## **Alcoholism As An Allergy:**

**This Strange Illness** Jared Lobdell, 2004-01-01 This brilliant work both personal and professional in character is a study of alcoholism of a movement aimed at its cure and of an individual participant in this development The author develops an interlinked theory and scientific research program that describe an illness of the mind body and spirit He does so without allowing the assumptions underlying the way we look at one area of illness say the mind to contradict the assumptions underlying the way we look at the human body or for that matter the human spirit That Lobdell carries this project to a successful conclusion makes this a compelling work for everyone in the field of alcohol studies and social pathology Lobdell who has written on a broad range of subjects here argues the originality and importance of recognition of alcoholism as a tripartite illness and of congruent treatment for the three parts He thus accepts a medical view of this vast social problem but also recognizes dimensions within it that go beyond the ordinary limits of medical practice as well as the complexity of its treatment His book is at once an intellectual history of Bill W's vision a short history of alcohol addiction and the culture of that addiction a treatise on the psychological biochemical and spiritual aspects of the illness and its treatment and a scientific research program for the future Norman K Denzin of the University of Illinois has hailed the book as a wonderful story brought to a sophisticated readership and will widely appeal to the recovering population Matthew J Raphael intimate with the subjects as well as the concerns of this book says This Strange Illness is an astounding book Jared Lobdell a brilliant polymath traverses a spectrum of disciplines from biogenetics and chaos theory to psychology sociology and theology in search of a sufficiently complex and comprehensive understanding alcoholism This is the most intellectually rigorous study I have ever seen in the field Jared C Lobdell is author or editor of a dozen books in history and criticism and a number of articles in fields ranging from alcohol studies to systems analysis He has served as a fellow at the Center for Alcoholism and Addiction Studies Brown University His current positions are at Millersville University of Pennsylvania and adjunct professor at Elizabethtown College in Pennsylvania Alcoholism as an Allergy Mary Greeley, 1996 **The Alcoholic Society** Reece McGee, 2017-07-12 Offering a unique theoretical foundation to understanding the lived experience of the active alcoholic Denzin asserts that alcoholism is a disease in which negative emotions divide the self into warring inner factions fueled and distorted by alcoholic intoxication The work is solidly anchored in a long term study of the socialization experiences that began in alcoholism treatment centers and continue in Alcoholics Anonymous recovery programs It covers the treatment process the restructuring of self the alcoholic's interaction with his recovery treatment program and the modalities of self transcendence that result from treatment Addiction Robert P. Vande Kappelle, 2019-05-24 What is addiction and how do we know if we are addicted Speaking sociologically we are addicted because we live in addictive societies that turn us into consumers and materialists Speaking biologically we are addicted because that is how we are hardwired Speaking spiritually we are addicted because we seek spiritual satisfaction through things other than God Humans can be addicted to most any

object ideology and belief but they cannot be addicted to the true God for reasons disclosed in this text As this book demonstrates addiction is a pattern of learned behavior that utilizes ancient mental pathways designed to promote survival and reproduction When neural connections intended to promote eating reproduction parenting and social relationships are diverted into addiction their blessings can become curses While heredity parenting trauma and additional psychological and sociological factors play significant roles in compulsive behavior addiction is essentially a developmental disorder a way to manage an environment that feels threatening and overwhelming Change getting unstuck is possible but it requires five ingredients acknowledgment resolution substitution human help and divine help Because addictions represent complex interactions between biological psychological social and spiritual forces the solution must be holistic as well Designed as a study guide for groups or individual use this book approaches the topic comprehensively examining the nature of addiction its cause symptoms consequences and means of recovery      **Alcoholism Treatment Rebirth** Kenneth

Anderson,2025-03-30 This book covers the alcoholism treatment facilities established between the Repeal of Prohibition in 1933 and 1956 when it is erroneously believed that the American Medical Association declared alcoholism to be a disease This book blows out of the water the myths that AA invented the disease theory that Hazelden invented treatment that everyone flocked to Hazelden to learn how to do treatment and that AA convinced the American Medical Association to declare alcoholism to be a disease This book shows how the scholars at Yale University created a coast to coast science based alcoholism treatment industry in the 1940s and 1950s This book further demonstrates how Hazelden and its close ally the Johnson Institute hijacked this science based alcoholism treatment industry in the 1960s and 1970s and replaced it with one based on mysticism and faith healing These are the events which have led to the current divorce of addiction treatment from addiction science This book also chronicles the rebirth of pre Prohibition secret aversion treatments in the hands of new entrepreneurs such as HALCO Laboratories and the Samaritan Institutions and shows how Shadel Sanitarium turned these nostrums into legitimate scientific medicine This book also covers the Salvation Army Volunteers of America and other faith based programs Finally this book shows how AA groups set up AA indoctrination programs in general hospitals throughout the country starting in the 1930s Kenneth Anderson is an extremely important voice on addiction penetrating original and deeply wise Johann Hari author of Chasing the Scream      *Sanitariums, Hospitals, and the Belladonna Cure* Kenneth

