## **Agent Culture Human Agent Interaction In A Multicultural World:**

Agent Culture Sabine Payr, Robert Trappi, 2004-06-11 This volume began with a workshop of the Austrian Research Institute for Artificial Intelligence held in 2001 Concerned with embodied agents as cultural objects and subjects the book is divided into three parts It begins by drawing attention to the cultural embeddedness of technology in general and agent design in particular as a reminder that there cannot be an agent without culture The section concludes that agent systems not only can be used to establish a shared understanding but can also promote the diversity of understanding and identity Part II consists of chapters dealing with design concepts and reflections on cross cultural believability It suggests how an agent's behavior may be adapted to the cultural context of application while maintaining consistency and describes an approach based on the OCC model which is widely known and used in the embodied agents research community Next the section suggests that Affect Control Theory an empirically based mathematically elaborated perspective on microsociology can be incorporated into agents in order to give them a capacity for normative role behaviors and emotional displays Subsequent chapters pass on from more general considerations to the design and implementation of cross cultural characters and present virtual character design from the perspective of the artist and the practitioner in stressing that corporate culture and audience culture both guide the design choices but the resulting culturally adapted agent is handcrafted It ends with a chapter that reports cross cultural user studies made in the UK Austria and Croatia Part III discusses the potential of agents as mediators in intercultural communication It includes an overview of the ways in which embodied agents are and could be used to coach the acquisition of intercultural communication skills followed by a chapter that suggests agents could be used to intentionally mold intercultural communication The last chapter addresses the need for a shared sense of community in large scale collaboration systems for multi national organizations that transcends any one cultural orientation and that is truly multicultural

*Intelligent Virtual Agents* Zsófia Ruttkay, Michael Kipp, Anton Nijholt, Hannes Högni Vilhjálmsson, 2009-09-03 Welcome to the proceedings of the 9th International Conference on Intelligent Virtual Agents held September 14-16 2009 in Amsterdam The Netherlands Intelligent virtual agents IVAs are interactive characters that exhibit hum like qualities and communicate with humans or with each other using natural human modalities such as speech and gesture They are capable of real time perception cognition and action allowing them to participate in a dynamic physical and social environment IVA is an interdisciplinary annual conference and the main forum for presenting research on modeling developing and evaluating IVAs with a focus on communicative abilities and social behavior The development of IVAs requires expertise in multimodal interaction and several AI fields such as cognitive modeling planning vision and natural language processing Computational models are typically based on experimental studies and theories of human-human and human-robot interaction conversely IVA technology may provide interesting lessons for these fields The realization of engaging IVAs is a challenging task so reusable modules and tools are of great value The fields of

application range from robot assistants social simulation and tutoring to games and artistic ploration     **Culture and Computing** Toru Ishida,2010-11-18 In the light of upcoming global issues concerning population energy the environment and food information and communication technologies are required to overcome difficulties in communication among cultures In this context the First International Conference on Culture and Computing which was held in Kyoto Japan in February 2010 was conceived as a collection of symposia panels workshops exhibitions and guided tours intended to share issues activities and research results regarding culture and computing This volume includes 17 invited and selected papers dealing with state of the art topics in culturally situated agents intercultural collaboration and support systems culture and computing for art and heritage as well as culture and computing within regional communities     **Universal Access in Human-Computer Interaction. Advanced Interaction, Modalities, and Techniques* Masaaki Kurosu,2014-06-07 The 3 volume set LNCS 8510 8511 and 8512 constitutes the refereed proceedings of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Crete Greece in June 2014 The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions These papers address

the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas     *Multi-Agent-Based Simulation XIV* Shah Jamal Alam,H. Van Dyke Parunak,2014-03-31 This book constitutes the thoroughly refereed post conference proceedings of the 14th International Workshop on Multi Agent Based Simulation MABS 2013 held in Saint Paul Minnesota USA in May 2013 The workshop was help in conjunction with Twelfth International Conference on Autonomous Agents and Multiagent Systems AAMAS 2013 The 11 revised full papers included in this volume were carefully selected from 29 submissions The papers are organized in topical sections on MABS for real time and online data formal approaches in MABS design and validation MABS in environmental modeling simulating social phenomena     *Human Centered Design* Masaaki Kurosu,2009-07-14 The 13th International Conference on Human Computer Interaction HCI International 2009 was held in San Diego California USA July 19 24 2009 jointly with the Symposium on Human Interface Japan 2009 the 8th International Conference on Engineering Psychology and Cognitive Ergonomics the 5th International Conference on Universal Access in Human Computer Interaction the Third International Conference on Virtual and Mixed Reality the Third International Conference on Internationalization Design and Global Development the Third International Conference on Online Communities and Social Computing the 5th International Conference on Augmented Cognition the Second International Conference on Digital Human Modeling and the First International Conference on Human Centered Design A total of 4 348 individuals from academia research institutes industry and governmental agencies from 73 countries submitted contributions and 1 397 papers that were judged to be of high scientific quality were included in the program These papers dress the latest research and development efforts and highlight the human aspects of the design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas     **Cases on Transnational Learning and Technologically Enabled Environments**

Mukerji, Siran,Tripathi, Purnendu,2010-03-31 This book offers case studies on divergent themes addressing the core perspective of technological adaptability and transnational learning Provided by publisher     *Social Intelligence* Nathan Emery,Nicola Clayton,Christopher D. Frith,2008 Why are humans so clever The Social intelligence hypothesis explores the idea that this cleverness has evolved through the increasing complexity of social groups Our ability to understand and control nature is a by product of our ability to understand the mental states of others and to use this knowledge to co operate or deceive These abilities have not emerged out of the blue They can be found in many social animals that co operate and compete with one another birds as well as mammals This book brings together contributions from an impressive list of authorities in the field appropriately concluding with a chapter by Nick Humphrey one of the pioneers in this field This volume examines social intelligence in many different animal species and explores its development evolution and the brain

systems upon which it depends Better understanding and further development of social intelligence is critical for the future of the human race and the world that we inhabit Our problems will not be solved by mere cleverness but by increased social co operation

**Advances in Cross-Cultural Decision Making** Dylan Schmorow, Denise Nicholson, 2010-06-17

The primary focus of the Cross Cultural Decision Making field is specifically on the intersections between psychosocial theory provided from the social sciences and methods of computational modeling provided from computer science and mathematics

While the majority of research challenges that arise out of such an intersection fall quite reasonably

*Cases on Cultural Implications and Considerations in Online Learning* Edmundson, Andrea, 2012-07-31

Expectations of life work education and so forth are rooted in cultural values As a result access to an engagement with online learning is a culture bound experience

Cases on Cultural Implications and Considerations in Online Learning illustrates ways in which to reach and engage learners across cultures by using online learning that accommodates cultural differences and preferences This casebook helps online educators understand what cultural expectations their students have before they create online programs and tailor their instructional designs for multicultural and international learners
