Aesthetics and the Embodied Mind: Beyond Art Theory and the Cartesian Mind-Body Dichotomy Alfonsina Scarinzi, 2014-11-24 The project of naturalizing human consciousness experience has made great technical strides e g in mapping areas of brain activity but has been hampered in many cases by its uncritical reliance on a dualistic Cartesian paradigm though as some of the authors in the collection point out assumptions drawn from Plato and from Kant also play a role The present volume proposes a version of naturalism in aesthetics drawn from American pragmatism above all from Dewey but also from James and Peirce one primed from the start to see human beings not only as embodied but as inseparable from the environment they interact with and provides a forum for authors from diverse disciplines to address specific scientific and philosophical issues within the anti dualistic framework considering aesthetic experience as a process of embodied meaning making Cross disciplinary contributions come from leading researchers including Mark Johnson Jim Garrison Daniel D Hutto John T Haworth Luca F Ticini Beatriz Calvo Merino The volume covers pragmatist aesthetics neuroaesthetics enactive cognitive science literary studies psychology of aesthetics art and design sociology **Mind's World** Alexander M. Schlutz, 2010-05-01 Winner of the 2009 International Conference on Romanticism s Jean Pierre Barricelli Award for the best book in Romanticism studies As the mental faculty that mediates between self and world mind and body the senses and the intellect imagination is indispensable for modern models of subjectivity From Ren Descartes s Meditations to the aesthetic and philosophical systems of the Romantic period to think about the subject necessarily means to address the problem of imagination In close readings of Descartes Kant Fichte Hardenberg Novalis and Coleridge and with a sustained return to the origins of the discourse about imagination in Greek antiquity Alexander Schlutz demonstrates that neither the unity of the subject itself nor the unity of the philosophical systems that are based on it can be conceptualized without recourse to imagination Yet philosophers like Descartes and Kant must deny imagination any such foundational role because of its dangerous connection to the body the senses and the unruly passions which threatens the desired autonomy of

the rational subject The modern subject is simultaneously dependent upon and constructed in opposition to imagination and the resulting ambivalence about the faculty is one of the fundamental conditions of modern models of subjectivity Schlutz's readings of the Romantic poet philosophers Coleridge and Hardenberg highlight that also their texts are not free of fears about the faculty's disruptive potential and its connection to the body While imagination is now openly enlisted to produce the aesthetic unity of subjectivity it still threatens to unravel and destroy a subject that needs to keep the body and its desires at bay in order to secure its rational and moral autonomy The dark abyss of a self not in control of its thoughts feelings and desires is not overcome by the philosophical glorification of the subject's powers of imagination *The Soul of Creation* (Shensi) Jing Zhang, 2021-06-01 This Key Concepts pivot explores the aesthetic concept of imaginative contemplation Drawing on key literature to provide a comprehensive and systematic study of the term the book offers a unique analysis and definition of the connotations of the term describing its aesthetic mentality and examining the issue of imaginative contemplation versus imagination in artistic creative thinking especially as regards the characteristics of contingent thinking in aesthetics It focuses on drawing parallels between imaginative contemplation and aesthetic emotions aesthetic rationality and artistic expression as well as aesthetic form Examining the relationship between imaginative contemplation and the aesthetic configuration the book provides a valuable introduction to aesthetic theory in Chinese philosophy and art

Psychoanalysis and the Act of Artistic Creation Luís Manuel Romano Delgado, 2022-09-26 This book explores the phenomenon of creativity and creation from a psychoanalytic point of view focusing on understanding the psychoemotional dynamics underlying artistic creative activities such as theatre literature and painting Throughout Delgado considers these works of art through a Bionian Kleinian and Freudian lens He uses three major psychoanalytic models of the creative process two of them classic the first Freudian based on the theory of conflict between impulse and defense the result of the effort to manage an excessive drive activity and in which the concept of sublimation is central the second Kleinian based on the attachment theory in which creative effort corresponds to an attempt to repair the damage done to the object or to the self and the third more recent affiliated with the more expanded attachment relationship theory based on W Bion's theory of thinking and emphasizing the continent's capacity for psyche and the oscillation between schizo-paranoid and depressive positions With illustrations throughout this book will be vital reading for anyone interested in the intersection of creativity the Arts and psychoanalysis

A Psychology of Artistic Creation as Evidenced in Autobiographical Statements of Artists Helen Evangeline Rees, 1942

Artistic Creation and Ethical Criticism Ted Nannicelli, 2020 Artistic Creation and Ethical Criticism investigates an idea that underpins the ethical criticism of art but is rarely acknowledged and poorly understood namely that the ethical criticism of art involves judgments not only of the attitudes a work endorses or solicits but of what artists do to create the work The book pioneers an innovative production oriented approach to the study of the ethical criticism of art one that will provide a refined philosophical account of this important topic as well as conceptual tools

that can guide future philosophizing and criticism

resistant to philosophical analysis Artists have long struggled to explain how they do what they do and philosophers have

struggled along with them This study does not attempt to offer a comprehensive account of all creativity or all art Instead it tries to identify an essential feature of an activity that has been cloaked in mystery for as long as history records Jeff Mitscherling and Paul Fairfield argue that the process by which art is created has a good deal in common with the experience of the audience of a work and that both experiences may be described phenomenologically in ways that show surprising affinities with what artists themselves often report

Cave Art Symbols Felicity Moreau, AI, 2025-03-29 Cave Art Symbols decodes the captivating world of prehistoric art exploring how early humans used cave paintings and petroglyphs to communicate record events and transmit cultural myths This exploration into ancient art provides a window into the cognitive abilities social structures and spiritual beliefs of our ancestors Intriguingly recurring symbols appear across geographically diverse sites suggesting a shared understanding or symbolic language among early human populations The book argues that cave art represents a sophisticated form of visual communication reflecting intentional and structured thought processes rather than random artistic expression The book adopts a multidisciplinary approach drawing from archaeology anthropology art history and cognitive science to analyze cave art It begins by introducing foundational concepts such as dating methods and preservation techniques before systematically examining recurring symbols and motifs Later chapters reconstruct potential narratives depicted in the art offering interpretations of hunting scenes and ritualistic practices Ultimately Cave Art Symbols offers a fascinating glimpse into the minds of early humans challenging conventional understandings of their communication and artistic expression
