Alcoholism Behavioral Research Therapeutic Approaches:

Alcoholism; Behavioral Research, Therapeutic Approaches Ruth Fox, 1967 **The Biology of Alcoholism** Benjamin Kissin, Henri Begleiter, 2013-03-09 In this volume the third of our series the emphasis has shifted from the theoretical and experimental to the more clinical and practical aspects of alcoholism Where in the earlier volumes more attention was directed to animal than human studies in this volume almost all material deals with the human condition The clinical manifestations of alcoholism may be divided into two major aspects that of the disease itself and that of its complications This separation is to some extent artificial since in a sense the natural history of the disease is a function of the development of certain complicating mechanisms These mechanisms in turn either become part and parcel of the underlying condition alcoholism or give rise to a new set of clinical variables characterized as medical complications At this point the dichotomy becomes real The disease alcoholism tends to be seen as a distinct psychosocial entity and to be treated with psychosocial techniques The medical complications are more clearly envisioned as being within the legitimate domain of medical practice and are treated by physicians who often tend to ignore the underlying alcoholism The patient is sometimes lost in between The major thrust of this volume is an attempt to describe the mechanisms of alcoholism as they are now known in such a way as to establish a continuum between the disease alcoholism and its medical complications

Cross-Cultural Approaches to the Study of Alcohol Michael W. Everett, Jack O. Waddell, Dwight B. Heath, 2011-06-03 No detailed description available for Cross Cultural Approaches to the Study of Alcohol **A Community Reinforcement Approach to Addiction Treatment** Robert J. Meyers, William R. Miller, 2001-08-23 The community reinforcement approach CRA to treating alcohol and other drug problems is designed to make changes in the client's daily environment to reduce substance abuse and promote a healthier lifestyle It is of proven effectiveness and should be more widely used This 2001 book presents research on the effectiveness of the CRA for a clinical readership It includes the original study comparing CRA with traditional treatments of alcohol dependence and summarizes other trials with alcohol cocaine and heroin users The CRA program provides basic guidelines for clinicians focusing on communication skills problem solving and drink refusal strategies and addresses the needs of the client as part of a social community Combining practical advice on such matters with a scientific survey of CRA in use this book offers a treatment approach to all involved with the support and treatment of those with alcohol and drug problems **Alcoholism: Progress in Research and Treatment** Peter G. Bourne, Ruth Fox, 1973 **Alcoholism and Clinical Psychiatry** Joel Solomon, 2012-12-06 It is well known that alcoholism continues to be one of this country's major public health problems This issue is carefully documented by Dr Gerald Klerman Chief of ADAMHA in the second chapter of this volume In spite of the major role that alcohol plays in the health care issues of internal medicine neurology and psychiatry the subject continues to fall between the cracks of the various disciplines For this reason it has become almost a discipline of its own yet there are no academic departments of alcoholism because academic

departments are unidisciplinary and alcoholism is clearly a multidisciplinary field within medicine. In spite of the many disciplines involved in the study and treatment of alcoholism, psychiatry continues to have a special albeit often neglected relationship to alcoholism and it is the articulation of that relationship which prompted the Department of Psychiatry at the Downstate Medical Center to organize the conference upon which many chapters in this volume are based. Particular emphasis in selecting the topics to be covered was placed on the interface between alcoholism and clinical psychiatry including affective disorders, schizophrenia, suicide, adolescence, the special problems of women, and psychotherapy to mention only some of them.

Treatment and Rehabilitation of the Chronic Alcoholic Benjamin Kissin, 2012-12-06

The present volume contains a large variety of treatment approaches to the long term rehabilitation of the alcoholic ranging from the biological to the physiological to the psychological to the social. The multiplicity of proposed therapies, each of which has its strong proponents, suggests that alcoholism is either a complex medical social disease syndrome requiring a multipronged treatment approach or a very simple illness for which we have not yet discovered the remedy. The latter may indeed be true but we cannot use what we do not know and must use what we do know. We do, however, have the obligation to be responsible in our treatment to provide the best that is known at this time and to be discriminating in our prescription of appropriate treatment for individual patients. If there is one conclusion we would like to offer in our preface, it is that alcoholics constitute a markedly heterogeneous population with widely disparate needs for whom, at least at our present level of knowledge, a broad spectrum of treatment modalities is necessary. If this is true, then probably most of this book has validity. With this volume on the treatment and rehabilitation of the chronic alcoholic, we bring to completion our five volume series. The Biology of Alcoholism. As the title of the present volume indicates, we have departed from our original intention to deal solely with biological aspects of the syndrome and have attempted rather to produce a more comprehensive work.

Alcoholism Treatment and Rehabilitation National Institute of Mental Health (U.S.), 1972. 438 references to worldwide literature published from 1960 to Sept 1971 but mostly from 1964. Social Aspects of Alcoholism Benjamin Kissin, Henri Begleiter, 2013-06-29.

The first three volumes of this series have dealt with materials which generally justify the title *The Biology of Alcoholism*. This is only remotely true of the present volume *Social Aspects of Alcoholism* or of the final volume to come *Treatment and Rehabilitation*. Except for small portions of the treatment section which involve pharmacotherapy, much of these last two volumes deals with

the psychological aspects of alcoholism and still more with the social. It is interesting to review the evolution of this new pattern over the past seven years, a pattern which had it existed initially would have resulted in a different format at least in a different title. Our initial selection of areas to be covered was influenced by our desire to present as hard data as possible in an attempt to lend a greater aura of scientific rigor to a field which was generally considered as soft. When we completed our review of this material in volumes 1-3 we recognized that what we might have gained in rigor we had more than lost in completeness. These volumes presented a picture of a biological disease syndrome for which the remedies and preventive measures were presumably also biological. And yet most workers in the field readily accept the significant contributions of psychological and social factors to the pathogenesis and treatment of alcoholism. *Alcoholism and Other Drug Problems* James E. Royce, 1996 **Special Report to the U.S. Congress on Alcohol & Health**, 1990

The current issues and controversies about beverage alcohol and its potential disorders have been selected for consideration in this volume. Not all of the short essays are problem oriented. Some were written because new and pertinent knowledge has recently come forth.
