Alcoholism In Perspective:

Alcoholism in Perspective Marcus Grant, Paul Gwinner, 2023-12-01 In the 1970s an important change of emphasis had occurred in the field of alcoholism. Instead of seeing alcoholism as an all or none phenomenon it was now recognised that a continuum of alcohol problems existed so that individual cases could show different degrees of dependence and different degrees of harm. Originally published in 1979, this book examines the implications of this change of emphasis. It looks at definitional, aetiological, epidemiological and socio-cultural questions and contains contributions from acknowledged experts in all of these areas. The scientific evidence in each area is fully reviewed and made comprehensible to the non-specialist reader and similarities between trends in thinking in different fields are emphasised. In addition, the book analyses the implications of the modern view of alcohol problems in terms of their theoretical basis and their practical application. A rational and pragmatic approach to the problems of working with alcoholics is analysed in some detail so that the links between new ideas and their manifestation in clinical practice are made clear. At the time, this book represented a multi-disciplinary approach to a complex problem where previous thinking had been clouded by too ready acceptance of untested hypotheses. Alcoholism: A Molecular Perspective T. Norman Palmer, 2012-12-06 This book contains selected proceedings from the NATO Advanced Study Institute ASI The Molecular Pathology of Alcoholism held at the Hotel Il Ciocco in Tuscany during 26th August to 6th September 1990. Alcoholism remains one of the most challenging problems in medical care with far-reaching medical, social and economic consequences. For example, in the U.S. estimates indicate that 18 million people have a serious drinking problem and that the total cost to the economy of alcohol abuse is 117 billion. Treatment of alcohol dependence and other alcohol-related disorders accounts for almost 15% of the total health bill of the United States. Despite the scale of the medical problem, biomedical research on alcoholism remains something of a Cinderella science. Research funding from government and other bodies is relatively poor and the number of medical scientists working in the field remains small. The Organizing Committee for this NATO ASI, comprising Charles Lieber (New York), Timothy Peters (London), Mario Dianzani (Torino), Emanuele Albano (Torino) and Norman Palmer (Perth), were therefore particularly grateful to the NATO Scientific Affairs Division for their active support of this ASI, the first dealing with a topic related to alcohol abuse. We moreover hope that this support will continue. The theme of the ASI was an in-depth discussion of the molecular events initiated by alcohol abuse that culminate in onset of alcohol-related disease. **Alcoholism in perspective**, 1979 *Trends in Alcohol Abuse and Alcoholism Research* Rin

Yoshida, 2007 Alcoholism is a disorder characterised by the excessive consumption of and dependence on alcoholic beverages leading to physical and psychological harm and impaired social and vocational functioning. This book gathers new and important research on this socially and medically destructive disorder. These include addiction issues, forms of treatment, behavioural and clinical studies. Becoming Alcoholic David R. Rudy, 1986 Affiliation with Alcoholics Anonymous parallels

religious conversion according to David R Rudy in this timely study of the most famous self help organization in the world Drinkers who commit themselves to Alcoholics Anonymous embrace the radically different life style the altered world of the convert To understand this conversion and more important to get a grip on the even deeper mystery of alcoholism itself Rudy sought to answer these three questions What processes are involved in becoming alcoholic How does the alcoholic affiliate with and become committed to A A s belief system What is the relation ship between the world of A A members and that constructed by alcoholologists Rudy establishes the history and structure of A A and examines the organization s relationship to dominant sociological models theories and definitions of alcoholism

Fetal Alcohol Spectrum Disorders in Adults: Ethical and Legal Perspectives Monty Nelson, Marguerite Trussler, 2015-07-28 This book discusses and provides insight on the legal and ethical dilemmas of managing those with Fetal Alcohol Spectrum Disorder FASD This book provides a clear perspective for those clinicians and legal professionals who are working with those with this disorder and correspondingly increases their understanding when arranging effective supports for this population Historically the primary focus on FASD has been on children However this is a lifelong disorder and the implications of this disorder become even more prominent and complex in adulthood Those with this condition can struggle with impulsiveness and a host of cognitive difficulties This correspondingly impacts their independence and employability and produces an elevated risk for homelessness and other residential issues involvement in substance use being exploited development of behavioural issues and subsequent legal difficulties Their cognitive difficulties result in challenges for legal systems around the world to understand their issues and to design appropriate remedial strategies recommendations for treatments and supports and even for understanding the failure of many of these individuals to be able to change their behaviours effectively This produces various legal and ethical dilemmas which are discussed in detail in this volume by 28 authors from Europe New Zealand and North America These include discussions regarding the rights of the unborn child the alcohol industry s duty to warn whether small amounts of alcohol during pregnancy can be condoned and even the current use of involuntary hospitalization for addicted mothers Other chapters discuss the need for training on FASD for front line officers use of lies during interrogation of those with FASD medical and legal interventions for offenders with FASD access to diagnostic services and follow up supports and whether FASD can be considered a mitigating factor for sentencing Furthermore caregivers also provide their stories regarding the daily dilemmas that are faced in raising those with FASD

Constructive Drinking Mary Douglas, 2013-10-16 First published in 1987 Constructive Drinking is a series of original case studies organized into three sections based on three major functions of drinking The three constructive functions are that drinking has a real social role in everyday life that drinking can be used to construct an ideal world and that drinking is a significant economic activity The case studies deal with a variety of exotic drinks

The Palgrave Handbook of Psychological Perspectives on Alcohol Consumption Richard Cooke, Dominic Conroy, Emma Louise Davies, Martin S. Hagger, Richard O. de Visser, 2021-05-10 This

