Artists Compared By Age Sex And Earning In 1970 And 1976:

Artists Compared by Age, Sex, and Earning in 1970 and 1976 National Endowment for the Arts. Research Division, 1980

The purpose of this report is to examine the population of artists in terms of age sex and earnings and to compare the results from 1970 and 1976 An artist in this report includes people in the following categories actors architects dancers designers musicians and composers painters and sculptors photographers and radio and television announcers Highlights of the analysis report that the number of artists increased 50% from 1970 to 1976 from 600 000 to 900 000 but that median earnings remained the same at 7 900 The lack of increase in earnings is explained by the 50% increase in artists while positions for artists increased by only 23% The number of women in artistic occupations increased by 80% while males in artistic occupations increased by half that amount In 1970 artists personal earnings contributed 62% of their household earnings by 1976 the contribution had fallen to 44% Women were more dependent on other household members than men were and accounted for only a quarter of the total household income in 1970 and 1976 These data suggest that while artists personal earnings are relatively low artists tend to be members of households which compare closely with total household earnings of all professionals Although artists median personal earnings did not increase between 1970 and 1976 the total household earnings rose by 40% during this period The artists population is composed of relatively young people and is predominantly male From 1970 to 1976 the population became younger and the proportion of women artists increased The mid decade observation period was marked by a recession in which the rate of artistic unemployment increased more than all professional workers The difference reflects the increased proportion of young people women and blacks in artistic occupations because unemployment rates are generally higher for these groups Over 40 tables and figures display and support the findings APG

Craft Artist Membership Organizations, 1978 National Endowment for the Arts. Research Division, 1981 To describe what has been learned about craft membership organizations is the goal of this research report which utilizes data collected in a nationwide survey of craft organizations Specific purposes of the study were aimed at developing a better understanding of U S craft artists and organizations Findings indicated that a typical craft organization has existed for 10 years has 90 local members is involved in exhibits sales and workshops is a nonprofit corporation and has an annual budget of 3 500 Not all of its members work in the same medium but a majority work with clay or fiber mediums The largest number of the estimated 1 218 U S organizations is located in the east north central states while the highest number of artists resides in New England and the eastern south central states Over 60 percent of the responding organizations are involved in more than one craft medium Jury review as a prerequisite to membership is imposed by 30 percent of craft organizations Provided services and activities are frequently available to the

general public while special functions and publications tend to be oriented toward members Most of these organizations perceive themselves as having few serious problems there is also evidence that accelerated formation of crafts organizations occurred 5 to 10 years ago and that the current tendency is toward consolidation rather than expansion Figures tables and appendices are included JHP **Surveying Your Arts Audience** ,1985 Recognizing the need to conduct audience studies to aid in arts organizations policy development this manual was developed to inform arts organization personnel on how to conduct a valid survey to discourage poor surveys and raise the standards of audience information and to provide guidance on when survey consultants should be chosen as well as what to expect from a consultant in terms of audience survey specifications The manual can be used in a wide range of arts settings and includes survey questions as well as step by step instructions on planning conducting analyzing and presenting audience surveys Field tests were conducted to find out what the manual could do and site visits monitored the progress of five projects The manual contains six chapters 1 Why an Audience Survey 2 Developing the Questionnaire 3 Sample Design 4 Collecting Survey Data 5 Data Processing and 6 Interpreting and Presenting Survey Results An appendix of Model Survey Questions is included KWL *The Arts Public in the South* ,1984 Combining and integrating the results of two separate research projects concerned with leisure time participation this report compared southern and non southern involvement in arts related activities Findings indicated that while some regional differences do exist they are not great The desire to increase arts related activities is not as strong as the desire to increase less focused leisure activities but there appears to be a strong unmet demand for increased opportunities to participate in arts related programs including both visual and performing arts While southerners cite cost and accessibility as barriers to participation non southerners mention lack of time Achieved educational levels and prior exposure to the arts are significantly related to arts participation rates Singing in a chorus is the activity in which southerners are most clearly differentiated from the non southern population in terms of greater participation and demand Lack of talent was cited by southerners as a reason for non participation in contrast to non southerners response of lack of training Leisure pursuits of most southerners are not related to the type of work they do While the best predictor of current levels of participation is prior participation this factor was not confirmed with respect to the desire to increase participation in the future Seven tables and 24 figures are included JHP **Research Division Report** ,1976 **Resources in education** ,1987-09 **Artists compared by age, sex, and earnings in 1970 and 1976** ,1980 Audience Development National Endowment for the Arts. Research Division,1981 Several specific objectives have had wide recognition in the arts community namely to broaden the audience for the performing arts to determine the applicability of sophisticated tools of marketing to the problem of generating demand for the arts to find the best predictors of arts attendance and to develop strategies that will appeal to those who by these predictors are potential attenders This research report summarizes a study conducted in 1977 by Alan R Andreasen and Russell W Belk The investigators collected new audience data in a carefully

controlled group of surveys in four southern cities Atlanta Baton Rouge Columbia and Memphis and applied to these data a number of sophisticated measuring and marketing techniques to discover efficient and effective methods for inducing marginal attenders of the performing arts to become frequent patrons Although no hitherto untried means to this end were uncovered this publication makes advanced techniques more comprehensible and accessible to arts administrators In addition by analyzing characteristics that move or do not move people to attend performing arts events and from that analysis deriving strategies capable of altering factors that lead to nonattendance enough practical conclusions were reached to recommend an extended program of experimentation in the four cities studied BZ **Guide to Programs** National

Endowment for the Arts,1980 **Conditions and Needs of the Professional American Theatre** National Endowment for the Arts. Research Division,1981 Theater activity finances and employment are examined in a report which summarizes research findings and recommendations originally included in a two part study entitled The Conditions and Needs of the Live Professional Theatre in America Findings indicated that a substantial increase in federal funds is required to insure the future stability of professional theater in the United States Theater activity has increased regionally because of the growth of nonprofit regional theaters and the emergence of truck and bus touring operations Almost all of the current nonprofit theaters have been founded in the last 20 years resulting in significant changes in U S theater Theater audiences are better educated and more affluent than the general population That the economic effects of theatre production are substantial is supported by statistics indicating an almost 300 million dollar contribution to the national economy While total actor employment has increased it has not done so as quickly as union membership has grown and most actors receive low salaries The study concluded that in the future the theater may have to further control costs and raise revenues become more dependent on contributions or decrease its level of activity due to financial constraints Figures and tables are included JHP
