Management in Public Services Organizations Ewan Ferlie, Edoardo Ongaro, 2015-02-20 Strategic Management in Public Services Organizations sets out to connect the two traditionally disparate academic literatures of public management and strategic management The authors argue that some models of strategic management are now of enhanced relevance for contemporary public services organizations especially when considering successive New Public Management reforms This observation has important consequences for the requisite work practices skills and knowledge bases of current public managers as they are increasingly being asked to act as strategic as well as operational managers Strategic Management in Public Services Organizations takes a strongly comparative and international perspective in addressing the fundamental issue of strategic management within diverse public administrative traditions The impact of strategic management on the performance of public agencies is examined and it is argued that the appropriate use of strategic management models depends on the politico administrative and cultural contexts of the public services organization in question concluding that there is no single best way to strategically lead public organisations This is an advanced textbook aimed at the postgraduate level particularly students on MPAs and MBAs with a public sector option or MScs in Public Policy and Public Management

Growing the Productivity of Government Services Patrick Dunleavy, Leandro Carrera, 2013-01-01 Carrera and Dunleavy provide a crystal clear and comprehensive account of the complex issues involved in how best to improve the productivity of government services They offer a nuanced but powerful explanation of productivity puzzles conundrums and dilemmas in the public sector But they also offer solutions to many of these problems Finally I have found a text on public economics that makes sense gives genuine management insights and offers real suggestions to practitioners as to what to do next Barry Quirk Chief Executive London Borough of Lewisham UK This book presents a welcome and sobering analysis of productivity performance in UK central government a subject that has received remarkably little serious academic attention up to now in spite of decades of general commentary on managerialism Christopher Hood All Souls College UK Leandro Carrera and Patrick Dunleavy have performed an amazing feat in this book through their rigorous examination of a thorny topic that has dogged pundits and academics alike Just how efficient is government and how well does it do its job As a result of an impressive but accessible set of data analyses the authors make an authoritative attack on the proponents of the New Public Management and offer some clear recommendations for reform based on better use of new technology Peter John University College London UK Productivity is essentially the ratio of an organization's outputs divided by its inputs For many years it was treated as always being static in government agencies In fact productivity in government services should be rising rapidly as a result of digital changes and new management approaches and it has done so in some agencies However Dunleavy and Carrera show for the first time how complex are the factors affecting productivity growth in government organizations especially management practices use of IT organizational culture strategic mis decisions and political and policy churn With government budgets under stress in many countries this pioneering book

shows academics analysts and officials how to measure outputs and productivity in detail how to cope with problems of quality variations and how to achieve year on year sustainable improvements in the efficiency of government services
