## **Aggregation And Disaggregation In Sociology:**

**Aggregation and Disaggregation in the Social Sciences** Michael T. Hannan,1991      **Aggregation and Disaggregation in Sociology** Michael T. Hannan,1971      **Problems of Aggregation and Disaggregation in Sociological Research** Michael T. Hannan,1970      [Economics and Sociology: Towards an Integration](#) T.

Huppes,2013-11-09 In recent years economics has been the subject of increasingly severe criticism It has failed both to predict and to counteract the economic crisis now afflicting nearly the whole Western world Economic life is more disrupted than ever the rate of inflation has risen alarmingly unemployment has not been as high since the 1930s economic growth is stagnating there is increasing opposition to the inequality in the distribution of income and wealth on a national scale as well as in the world at large the process of economic integration EEC GATT UNCTAD is being thwarted programmes of economic development in the third world have not produced the desired effects etcetera Obviously it would not be fair to put the blame for the crisis on economic science But the present predicament does call for serious consideration of the limitations of economic explanation Among the social sciences economics is unquestionably the most advanced discipline Its very sophistication however leads it to abstract from social phenomena such as norms institutions power conflict and social change Thus the manifest influence of sociological variables on the course of economic processes remains hidden Dominating this book as a drumbeat is the conviction held by the several authors that a clearer grasp of the current problems may be obtained if economists and sociologists are prepared to co operate more closely An interdisciplinary approach is warranted the distinction between the social sciences should be less sharply drawn      **What Has Sociology Achieved?** Henk A.

Becker,Christopher G.A. Bryant,2016-07-27 In an age when continued financial and other support for teaching and research in sociology cannot be taken for granted sociologists have been surprisingly slow to provide a clear statement of the achievements of sociology in the western world since 1950 What Has Sociology Achieved does this by assembling twelve essays specially commissioned from distinguished authors to which the editors add an introduction setting out the issues and a concluding chapter which draws together recurrent themes      *A Critical Dictionary of Sociology* Raymond

Boudon,Francois Bourricaud,2002-09-10 Unlike most other sociology or social science dictionaries in this translation of the Critical Dictionary of Sociology taken from the second French edition of the Dictionary and edited by the English sociologist Peter Hamilton the critical value of this distinctive work is at last made available for a wider audience Each entry grapples directly with an issue whether theoretical epistemological philosophical political or empirical and provides a strong statement of what the authors think about it The discussions are considered but argumentative By reaffirming that a non marxist style of critique is still possible Boudon and Bourricaud have presented a distinctive approach to the key issues which confront the societies of the Twentieth and Twenty First centuries For some this work will be a textbook for others an indispensable sourcebook of sociological concepts and for most a way of opening our eyes to new dimensions in our

understanding of the great ideas and theories of sociology      **Ethnomethodology and the Human Sciences** Graham Button, 1991-08-30 Through its empirical inquiries into the ordered properties of social action this text demonstrates how ethnomethodology provides a radical respecification of the foundations of the human sciences an achievement that has often been misunderstood      *Theorizing the Dynamics of Social Processes* Harry F. Dahms, Lawrence Hazelrigg, 2010-08-18 Intends to assemble a set of essays that invent develop and or demonstrate strategies for theorizing one or several dynamic processes so as to identify illustrate by example and analyze specific problems as well as connect theorizations of process across different disciplines of inquiry      **Causal Models in the Social Sciences** H.M. Blalock Jr., 2017-07-28 Causal models are formal theories stating the relationships between precisely defined variables and have become an indispensable tool of the social scientist This collection of articles is a course book on the causal modeling approach to theory construction and data analysis H M Blalock Jr summarizes the then current developments in causal model utilization in sociology political science economics and other disciplines This book provides a comprehensive multidisciplinary picture of the work on causal models It seeks to address the problem of measurement in the social sciences and to link theory and research through the development of causal models Organized into five sections Simple Recursive Models Path Analysis Simultaneous Equations Techniques The Causal Approach to Measurement Error and Other Complications this volume contains twenty seven articles eight of which were specially commissioned Each section begins with an introduction explaining the concepts to be covered in the section and links them to the larger subject It provides a general overview of the theory and application of causal modeling Blalock argues for the development of theoretical models that can be operationalized and provide verifiable predictions Many of the discussions of this subject that occur in other literature are too technical for most social scientists and other scholars who lack a strong background in mathematics This book attempts to integrate a few of the less technical papers written by econometricians such as Koopmans Wold Strotz and Fisher with discussions of causal approaches in the social and biological sciences This classic text by Blalock is a valuable source of material for those interested in the issue of measurement in the social sciences and the construction of mathematical models      **Crossroads of Social Science** Heinz Eulau, 1989 The essays in this collection analyze the successes and failures of the social sciences over the last few decades as well as on their future The focus of the book is on generic problems difficulties and dilemmas in the social sciences that the contributors are uniquely qualified to articulate Each of them has been intimately involved in the development of one or another discipline in the last thirty years or so each has made significant contributions to that development in many ways each has a personal perspective on accomplishments and failures promises and needs continuities to be cultivated and opportunities to be seized anyone concerned with the state of social science disciplines should find these essays of interest Journal of Politics      **Political Analysis** James A. Stimson, 1990 Publishes scholarly articles on topics related to all areas of political science methodology See also Freeman John R      **Computer Applications in the Social Sciences** Edward E.

