Alchemical Active Imagination:

Alchemical Active Imagination Marie-Louise von Franz, 2017-06-13 A leading Jungian psychologist reveals the relationship between alchemy and analytical psychology delving into the visionary work of a sixteenth century alchemist Although alchemy is popularly regarded as the science that sought to transmute base physical matter many of the medieval alchemists were more interested in developing a discipline that would lead to the psychological and spiritual transformation of the individual C G Jung discovered in his study of alchemical texts a symbolic and imaginal language that expressed many of his own insights into psychological processes In this book Marie Louise von Franz examines a text by the sixteenth century alchemist and physician Gerhard Dorn in order to show the relationship of alchemy to the concepts and techniques of analytical psychology In particular she shows that the alchemists practiced a kind of meditation similar to Jung s technique of active imagination which enables one to dialogue with the unconscious archetypal elements in the psyche Originally delivered as a series of lectures at the C G Jung Institute in Zurich the book opens therapeutic insights into the relations among spirit soul and body in the practice of active imagination

Alchemical Active Imagination Marie-Luise von Franz, 1979 **Alchemical Active Imagination**, 1987 Jung and the Alchemical Imagination Jeffrey Raff, 2000-11-15 Jung and the Alchemical Imagination illustrates the spiritual nature of Jungian psychology and the debt it owes to the tradition of esoteric religion Unlike other books on Jung and alchemy which contain a psychological interpretation of alchemical material this work uses alchemy to understand the three cornerstones of Jungian spirituality the self the transcendent function and active imagination Through the interpretation of alchemical imagery Raff explains the nature of these three concepts and illustrates how together they form a new model of contemporary Western spirituality This book is also unique in selecting alchemical texts for analysis that are relatively unknown and which for the most part have never been interpreted In addition he presents two new concepts the ally and the psychoid realm Through the addition of these ideas and the new understanding that they offer it is possible to apply alchemical imagery to transpsychic experience that is to a world of spirits which may not be reduced to psychological concepts By including this realm in the study of alchemy and Jungian thought it is possible to gain insights into the nature of visionary and ecstatic experiences that form part of the path of individuation the road to completion
