 Poetry Money illuminates relationships between poets poetry and money from Chaucer to the contemporary times Through readings of poems variously engaged with money it proposes ways in which we can come to a fresh understanding of values money may serve to enable but which are nevertheless beyond price *Wordsworth's Poetry of Repetition* Sarah Houghton-Walker, 2023 This book explores those moments of repetition placing them in the early nineteenth century context from which they emerged and teasing out through extended close attention to the poetry itself the complexities of repetition and recapitulation **The Movement Reconsidered** Zachary Leader, 2009-05-07 The Movement was the preeminent poetical grouping of post war Britain This collection of original essays by distinguished poets critics and scholars from Britain and America provides new accounts not only of the best known of Movement writers Philip Larkin Kingsley Amis Thom Gunn and Donald Davie but of

less familiar contemporaries **Basil Bunting** Julian Stannard, 2014 This study explores Basil Bunting's poetry position as a point of inspiration for younger poets and describe the ways in which it acts as a platform to show that Anglo American modernism was not incompatible with native traditions **Ezra Pound and the Appropriation of Chinese Poetry** Ming Xie, 2021-12-12 First published in 1999 The subject of this book is the translation and appropriation of Chinese poetry by some English and American writers in the early decades of this century The author explores the be concerned as much with English translation of Chinese poetry per se as with the relationship between this body of translation from the Chinese and the developing poetics and practices of what is usually referred to as Imagism as much with the question of historical influence or ascription as with certain interpretive and critical aspects of this correlative relationship Focusing on the direct influence of Chinese poetry upon the theory and practice of Imagism attributing to Imagist poets in general and Ezra Pound in particular the perception in Chinese poetry of the essential qualities and principles for rejuvenating English poetry in the early decades of the century
