Agency And Responsibility A Common Sense Moral Psychology:

Agency and Responsibility Jeanette Kennett, 2003 Is it ever possible for people to act freely and intentionally against their better judgement Is it ever possible to act in opposition to one's strongest desire If either of these questions are answered in the negative the common sense distinctions between recklessness weakness of will and compulsion collapse This would threaten our ordinary notion of self control and undermine our practice of holding each other responsible for moral failure So a clear and plausible account of how weakness of will and self control are possible is of great practical significance Taking the problem of weakness of will as her starting point Jeanette Kennett builds an admirably comprehensive and integrated account of moral agency which gives a central place to the capacity for self control Her account of the exercise and limits of self control vindicates the common sense distinction between weakness of will and compulsion and so underwrites our ordinary allocations of moral responsibility She addresses with clarity and insight a range of important topics in moral psychology such as the nature of valuing and desiring conceptions of virtue moral conflict and the varieties of recklessness here characterised as culpable bad judgement and does so in terms which make their relations to each other and to the challenges of real life obvious *Agency and Responsibility* concludes by testing the accounts developed of self control moral failure and moral responsibility against the hard cases provided by acts of extreme evil Moral Psychology Thomas

Nadelhoffer, Eddy Nahmias, Shaun Nichols, 2010-10-18 *Moral Psychology Historical and Contemporary Readings* is the first book to bring together the most significant contemporary and historical works on the topic from both philosophy and psychology Provides a comprehensive introduction to moral psychology which is the study of psychological mechanisms and processes underlying ethics and morality Unique in bringing together contemporary texts by philosophers psychologists and other cognitive scientists with foundational works from both philosophy and psychology Approaches moral psychology from an empirically informed perspective Explores a wide range of topics from passion and altruism to virtue and responsibility Editorial introductions to each section explain the background of and connections between the selections **Towards an**

Trakakis, 2011-01-01 This volume presents an accessible and engaging collection of essays by prominent Australasian philosophers covering a wide array of topics and drawn from a series of public lectures on Philosophy in Australia and Zealand convened over a period of four years The essays explore the rich philosophical past of Australasia while also illustrating why philosophy in Australasia ranks highly in influence and esteem *The Explanation of Crime* Per-Olof H. Wikström, Robert J. Sampson, 2006-11-30 Integration of disciplines theories and research orientations has assumed a central role in criminological discourse yet it remains difficult to identify any concrete discoveries or significant breakthroughs for which integration has been responsible Concentrating on three key concepts context mechanisms and development this volume aims to advance integrated scientific knowledge on crime causation by bringing together different scholarly

approaches Through an analysis of the roles of behavioural contexts and individual differences in crime causation The Explanation of Crime seeks to provide a unified and focused approach to the integration of knowledge Chapter topics range from individual genetics to family environments and from ecological behaviour settings to the macro level context of communities and social systems This is a comprehensive treatment of the problem of crime causation that will appeal to graduate students and researchers in criminology and be of great interest to policy makers and practitioners in crime policy and prevention

Weakness of Will and Practical Irrationality Sarah Stroud, Christine Tappolet, 2003-09-04 Among the many practical failures that threaten us weakness of will or akrasia is often considered to be a paradigm of irrationality The eleven new essays in this collection written by an excellent international team of philosophers some well established some younger scholars give a rich overview of the current debate over weakness of will and practical irrationality more generally Issues covered include classical questions such as the distinction between weakness and compulsion the connection between evaluative judgement and motivation the role of emotions in akrasia rational agency and the existence of the will The also include new topics such as group akrasia strength of will the nature of correct choice the structure of decision theory the temporality of prudential reasons and emotional rationality Because these questions cut across philosophy of mind and ethics the collection will be essential reading for scholars postgraduates and upper level undergraduates in both these fields

The Law and Economics of Irrational Behavior Francesco Parisi, Vernon L. Smith, 2005 This collection of essays explores the most relevant developments at the interface of economics and psychology giving special attention to models of irrational behavior and draws the relevant implications of such models for the design of legal rules and institutions The application of economic models of irrational behavior to law is especially challenging because specific departures from rational behavior differ markedly from one another Furthermore the analytical and deductive instruments of economic theory have to be reshaped to deal with the fragmented and heterogeneous findings of psychological research turning towards a more experimental and inductive methodology This volume brings together pioneering scholars in this area along with some of the most exciting developments in the field of legal and economic theory Areas of application include criminal law and sentencing tort law contract law corporate law and financial markets

Being Amoral Thomas Schramme, 2014-08-22 Investigations of specific moral dysfunctions or deficits that shed light on the capacities required for moral agency Psychopathy has been the subject of investigations in both philosophy and psychiatry and yet the conceptual issues remain largely unresolved This volume approaches psychopathy by considering the question of what psychopaths lack The contributors investigate specific moral dysfunctions or deficits shedding light on the capacities people need to be moral by examining cases of real people who seem to lack those capacities The volume proceeds from the basic assumption that psychopathy is not characterized by a single deficit for example the lack of empathy as some philosophers have proposed but by a range of them Thus contributors address specific deficits that include impairments in rationality language fellow feeling

volition evaluation and sympathy They also consider such issues in moral psychology as moral motivation moral emotions and moral character and they examine social aspects of psychopathic behavior including ascriptions of moral responsibility justification of moral blame and social and legal responses to people perceived to be dangerous As this volume demonstrates philosophers will be better equipped to determine what they mean by the moral point of view when they connect debates in moral philosophy to the psychiatric notion of psychopathy which provides some guidance on what humans need in order be able to feel the normative pull of morality And the empirical work done by psychiatrists and researchers in psychopathy can benefit from the conceptual clarifications offered by philosophy Contributors Gwen Adshead Piers Benn John Deigh Alan Felthous Kerrin Jacobs Heidi Maibom Eric Matthews Henning Sass Thomas Schramme Susie Scott David Shoemaker Walter Sinnott Armstrong Matthew Talbert

The Palgrave Handbook of Applied Ethics and the Criminal Law Larry Alexander, Kimberly Kessler Ferzan, 2019-12-02 This handbook consists of essays on contemporary issues in criminal law and their theoretical underpinnings Some of the essays deal with the relationship between morality and criminalization Others deal with criminalization in the context of specific crimes such as fraud blackmail and revenge pornography The contributors also address questions of responsible agency such as the effects of addiction or insanity and some deal with punishment its mode and severity and the justness of the state's imposition of it These chapters are authored by some of the most distinguished scholars in the fields of applied ethics criminal law and jurisprudence

The Possibility of Moral Community James Lenman, 2024-08-28 The Possibility of Moral Community defends the claim that there could be a moral community a community of rational creatures somewhat like ourselves living together in ways informed and regulated by shared normative standards and understandings These creatures aim to live together in this way and expect each other to conform to that shared aim Those who fail to do so are deemed to have acted wrongly and held responsible for doing so This possibility is not dependent on the truth of such large metaphysical claims as robust normative realism and libertarian free will And even if these large metaphysical claims are false moral community remains possible without those who compose it needing to commit any errors believe any fictions live any lies or be subject to any illusions There is nothing they need to make believe or to pretend This possibility is vindicated by developing and defending the view that our normative thought and talk expresses who we are Or more exactly who we are when we are by our own lights at our best This is something shaped by our history our nature and the passions in our souls It is something contingent certainly but it is idle to be troubled by that if it is also something we are able to take ownership of and agree to inhabit together as a space of mutual normative expectation and responsibility
