

Ak L 17 Sea Stars

Daniela Niemeyer

Ak L 17 Sea Stars:

Sea Stars of British Columbia, Southeast Alaska, and Puget Sound Philip Lambert, Royal British Columbia Museum, 2000 In this expanded and revised edition of Sea Stars of British Columbia originally published in 1981 Philip Lambert describes 43 species and subspecies of sea stars in the coastal waters of northwestern North America Lambert has expanded the geographic area to include the region from Glacier Bay in southeastern Alaska to the waters of Juan de Fuca Strait and Puget Sound of northern Washington The sea star fauna of this region is the most diverse of all the temperate waters of the world The great age of the Pacific Basin and the varied habitats along this complex coastline created by scouring glaciers and other natural forces have stimulated the evolution of many new forms Although he covers the coastal waters down to 200 metres below the surface Lambert lists 26 more species that live below 200 metres and 14 others that occur just outside the region covered by this book

Merchant Vessels of the United States, 1978 From 1894 95 1935 36 pt 6 of each volume is issued separately with titles 1894 95 1902 03 Code list of merchant vessels of the United States 1903 04 1935 36 Seagoing vessels of the United States
