Artificial Humans Manic Machines:

Body Utopianism Franziska Bork Petersen, 2022-07-04 This book investigates how desires to transform our bodies can bring utopia to the present and how utopian practices often lead to distinctly dystopian or anti utopian outcomes It is the first comprehensive study to address the paradoxical relationship between bodies and utopianism Franziska Bork Petersen discusses doping bodybuilding and cosmetic surgery alongside practices such as retouching the body as image on social media and looks at how fashion modelling and performance estrange the body Techniques and technologies to transform our bodies are increasingly accessible and suggest an excessive identification of the body as lacking To be a body in a culturally meaningful way we incessantly improve our bodily appearance and capacity The book therefore addresses the utopianism inherent in a cultural understanding of bodies as increasingly controllable

Technophobia! Daniel Dinello, 2013-08-26 Techno heaven or techno hell If you believe many scientists working in the emerging fields of twenty first century technology the future is blissfully bright Initially human bodies will be perfected through genetic manipulation and the fusion of human and machine later human beings will completely shed the shackles of pain disease and even death as human minds are downloaded into death free robots whereby they can live forever in a heavenly posthuman existence In this techno utopian future humanity will be saved by the godlike power of technology If you believe the authors of science fiction however posthuman evolution marks the beginning of the end of human freedom values and identity Our dark future will be dominated by mad scientists rampaging robots killer clones and uncontrollable viruses In this timely new book Daniel Dinello examines the dramatic conflict between the techno utopia promised by real world scientists and the techno dystopia predicted by science fiction Organized into chapters devoted to robotics bionics artificial intelligence virtual reality biotechnology nanotechnology and other significant scientific advancements this book summarizes the current state of each technology while presenting corresponding reactions in science fiction Dinello draws on a rich range of material including films television books and computer games and argues that science fiction functions as a valuable corrective to technological domination countering techno hype and reflecting the weaponized religiously rationalized profit fueled motives of such science By imaging a disastrous future of posthuman techno totalitarianism science fiction encourages us to construct ways to contain new technology and asks its audience perhaps the most important question of the twenty first century is technology out of control

Artificial Humans Rolf Aurich, Wolfgang Jacobsen, Gabriele Jatho, 2000 This study offers a view of fabricated reality from gene technology to virtuality It deals with plagiarisms and their cinematic technological reality and looks at texts from literature and film covering reproduction and artificial intelligence for example R2D2 the Terminator and Lara Croft

Rediscovering French Science-Fiction in Literature, Film and Comics Philippe Mather, Sylvain Rheault, 2016-02-29 French science fiction SF is as old as the French language Cyrano de Bergerac wrote about a trip to the moon that was published back in 1657 as did Jules Verne in 1865 this time using hard scientific facts The first movie showing a trip to the moon was made by Georges Méliès in 1902 In the comics format Hergé had Tintin walk on the moon in 1954 15 years before Neil Armstrong These are just a few of the many unique French contributions to SF that rightly deserve to be better known One of the purposes of this collection is to introduce French SF to an English speaking audience Rediscovering French Science Fiction first revisits proto science fiction from authors like Cyrano de Bergerac and Jules Verne before delving into contemporary science fiction works from authors such as René Barjavel and Jacques Spitz A contribution from preeminent SF author Elisabeth Vonarburg from Québec helps to understand the constraints and advantages of writing SF in French A third section is devoted to French SF in movies and graphic novels media where French creators have been recognized worldwide This collection explores many aspects of French SF including the genre's deep roots in popular culture the influence of key authors on its historical development and the form and function of science and fantasy as well as the impact of films and graphic novels on the public perception of the genre's nature

Pop Music and Easy Listening Stan Hawkins, 2017-07-05 What defines pop music Why do we consider some styles as easier listening than others Arranged in three parts Aesthetics and Authenticity Groove Sampling and Industry Subjectivity Ethnicity and Politics this collection of essays by a group of international scholars deals with these questions in diverse ways This volume prepares the reader for the debates around pop's intricate historical aesthetic and cultural roots The intellectual perspectives on offer present the interdisciplinary aspects of studying music and spanning more than twenty five years these essays form a snapshot of some of the authorial voices that have shaped the specific subject matter of pop criticism within the broader field of popular music studies A common thread running through these essays is the topic of interpretation and its relation to conceptions of musicality subjectivity and aesthetics The principle aim of this collection is to demonstrate that pop music needs to be evaluated on its own terms within the cultural contexts that make it meaningful
