Jazayery, Edgar C. Polomé, Werner Winter, 2011-06-15 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing *Phonological Development and Disorders in Children* Zhu Hua, Barbara Dodd, 2006-01-01 This volume brings together a collection of empirical studies on phonological acquisition and disorder of monolingual children speaking different languages English German Putonghua Cantonese Maltese Telugu Colloquial Egyptian Arabic and Turkish

and bilingual children speaking different language pairs Spanish English Cantonese English Mirpuri Punjabi Urdu English Welsh English Arabic English and Putonghua Cantonese The research findings provide much needed baseline information for clinical assessment and diagnosis as well as valuable evidence concerning theories of language acquisition and the role of the ambient language

Speech and Hearing Science: Selected Readings Norman J. Lass, 1974 Language Acquisition Jill G. De Villiers, Peter A. De Villiers, 1978 The study of language acquisition has become a center of scientific inquiry into the nature of the human mind The result is a windfall of new information about language about learning and about children themselves In Language Acquisition Jill and Peter de Villiers provide a lively introduction to this fast growing field Their book deals centrally with the way the child acquires the sounds meanings and syntax of his language and the way he learns to use his language to communicate with others In discussing these issues the de Villiers provide a clear and insightful treatment of the classic questions about language acquisition Does the child show a genetic predisposition for speech or grammar or semantics which makes him uniquely able to learn human language What kinds of learning are involved in acquiring language and what kinds of experience with a language are necessary to support such learning Is there a critical period during the child's development which is optimal for language acquisition And what kind of psychological disabilities underlie the failure to acquire language

Textbook of Developmental Pediatrics Marvin I. Gottlieb, Janice E. Williams, 2013-11-11 Child adolescent development and behavior have been a traditional concern of primary health care providers However it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medical knowledge During the ensuing two decades developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of comprehensive health care for children The influence of public advocacy groups topic dedicated journals national professional specialty societies subject related continuing education programs and federal legislation PL94-142 has

served to crystallize developmental behavioral pediatrics as a specialized field of study As a consequence during the past ten years significant modifications have restructured medical student and pediatric resident education providing an emphasis on developmental behavioral issues The focus on neurodevelopmental educational and psychosocial issues reflects changing priorities in traditional health care for children The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology child psychiatry and general pediatrics As a result there has been some confusion in demarcating professional responsibilities in diagnosis and management as well as poorly defined terminology and classification schemas With the birth of developmental pediatrics as a pediatric specialty a more cohesive fund of knowledge has been accumulated and more meaningful strategies have been designed for prevention diagnosis and management

Perspectives on Individual Differences Affecting Therapeutic Change in Communication Disorders Amy L. Weiss, 2012-12-06 This volume examines the ramifications of individual differences in therapy outcomes for a wide variety of communication disorders In an era where evidence based practice is the clinical profession's watchword each chapter attacks this highly relevant issue from a somewhat different perspective In some areas of communication disorders considering the variance brought by the client into the therapeutic mix has a healthy history whereas in others the notion of how individual client profiles mesh with therapy outcomes has rarely been considered Through the use of research results case study descriptions and speculation the contributors have creatively woven what we know and what we have yet to substantiate into an interesting collection of summaries useful for therapy programming and designing clinical research

Speech and Language Norman J. Lass, 2014-06-28 Speech and Language Volume 2 Advances in Basic Research and Practice is a compendium of papers that

discusses the processes and pathologies of speech and language such as functional articulation disorders lexical development and a group therapy for treating stuttering Some papers deal with vocal fold vibrations childhood homonymy framework for conversational speech behaviors and vibrotactile testing One paper cites studies of Hersen and Barlow 1976 that treatments warrant consideration only if these are powerful enough to effect obvious gains and of Gilbert McPeck and Mosteller 1977 that treatment research is more likely to give modest than substantial gains the degree of gains which can also be difficult to detect Another paper examines suggestions for teaching words to language disordered children that when knowledge of normal language processes is applied in training approaches effective and individualized programs will follow Used in the treatment of stuttering the Shaping Group which employs action and many other treatment models shows that its approach is effective Another paper notes that before a surgical correction of voice disorders is undertaken the importance of knowing the possible effects of various procedures on the voice should first be known The compendium is well suited for linguists ethnologists psychologists speech therapists and researchers whose works involve linguistics learning communications corrective surgery and syntax

A Comparison of Articulatory Consistency and Variability Among Normal, Functional Articulation Disordered, and Developmentally Apraxic Children James G. Schumacher, 1986 *Children's Language* K. E. Nelson, 2014-03-18 First published in 1983 This series *Children's Language* reflects the conviction that extensive work on entirely new fronts along with a great deal of reinterpretation of old front data will be necessary before any persuasive and truly orderly account of language For all volumes in the series there is a common scheme of operation with two tactics First to give authors sufficient planning time and freedom to arrive at a chapter length account of their area of thinking which vividly shows both the progress and the problems in that area with the author of each chapter free to find a workable proportion of new experimental contributions review and theory The second tactic concerns the selection of topics for each volume This is Volume 4 Structures about language and thought and children as employed in certain other fields may well be shaken and stimulated particularly in education sociology anthropology literature and language remediation
