Rehabilitation and Treatment of Head and Neck Cancer Eugene N. Myers, Ivan Barofsky, Jerome William Yates, 1986 This monograph is the result of a workshop entitled Head and Neck Cancer Integration of Treatment and Rehabilitation which was held in January 1984 and sponsored by the National Cancer Institute The purpose of the workshop was to review past research directions focused on head and neck cancer and set new goals where appropriate As discussed at the meeting the goal of integrating treatment and rehabilitation is to prevent or minimize the physical cosmetic or functional disability and the emotional sequelae commonly associated with head and neck cancer and its treatment The meeting afforded an opportunity for a diverse group of professionals to exchange ideas and information on effective and desirable methods of treatment and rehabilitation for head and neck cancer patients Papers were presented and discussions were held with the aim of identifying and resolving some of the problems faced by those who make treatment decisions and provide care for

these patients This workshop highlighted the need for an integration of multi disciplinary rehabilitation planning at the time of initial treatment for head and neck cancer It also demonstrated major deficiencies in objective outcome measures used to assess physiological and social function over and above the usual measures of patient survival Centers which provide multidisciplinary patient management programs and follow adequate patient populations thus assuring management proficiency provide the best means of avoiding many of the pitfalls that threaten patients who are managed by a single physician and exposed sequentially to other disciplines only when problems develop Few other cancers demonstrate the need for anticipatory treatment and rehabilitation to the magnitude required in the management of head and neck cancer

Therapeutic Management of Incontinence and Pelvic Pain J. Laycock, J. Haslam, 2013-03-09 As medical knowledge advances we tend to compartmentalise our specialties into smaller units but hand in hand with this there is a growing understanding between the different disciplines within the caring professions Thus we are able to share our special skills to the benefit of patients This book is an excellent example of the advantage of interdisciplinary communication and demonstrates a refreshing holistic approach to the problems of incontinence and pelvic pain Written with physiotherapists in mind the editors have invited contributions from many distinguished experts in their own field These have been compiled into a comprehensive book which will appeal to many healthcare professionals I have had great pleasure in reading this book During the time that I have been involved with pelvic dysfunction there have been many exciting advances These are all included in a most readable sequence some presented with a refreshing new twist In particular I would like to bring to your attention the section on pelvic pain Because of our lack of understanding it has been a problem that is too often ignored and here at last are some practical ideas for therapeutic management There is still much progress to be made in the field of incontinence and pelvic pain and as yet no editors can be expected to produce a definitive

work However I would like to recommend this book most strongly It has a new approach to this topic which is still a major problem for many people
