An Air Transport Strategy for Northern Ireland Great Britain: Parliament: House of Commons: Northern Ireland Affairs Committee, 2012-11-30 Air travel is fundamental to family and economic life in Northern Ireland To facilitate the rebalancing of the economy it is vital the air links to Great Britain mainland Europe and the rest of the world are robust The Committee identified in this report several hurdles to overcome Air Passenger Duty APD despite the APD on direct long haul flights being reduced to zero this does not assist the 98.5 per cent of passengers who travel from NI airports on short haul flights Ways to reduce or preferably abolish APD on all flights into NI from GB and on all direct flights from Northern Ireland to any destination should be explored Connectivity air links to hub airports particularly Heathrow must be at least maintained at the current level and further routes should be actively sought Airports Commission review the review is being carried out by the Airports Commission into options to maintain the UK's status as an international hub for aviation As this report is not due until 2015 and the delay as to the future airport configuration and capacity in the South East of England is causing concern among the business community in Northern Ireland The Committee urged the Government to expedite the review and its decision as soon as possible given its importance to Northern Ireland's international connectivity Internal access to Northern Ireland's airports road and rail links to all three of NI's airports must be improved Visas there should be introduced between the UK and Irish Government a shared visit visa for the UK and the Republic of Ireland as the current cost of two visas deters both business and leisure travellers from visiting both jurisdictions on a single visit

Aviation Markets David Starkie, 2008 This volume is a collection of 17 papers selected from David Starkie's extensive writings over the last 25 years Previously published material has been extensively edited and adapted and combined with new material published here for the first time The book is divided into five sections each featuring an original overview chapter to better establish the background and also explain the papers wider significance including wherever appropriate their relevance to current policy issues These papers have been selected to illustrate a significant theme that has been relatively neglected thus far in both aviation and industrial economics the role of the market and its interplay with the development of economic policy in the context of a dynamic but partly price regulated industry The result provides a strong

flavour of how market mechanisms and particularly competition can operate to successfully resolve policy issues *ITF*
