Orrù, 2025-05-28 *The Myth of Artificial Intelligence* Erik J. Larson, 2021-04-06 Exposes the vast gap between the actual science underlying AI and the dramatic claims being made for it John Horgan If you want to know about AI read this book It shows how a supposedly futuristic reverence for Artificial Intelligence retards progress when it denigrates our most irreplaceable resource for any future progress our own human intelligence Peter Thiel Ever since Alan Turing AI enthusiasts have equated artificial intelligence with human intelligence A computer scientist working at the forefront of natural language processing Erik Larson takes us on a tour of the landscape of AI to reveal why this is a profound mistake AI works on inductive reasoning crunching data sets to predict outcomes But humans don't correlate data sets We make conjectures informed by context and experience And we haven't a clue how to program that kind of intuitive reasoning which lies at the heart of common sense Futurists insist AI will soon eclipse the capacities of the most gifted mind but Larson shows how far we are from superintelligence and what it would take to get there Larson worries that we're making two mistakes at once defining human intelligence down while overestimating what AI is likely to achieve Another concern is learned passivity our

Postdigital Theologies Maggi Savin-Baden, John Reader, 2022-09-01 This book is about the relationships between technologies and the content of religious belief and practice A number of models are now starting to emerge but each of these depends on the theological or philosophical framework within which the debate is set At the same time there are dilemmas operating at different ends of the spectrum For example at one end there is a tendency towards subsuming the digital within the divine and at the other an instrumental stance relating to how technology is deployed Either of these stances could be said to ignore rather than acknowledge that the human itself is being changed as a result of the interactions with the digital The book explores the following areas Where is God to be found or present in the postdigital condition What are the implications of the postdigital condition for spirituality

and indeed for the activity of God through the Holy Spirit How do concepts of transhumanism or posthumanism effect understandings of the incarnation Does the doctrine of the Trinity need revisiting in the light of the digital as medium of relationship Does Creation now include the postdigital What of the Kingdom of God now that the kingdom of the Tech giants is so powerful all consuming
