Air Power in Three Wars William Momyer, 2012-06-22 This insightful work documents the thoughts and perspectives of a general with 35 years of history with the U S Air Force General William W Momyer The manuscript discusses his years as a senior commander of the Air Force strategy command and control counter air operations interdiction and close air support His perspectives cover World War II the Korean War and the Vietnam War **Airpower in Three Wars (WWII, Korea, Vietnam).** , 2003 When I received the request to update my 1978 foreword to this book I thought it might be useful to give my perspective of some aspects on the employment of airpower in the Persian Gulf War the Air War over Serbia Operation Allied Force and the war in Afghanistan Operation Enduring Freedom It is not my intent to analyze air operations in these wars but to see if there are trends that might be appropriate for another war I was particularly interested in the application of established airpower doctrine since I was deeply involved with it throughout my career The Gulf War in many respects had many features of World War II The first requirement in World War II was to gain and maintain air superiority to have freedom of action to carry out the destruction of Germany s ability to wage war and to create the most favorable conditions for the invasion of Europe Operation Overlord It was mandatory to establish air superiority so that the German air force wouldn t be able to attack the highly vulnerable landing force and the subsequent breakout A vigorous interdiction campaign was initiated 60 days prior to the invasion to seal off the landing areas Just prior to the assault all airpower was turned to direct support of the landing force As history records air superiority was established and maintained the area was successfully sealed off from German forces trying to get at the landing force and all Allied airpower was directed to close air support until the main force had landed and operations were underway to engage the main forces of the Germans It is of special interest that the German air force was able to fly only a few sorties and those had no significant effect *Tactical Air Power and the Vietnam War* Phil Haun, 2024-01-18 A theory of tactical air power explaining US air power effectiveness in Vietnam and the modern air wars that followed **Interservice Rivalry and Airpower in the Vietnam War** Dr. Ian Horwood, 2012-05-28 The objectives of this study are to establish the nature and levels of rivalry and dispute between the

United States armed services over matters relating to the military application of airpower during the Vietnam period and to assess the extent to which such rivalry may have distorted US operational policy in Southeast Asia It is probably a truism to suggest that interservice rivalry has always been endemic among military establishments in the modern age yet there are few monographs that deal specifically with the subject Presumably interservice rivalry is so commonplace that it excites little comment among military historians and analysts except in passing However if interservice rivalry is so typical of military organisms then it constitutes one of their defining characteristics and is worthy of study for this reason alone

Airpower in Three Wars: WW2, Korea, and Vietnam Air University Air University Press, William W. Momyer, 2019-07-16 This publication is a reprint of General Momyer's book originally published in 1978 The book offers the general's observations many from personal experience of airpower in World War II Korea and Vietnam It is an account of the evolution of practical airpower through strategies and campaigns The book examines strategy command and control of airpower prior to and during the Vietnam conflict air superiority interdiction in all three wars airpower and the ground battle and experiences in blunting an attack using airpower

Air Power and Warfare Alfred F. Hurley, Robert C. Ehrhart, 1979

Air power and warfare the proceedings of the 8th Military History Symposium United States Air Force Academy 18-20 October 1978, Air Power And The Ground War In Vietnam, Ideas And Actions Dr Donald J. Mrozek, 2015-11-06 Ultimately this study is about a smaller Vietnam War than that which is commonly recalled It focuses on expectations concerning the impact of air power on the ground war and on some of its actual effects but it avoids major treatment of some of the most dramatic air actions of the war such as the bombing of Hanoi To many who fought the war and believe it ought to have been conducted on a still larger scale or with fewer restraints this study may seem almost perverse emphasizing as it does the utility of air power in conducting the conflict as a ground war and without total exploitation of our most awe inspiring technology Although the chapters in this study are intended to form a coherent and unified argument each also offers discrete messages The chapters are not meant to be definitive They do not exhaust available documentary material and they often rely heavily on published accounts Nor do they provide a complete chronological picture of the uses of air power even with respect to the ground war Nor is coverage of areas in which air power was employed South Vietnam Laos Cambodia and North Vietnam evenly distributed nor necessarily proportionate to the effort expended in each place during the war Lastly some may find one or another form of air power either slightly or insufficiently treated Such criticisms are beside the point for the objectives of this study are to explore a comparatively neglected theme the impact of air power on the ground and to encourage further utilization of lessons drawn from the Vietnam experience

Gulf War Air Power Survey, 1993 *Air Power and Warfare* United States Air Force Academy. Library, 1978

Airpower in Three Wars Office of Air Force History, U. S. Air U.S. Air Force, 2015-02-12 I began working on this book some months ago when a number of colleagues asked me to record my thoughts about the employment of airpower especially tactical airpower after 35 years in the profession I hadn't any illusions

of being blessed with special wisdom but as they said no one else shared exactly my perspective on tactical airpower and other professional airmen might find it useful to know how I saw things particularly during the Vietnam years whether they happened to approve of my perceptions or not Very soon I realized that my perspective was in fact several perspectives and none of them could be maintained in perfect isolation from the others I had watched strategy tactics and technology evolve and all three of these evolutions fascinated me in recollection I had seen tactical airpower from the viewpoints of the greenest fighter pilot in 1939 the senior air commander in our longest war and almost every position in between dozens of perspectives there and all of them seemed valid and important to me So my problem became one of choosing from among my many perspectives the few that seemed likely to offer the most to other airmen Although I take most delight in recalling my experiences as a young fighter pilot I had to admit that there s probably nothing unique about that perspective Hundreds of others shared about the same experiences and could describe them as well or better than I Thus I turned away fellow fighter pilots will understand how difficult this was from the temptation to spin stories about those days *Air Power and National Security* ,1985 *Air Power in Modern Warfare* Jasjit Singh,1985
