*Alcohol, Gender and Culture* Dimitra Gefou-Madianou, 2002-01-04 Europeans constitute 12 and a half per cent of the world's population but consume 50 per cent of the recorded world production alcohol and this consumption plays a significant role in the cultural religious and social identities of these countries. The contributors show how different groups define the proper use of alcohol how State policies may effect drinking behaviour and highlight how beverages and comestibles must be seen in relation to each other. From this is it shown how important socio cultural distinctions are made between and within communities gender relations ethnic groups and socio economic groups and within religious ideologies what one drinks how one drinks with whom and where all influence not how alcoholic substances are regarded but how social relations are experienced. *Alcohol Gender and Culture* clearly demonstrates how the social construction of drinking may provide an analytical tool with which to approach different socio cultural groups and illustrates how any cultural group can be compared to another by its attitudes to alcohol. It will be invaluable reading for students and lecturers of anthropology cultural history and gender studies.

[Handbook of Gender, Culture, and Health](#)  
Richard M. Eisler, Michel Hersen, 2012-10-02 This Handbook illustrates how gender ethnicity age and even sexual orientation and understanding influence the health practices and risk factors for health problems in diverse groups of people. **Fragmented Intimacy** Peter J. Adams, 2007-12-20 I recall during my early years as a clinical psychologist being asked by hospital staff to speak with a 32 year old man addicted to alcohol who was being discharged following treatment for pancreatitis This had been his third admission for the same illness and hospital practitioners were exasperated by his choice to continue drinking despite being repeatedly told it would cause irreparable damage to his pancreas from which he would be unlikely to survive I met him in a side room on the ward He sat in his pyjamas in the corner of the room thin and ashen looking with a worried frown fixed across his face Our conversation was initially stilted and I was trying hard not to replicate the lectures and sermons he was likely to have already received from hospital staff As we talked I was able to piece together bits of information about his current circumstances he lived alone he was unemployed and his only family contact was with a brother who visited to check on him occasionally He started to relax into the conversation and then talked about his long struggles with alcohol his drinking had begun in his early teens it had provided him with confidence and friendships he had had some serious motor vehicle accidents he had tried to stop drinking but soon continued he had lost friends jobs and family relationships and in response he had increasingly sought intoxication as a refuge

European countries Should heavy drinking cultures be seen as a mainstream youth phenomenon or as marginal and is this different in different countries A team of leading researchers addresses these questions and more in their analysis of the alcohol consumption patterns of European young people Alcohol consumption is an important marker of transition from childhood to early adulthood yet the timing intensity and purpose of adolescent drinking varies dramatically between countries The contributors provide cross national comparisons to investigate how drinking behaviour varies examining factors such as gender societal context and family socio economic backgrounds Youth Drinking Cultures offers a comprehensive set of perspectives on adolescent drinking in Europe In linking issues around social identity and the life course with a highly topical area of media and policy concern the book will be of great value to sociology and social policy scholars especially youth researchers and also to professionals working with young people