Anderson,2022-11-16 This book covers the history of for profit institutions for the treatment of drug and alcohol habits which were established prior to the Repeal of Prohibition as well as a number of miscellaneous entities such as mail order opium cures These include the famous Charles B Towns Hospital and its notorious belladonna cure Although many people know that Alcoholics Anonymous founder Bill Wilson was treated with the belladonna cure at the Charles B Towns Hospital few are aware that Towns was an insurance salesman with an eighth grade education and no medical training who lied about inventing an addiction cure that he got from someone else that Towns had also been a stockbroker who was convicted of

grand larceny after embezzling money for his clients and that Towns only decided to make a buck in the addiction cure business after being banned from stock trading Furthermore in the 1910s Towns proposed that state government should force drug addicts to take his cure against their wills and that death camps should be built to exterminate anyone who relapsed after taking his cure This book also tells the story of Harry Hubbell Kane who founded the De Quincey Home for the cure of drug addicts in 1881 After the De Quincey Home failed in 1883 Kane invented and marketed a notorious patent medicine named Scotch Oats Essence Scotch Oats Essence was comprised of one third alcohol and each ounce contained about a half a grain of morphine It seems that Kane had decided that if he couldn't make money by curing drug addicts he could make a lot of money by creating them These are only two of hundreds of addiction treatment facilities which existed prior to the founding of AA some good some bad and some indifferent These stories and many more can be found in this book

**Alcoholism** John Wallace,1985 Written by a pre eminent authority Alcoholism New Light on the Disease is now a classic Considered by professionals an essential book on the root causes of chemical dependency and alcoholism in particular this an accessible reference also for the non professional because of its clarity and highly readable language

**The History of Problem Gambling** Peter Ferentzy,Nigel Turner,2013-03-26 This book documents the history of ideas about problem gambling and its link to addictive disorders The book uses a combination of literature review and conceptual and linguistic analysis to explore the way ideas about problem gambling have changed over time It examines the religious socio cultural and medical influences on the development of the concept of problem gambling as a disease along with the ways in which such ideas were influenced by attitudes about substance abuse The history of mental illness notably as it pertains to themes such as loss of control over behavior is also addressed The book ends with a discussion of the current status and future prospects with an eye to which ideas about problem gambling and addictions seem most promising and which should perhaps be left behind

**Addiction and Choice** Nick Heather,Gabriel Segal,2017 Views on addiction are often polarised either addiction is a matter of choice or addicts simply can't help themselves But perhaps addiction falls between the two This book contains views from philosophy neuroscience psychiatry psychology and the law exploring this middle ground between free choice and no choice

Alcoholism William J. Haugen Light, 1985 Behavioral Treatment of Alcohol Problems M. Sobell, 2013-03-09 Ideas about the nature of alcohol problems have been undergoing dramatic change over the past several years This book summarizes the clinical research we have conducted over the past eight years research which has evoked controversy and which we hope will be evaluated as having been influential in the development of a scientific approach to the clinical treatment of alcohol problems Although we reference many studies from the general behavioral literature on alcohol problems we make no pretense of presenting a thorough review of that literature By and large this book focuses on the research we have conducted the rationale for that approach and a detailed discussion of methods and results which cannot be presented in journal articles The book begins by giving the reader a perspective on traditional concepts in the alcohol field and why those concepts are now being challenged Within that conceptual framework we then trace the development and sophistication of our clinical research presenting for the first time in a single work a complete consideration of the rationale methods and results of the study of Individualized Behavior Therapy IBT for alcoholics Following a discussion of many of the more subtle aspects of that study and its results we describe how IBT can be used in an outpatient setting the setting in which we have conducted clinical research for the last six years