Handbook provides a broad and comprehensive overview of psychological research on alcohol consumption It explores the psychological theories underpinning alcohol use and misuse discusses the interventions that can be designed around these theories and offers key insight into future developments within the field A range of international experts assess the unique factors that contribute to alcohol related behaviour as differentiated from other health related behaviours They cover the theory and context of alcohol consumption including possible implications of personality type motivation and self regulation and cultural and demographic factors After reviewing the evidence for psychological theories and predictors as accounts for alcohol consumption the book goes on to focus on external influences on consumption and interventions for reducing alcohol consumption including those based on purchasing and consumption behaviour technologies such as personalised feedback apps and social and media phenomena such as Dry January and Hello Sunday Morning It brings together cutting edge contemporary research on alcohol consumption in childhood and adolescence including topics such as managing offers or drinks pre drinking online identities how children develop their beliefs about alcohol and how adolescents discuss alcohol with their parents The book also offers a rounded presentation of the tensions involved in debates around the psychological impacts of alcohol use discussing its role in helping people to socialise and unwind as well as recognising the possible negative impacts on health education and relationships This book will be of interest to academics policymakers public health officials practitioners charities and other stakeholders interested in understanding how alcohol affects people psychologically This book will also be a key resource for students and researchers from across the social sciences Recent Developments in Alcoholism Marc Galanter,2013-11-22 Each topic is covered in sufficient depth currency and clarity to be of value to the neophyte and the seasoned researcher clinician American Journal of Psychiatry from a review of a previous volume The current volume addresses a range of issues across this diverse field including the effects on society physiology and biochemistry clinical pathology and trends in treatment Alcoholism and Clinical Psychiatry Joel Solomon,2012-12-06 It is well known that alcoholism continues to be one of this country s major public health problems This issue is carefully documented by Dr Gerald Klerman Chief of ADAMHA in the second chapter of this volume In spite of the major role that alcohol plays in the health care issues of internal medicine neurology and psychiatry the subject continues to fall between the cracks of the various disciplines For this reason it has become almost a discipline of its own yet there are no academic departments of alcoholism because academic departments are unidisciplinary and alcoholism is clearly a multidisciplinary field within medicine In spite of the many disciplines involved in the study and treatment of alcoholism psychiatry continues to have a special albeit often neglected relationship to alcoholism and it is the articulation of that relationship which prompted the Department of Psychiatry at the Downstate Medical Center to organize the conference upon which many chapters in this volume are based Particular emphasis in selecting the topics to be covered was placed on the interface between alcoholism and clinical psychiatry including affective disorders schizophrenia suicide adolescence the special

problems of women and psychotherapy to mention only some of them *A public health perspective on alcohol establishments: licensing, density and locations. Policy brief. Brief 8, November 2022* World Health Organization, 2022-11-11

This publication by the World Health Organization provides a comprehensive overview of alcohol control policies focusing on licensing density and location from a public health perspective It explores the evidence and policy options available to reduce alcohol consumption and its associated harms The document is part of a series aimed at public health professionals policymakers and researchers offering guidance on reducing alcohol availability and affordability It highlights the role of cultural social and religious norms in influencing alcohol consumption and emphasizes the need for health promotion interventions The series serves as a resource for implementing high impact strategies to address alcohol related issues globally Alcohol in America United States Department of Transportation, National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Elizabeth Hanford Dole, Dean R. Gerstein, Steve Olson, 1985-02-01 Alcohol is a killer 1 of every 13 deaths in the United States is alcohol related In addition 5 percent of the population consumes 50 percent of the alcohol The authors take a close look at the problem in a classy little study as The Washington Post called this book The Library Journal states T his is one book that addresses solutions And it s enjoyably readable This is an excellent review for anyone in the alcoholism prevention business and good background reading for the interested layperson The Washington Post agrees the book likely will wind up on the bookshelves of counselors politicians judges medical professionals and law enforcement officials throughout the country **Alcoholism and Women** Marc Galanter, 2006-04-11 Solid plausible accurate and loaded with pertinent and highly referenced information regarding clinical and basic research in alcholism among women and ethnic groups an essential text in the libraries of academicians teachers clinicians researchers and policy makers The quality and scope of the work are groundbreaking and it is convenient to have it all in one source American Journal of Psychiatry Volume 12 highlights the remarkable evolution of alcoholism research during the last few years focusing on gender in alcohol actions and consequences **Correctional Counseling and Rehabilitation** Patricia Van Voorhis, Michael C. Braswell, David Lester, 2010-04-06 This text presents foundations of correctional intervention including overviews of the major systems of therapeutic intervention diagnosis of mental illness and correctional assessment and classification Its detailed descriptions and cross approach comparisons can help professionals better determine which of several techniques might be especially useful in their particular setting Includes key concepts and terms as well as discussion questions Substance Use in a Comparative Perspective Arnošt Veselý , Dagmar Dzúrová, 2013-10-01 The book follows two main objectives First it aims at putting together different pieces of evidence on developments of substance use and risk behavior in five post communist countries over time Thus first objective is to build a complex and reliable empirical evidence base for empirical comparison and identify evidence gaps Second we try to analyze and interpret such developments using both quantitative and qualitative

analysis and to relate them to the formulated theoretical framework Since available empirical evidence is often far from conclusive the findings presented are sometimes rather exploratory and should be tested by further and more detailed research The book is structured as follows At the beginning we review various factors that have been found to be associated with substance use We try to present them in a complex and systematic way and create a conceptual framework for understanding and explaining substance use in a comparative way Next chapter describes the developments of substance use over time in five countries analyzed This description is based upon publicly available WHO data along with supplementary comments and interpretations by national experts Next chapter is devoted to country profiles of all five countries involved in the project and in depth overviews of developments in their respective substance use situations All reviews are written according to the same structure thus facilitating comparison The last chapter presents a multilevel analysis of substance use in the Czech Republic combining data for individuals and regions
