The Allergy Survival, Guide.: The Complete Step-by-step Handbook for Practical Living Jane Houlton, *Winning against ALLERGIES*, 2011-03-11

Allergies are abnormal reactions to ordinarily harmless substances. The sensitizing substances called allergens may be inhaled, swallowed, or come into contact with the skin. Allergens that most frequently cause problems are pollens, mold spores, house dust, mites, animal danders, foods, insect bites or stings, plants, insect spores, latex, rubber, viruses, bacteria, medications, and environmental conditions such as cold, heat, or humidity. Allergic reactions occur after the immune system mistakenly learns to recognize innocent foreign substances or allergens as potentially harmful. Most people who suffer from allergies have to face aggravating conditions that interrupt their lifestyle. Almost all those who suffer from allergies seek medical help, and yet in most cases they continue to suffer despite their efforts to find relief and cure. Is allergy relief possible? How much can we do to help ourselves? Can we win against this onslaught to our systems? This volume from the HEAL series gives you the information you need to win against allergies.
