Alas Poor Darwin:

Alas Poor Darwin Hilary Rose, Steven Rose, 2010-12-15 Today genes are called upon to explain almost every aspect of our lives from social inequalities to health sexual preference and criminality Based on Darwin's theory of evolution and natural selection Evolutionary Psychology with its claim that it's all in our genes has become the most popular scientific theory of the late 20th century Books such as Richard Dawkins's *The Selfish Gene* Edward O Wilson's *Consilience* and Steven Pinker's *The Language Instinct* have become bestsellers and frame the public debate on human life and development we can see their influence as soon as we open a Sunday newspaper In recent years however many biologists and social scientists have begun to contest this new biological determinism and shown that Evolutionary Psychology rests on shaky empirical evidence flawed premises and unexamined political presuppositions In this provocative and ground breaking book Hilary and Steven Rose have gathered together the most eminent and outspoken critics of this fashionable ideology ranging from Stephen Jay Gould and Patrick Bateson to Mary Midgley Tim Ingold and Annette Karmiloff Smith What emerges is a new perspective on human development which acknowledges the complexity of life by placing at its centre the living organism rather than the gene

Retreat of the Social, The Bruce Kapferer, 2005 *Missing the Revolution* Jerome H. Barkow, 2006 The naturalizing perspective of Darwinian thought has become one of the major intellectual currents of our time pervading contemporary understandings of human nature and society Unfortunately many social scientists in sociology psychology and sociocultural anthropology have failed to engage with it Barkow asks his fellow social scientists to put aside their all too common preconceptions and stereotypes of the biological and to consider a powerful argument that is far different from that of those who once invoked a vocabulary of genes and Darwin as a justification for genocide He argues that the theoretical perspective that has been so successful when applied to the behavior of every other animal species can be applied just as successfully to our own and that the real debate is about how to apply it **BOOK JACKET** **The Miseducation of Women** James

Tooley, 2003-01-04 To what extent has feminism benefited women To what extent have women really been liberated James Tooley argues that the implication of many women's testimony is that feminism so far has failed to deliver the promised benefits and has even in some ways proved harmful Bringing together many women's voices from Bridget Jones to Simone de Beauvoir he provides a radical rethinking for feminism and sexual politics in the 21st century **Darwin's Bards** John

Manson Case, 2000-12-20 The Divine Spark is the emotional story of a young scientist in Atlanta who wins the Nobel Prize for Medicine for re-sparking life into mice after death The discovery triggers an attempt by a powerful group of people with a

hidden agenda to control and use the research for an extraordinary purpose The young scientist is emotionally devastated by the death of his wife while the powerful group drives him into attempting to re spark life into a dead gorilla and later a human He deals with animal and human rights protestors Washington politicians and even a voodoo ceremony Driven to perform his gruesome acts at several locations on his way to the Nobel Prize ceremony in Stockholm Sweden Will the motive of the group come to light Will human tradition survive this ordeal Experience the twists and turns firsthand with The Divine Spark

The Transmission of Affect Teresa Brennan, 2014-02-15 The idea that one can soak up someone else s depression or anxiety or sense the tension in a room is familiar Indeed phrases that capture this notion abound in the popular vernacular negative energy dumping you could cut the tension with a knife The Transmission of Affect deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another The ability to borrow or share states of mind once historically and culturally assumed is now pathologized as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life To neglect the mechanism by which affect is transmitted the author claims has serious consequences for science and medical research Brennan s theory of affect is based on constant communication between individuals and their physical and social environments Her important book details the relationships among affect energy and new maladies of the soul including attention deficit disorder chronic fatigue syndrome codependency and fibromyalgia
