The Contemporary Novel Irving Adelman, Rita Dworkin, 1997-10-09 In this new edition what was already an expansive work has been updated and further enlarged to include information not only on American and British novelists but also on writers in English from around the world

Haphazard Reality: Half a Century of Science Hendrik B.G. Casimir, 2020-09-23 An outstanding scientific autobiography I remain impressed by its thoughtfulness and charm Steve K Lamoreaux American Journal of Physics A rich autobiography and history of atomic physics One is impressed by Casimir's memory for detail and zeal to find corroboration for the stories he tells And they are splendid tales Gamow's playful pranks in Copenhagen conversations with Lev Landau ardent revolutionary but no Marxist the tragedy of Ehrenfest who killed himself after shooting his hopelessly retarded son A charming idiosyncratic and meaningful account of events and personalities that changed physics Kirkus I myself read this book with fascination meeting old friends such as Gamow Landau Kramers and learning much more about them Also in the book are character sketches of those who made physics in the Netherlands such as Lorentz Kamerlingh Onnes and Ehrenfest the latter remembered with the greatest affection by the author Sir Nevill Mott Contemporary Physics The book contains a valuable entertaining and insightful collection of vignettes of many of the physicists Casimir has associated with Lorentz Ehrenfest Bohr Pauli with whom he studied Goudsmit Uhlenbeck Landau Gamov members of his own generation Kramers Gorter de Haas colleagues in Dutch academic circles Holst and Loupart colleagues at the Philips Laboratories Haphazard Reality also offers valuable insights into Dutch middle class culture and a rewarding overview of Dutch educational and scientific establishments Casimir is a master at deftly and sensitively conveying the psychological ambiance of his surroundings His description of the brilliant young theoretical physicists around Bohr in the early thirties conveys not only the style of doing physics but also delineates the issues addressed by outlining the content of their researches S S Schweber 4S Review Engaging reminiscences by an important Dutch physicist of conversations with the major contributors to 20th

century physics An overly modest but otherwise balanced account of his own experiences and contributions from his early years at Leiden to his directorship of the Philips Laboratory The Antioch Review Haphazard Reality paints a vivid and insightful picture of the development of modern physics Steve K Lamoreaux Proceedings of the American Philosophical Society *Psychological Perspectives on Reality, Consciousness and Paranormal Experience* Tony Jinks, 2019-10-03 This book explores various explanatory frameworks for paranormal encounters It opens with the story of an inexplicable human figure seen crossing a secluded hotel corridor interpreted as a ghost by the sole witness The subsequent chapters explore the three most important historical perspectives accounting for this and other types of paranormal experience Each perspective is examined from first principles with specific reference to what happened in the corridor how it happened why it happened and who might be responsible The first perspective considers the experience to be legitimate to be something real and various possibilities are presented that are grounded in the paranormal and parapsychological literature among which a ghost is one putative explanation In turn the second perspective treats the experience as being wholly illegitimate With reference to psychological theory the ghost sighting is a product of erroneous consciousness The third perspective is different yet again and considers the sighting to be authentic but argues that explaining the ghost requires a radical departure from conventional models of reality and consciousness By contrasting these three paths the book provides a valuable resource for readers interested in the philosophical and psychological origins of explanations for paranormal experiences from the 19th century to the present It will appeal to general readers in addition to students and scholars of parapsychology anomalistic psychology and consciousness studies **Returning to Reality** Phillip M. Thompson, 2012-11-14 This book synthesizes the diverse reflections on technology by monk and spiritual writer Thomas Merton to develop a compelling contemplative critique of the threats and challenges of nuclear war communication technologies and biotechnologies that may alter what it means to be human At the core of his critique Merton opposes a technological mentality that favors processes of efficiency and utility at the expense of our ultimate purpose a quest for the wisdom to guide us to the divine source of our being and reality To counter this modern idolatry Merton's insights offer a path of reflection balance and community More specifically Merton offers some constructive approaches and healing possibilities through a balanced approach to work a careful and intentional managing of technology and an accessing of the recuperative dimensions of nature In its conclusion the book brings the insights of these chapters together for a final reflection on how to maintain our humanity and our spiritual integrity in a technological world Space Travelers and the Genesis of the Human Form Joan D'Arc, 2000 Can Darwinian evolution actually prove that we are alone in the Universe This book illustrates that Darwinian evolution is not an empirically predictable or testable scientific paradigm Also shows that ancient artifacts on Mars and the Moon are evidence of Game Wardens in our own solar system Could the Earth be a controlled DNA repository for the ongoing creation and dissemination of life forms including humans The author puts forth

compelling evidence in this well researched work *Mindfulness, Now and Zen: The sceptics guide to Ultimate Reality*
Wally Barr, 2017-02-22 This book explores how each of us knows what we know It considers claims that we see only illusions and that behind it all there is an indescribably beautiful reality both a God and a Nirvana The book goes on to explain in simple terms how these two ideas so different on the surface may not be so different at all Ranging across the centuries the book draws on the teachings of a wide variety of thinkers from vastly different cultural philosophical and religious backgrounds The message they each bring is distilled into one consistent story in which our everyday sense of reality can be thought of as a deceptive and rather pale reflection of what s really going on And although our thinking processes are seriously limited the book describes how we can all transcend these limitations and experience Ultimate Reality through the simple practice of mindfulness for mindfulness meditation offers freedom from thinking Future of Hope and Present Reality
Andrew Chester, 2012 This book is the first of a two volume work with the overall title Future Hope and Present Reality These volumes had their origin in the Speaker s Lectures that Andrew Chester gave in Oxford their main focus is central themes in biblical eschatology and especially the apparent contradictions between what is hoped for in the future and what is experienced in the present the stark discrepancy that is between the world as it is and the world as it should be In this first volume as the subtitle Eschatology and Transformation in the Hebrew Bible indicates the author is concerned with the Hebrew Bible or Old Testament the second will be on the New Testament He deals successively with central eschatological themes and the deep tensions they involve divine threats of an absolute end to human life and to the world itself and divine promises of blessing and transformation along with the theological questions inevitably raised by these both in themselves and in relation to each other the whole phenomenon of prophecy and the problems it involves not least whether it can be taken seriously in face of the contradictions and failures it manifests He discusses the sheer discrepancy between ideal and reality in traditions relating to kingship along with the tensions inherent in the emergence of messianic hope death as representing the end of any relationship with God along with hope that goes beyond death in relation both to the individual and also the nation and finally visions of a transformed and paradisaal world and whether these can bear any relation to reality It is argued that the Hebrew Bible can be seen to offer genuine grounds for hope but that these can have any cogency only if the problems involved are really engaged with *Reality Check* Pivot, 2020-09-10 For readers of The Celestine Prophecy this is what you ve been waiting for Reality Check was written for everyone else who knows that we re on the verge of pushing Mother Nature and the economy to the breaking point Reality Check shows the urgent need to reverse humanity s downward spiral by undoing the status quo Half the book is filled with quotes from the likes of Chomsky Sagan Carlin Goodall Soros Orwell Asimov Hegel William James Sting and the Beatles as well as some of the most popular TV shows and movies This over the top attempt to avert an evolutionary crash hopes instead to turn the situation into an evolutionary bounce by galvanizing members of the so called choir who already understand that the status quo needs to be revamped

Otherwise civilization as we know it won't last much longer. The book addresses everything from parenting to economics, political systems to global warming and general environmental destruction as well as sociology, history, and God. It's time for a reality check. What are you waiting for?