Brent, Ronald E. Anderson, 1990 Presenting an introduction to computing and advice on computer applications this book examines hardware and software with respect to the needs of the social scientist It offers a framework for the use of computers with focus on the work station the center of which is a personal computer connected to networks by a telephone based modem      2.2 Philosophical & Sociological Perspectives of Education - I (ITEP) KHRITISH SWARGIARY, 2025-07-01

As the author of *Philosophical Sociological Perspectives of Education I* I am delighted to present this work to student teachers educators and all those passionate about understanding the profound interplay between philosophy sociology and education This book is crafted with the intent to serve as a comprehensive guide for exploring the foundational principles that shape educational thought and practice It is designed to provoke reflection inspire dialogue and foster a deeper appreciation of the philosophical and sociological dimensions that inform the educational process The journey of writing this book stems from a recognition of the critical need to bridge ancient wisdom with contemporary educational practices By delving into Indian and Western philosophical traditions alongside the visionary contributions of great educational thinkers this work aims to equip prospective teachers with the intellectual tools to navigate the complexities of modern education The inclusion of sociological perspectives further enriches this exploration emphasizing the role of values culture and society in shaping educational aims and practices This book is not merely an academic exercise but an invitation to engage with timeless questions about the nature of knowledge human existence and societal aspirations It is my hope that readers will find in these pages both inspiration and practical insights to enrich their educational practice and contribute meaningfully to the evolution of education in the 21st century      **Citizens, Politics and Social Communication** R. Robert Huckfeldt, John Sprague, 1995-01-27

Democratic politics is a collective enterprise not simply because individual votes are counted to determine winners but more fundamentally because the individual exercise of citizenship is an interdependent undertaking Citizens argue with one another and they generally arrive at political decisions through processes of social interaction and deliberation This book is dedicated to investigating the political implications of interdependent citizens within the context of the 1984 presidential campaign as it was experienced in the metropolitan area of South Bend Indiana Hence this is a community study in the fullest sense of the term National politics is experienced locally through a series of filters unique to a particular setting and its consequences for the exercise of democratic citizenship      *Sociological Analysis* J. A. Hughes, 1976

The Process of Technological Innovation National Science Foundation (U.S.). Division of Industrial Science and Technological Innovation. Productivity Improvement Research Section, 1983      Studying Interpersonal Interaction Barbara M. Montgomery, Steve Duck, 1993-11-01 This volume presents a comprehensive critical examination of current research methods used to study human social behavior as it occurs in interpersonal settings such as families acquaintanceships friendships and romantic partnerships Multidisciplinary in approach the book's chapters are written by leading figures in communication social psychology sociology and family studies who explore the methodological choices a researcher must

make in order to study interpersonal interaction To permit clear comparison all chapters in this volume reference the same common research problem to develop examples illustrate controversial issues and describe the potential of the particular method under discussion Written in an accessible style chapters openly discuss the strengths and weaknesses of each method consider underlying philosophy and assumptions and note limitations as well as advantages The result is an originally crafted work that offers readers a unique way to learn about compare and ultimately judge the many methods presently available to the researcher or student of interpersonal interaction Part I considers the assumptions researchers must make about the nature of a social interaction in order to study it Chapters address issues related to formulating research problems choosing a research paradigm determining a viewpoint participant peer or observer from which to gather data deciding on appropriate levels and units of analysis incorporating time and assessing the mutual adaptation that characterizes interpersonal communication Part II focuses on procedures for gathering data These include using accounts and narratives logs and diaries retrospective self reports discourse records direct observation and experimentation Part III highlights new and newly re discovered methods for analyzing interaction data Assuming that the reader is familiar with traditional regression and mean differences approaches chapters build on this knowledge base to discuss content analysis tests of sequential association in categorical data ways of dealing with interdependence in dyadic data and longitudinal analytic techniques such as time series analysis phasic analysis and meta analysis The book concludes with a chapter that both summarizes previous chapters and convincingly argues for methodological pluralism Encompassing the broad range of central concerns in designing research studies from conceptualization through assessment to data analysis this book is an ideal reference source for all those engaged in actual research projects It is also highly valuable for advanced undergraduate and graduate methods courses
