long established species and immigrants from the subtropics Aspects of fishing ecology and aquarium keeping were also included in this work In addition the preservation of cephalopods was also addressed It would be very welcome if in the future more people would concern themselves with the care and preservation of the wondrous and multifarious inhabitants of the North Sea For unfortunately many of the species shown here seem to be largely unknown to a wider public which is why they hardly seem to have a real lobby in practice So we should better get to know our endemic species before they become extinct
