Encyclopedia of African Airlines Ben R. Guttery, 1998 The rainy season terrain and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa This lack of modern infrastructure has been overcome in some part by the development of air transportation Hundreds of carriers both small and large government owned and private have connected all parts of the continent Together they have had a tremendous impact on the African economy and the people Country by country this comprehensive reference work provides brief histories of over 700 airlines in 54 African

nations Each entry has the years of operation of the carrier along with information on its origin growth and route structure Aircraft usage including registration numbers and nicknames is covered in many cases Any crashes involving aircraft in the carrier s fleet are also noted An appendix gives the location of all major African airports Terror Reigns Again! networking This is the way nature intended Fear and insecurity is or was hindering progress The main reason behind the 9 11 attacks to hinder us from advancing through the development process by making everyone insecure and fearful that defense becomes our priority To keep us spending more on defense and the military something that worked years ago as we ended up having wars But the world is changing We are changing too We have realized that our only enemies are ourselves Our leaders are becoming cleverer too realizing that we ought all to be friends The problem is that even though we have no enemies anymore we are still spending trillions on defense the military and on weapons This is the real problem a time bomb Imagine the world s population growing unabated Imagine weapon s stock levels growing too Imagine the ecological imbalance caused as we spend more and more on defense without fighting wars anymore This is a ticking time bomb because any friction will end up in a world war that will result in the extinction of humans That is the reason why a few nations now pretends to fight those believed to have Weapons of Mass Destruction but in actual fact they are making wars in order to gather resources to actually make Weapons of Mass Destruction Their reasons to prevent the extinction of humans Is this a justification for making WMDs Surely there are ways of preventing the extinction of mankind Why not just convince our leaders that there are no aliens or dinosaurs and our only enemies are ourselves Surely we can evolve away from defensive economies Can we really let these people make WMDs that will eliminate more than two thirds of the population on our watch You decide
